

UBERMENSCHLICHKEIT

HEALTH PROTOCOLS

UBERMENSCHHEIT: BECOMING A SUPERMAN

The following health protocols consist of a distillation of research and experiences over the course of over two decades. The author's work "Hell-th: Stairclimber to Heaven or Elliptical Path to the Abyss" explains his journey along the broad and winding path that led to this waystation. This is included in the appendix. That this is a mere waystation and no destination the document is presented in a relatively unstructured form without index and has no beginning or end. It will undoubtedly be added to and subtracted from as the journey continues and knowledge is gleaned through experience.

principles of fasting

#1: the more restrictive the fast the more aggressive in its purifying influence: eg. fruit diet 'fast' vs. distilled water fast; the latter is much more purifying and healing, more effective in all respects. It is also more difficult physiologically/'sensationally' as unpleasant feelings caused by cortisol secretion leaving self feeling weak, lethargic, anxious and disoriented depending on the degree of internal toxicity. Therefore recommend gradually introducing fasting as follows: i) meat eaters--->temporary vegan diet ---> fruitarian diet(possibly inclusive of cooked vegetables);

principle #2: the longer/more restrictive the fast the longer the phase of return to the normal diet

AGING

cells pick up defects=aging (DNA teleportation); block teleportation=identity preservation
bacteria/microbes also(eg. chemtrails)

psychotronic generator/crystals/bones--->amplifies morphogenic field(DNA telepathy)=+life force

REPTILIAN CONSCIOUSNESS

hierarchical thinking; aggression; conflict; division; lack of compassion; ritualism

DETOX

activate skin to eliminate toxins during fast. 'elimination cycle':

- 1) exercise (blood flow)
- 2) tonic (massage)
- 3) cryo ('cold' phase closes blood vessels, hot opens)
- 4) homeostasis

fractalized hologram of everything=Self

HGH (human growth hormone)---produced only in sleep (before 2400/0000hrs(midnight))

nightwork---> can't change circadian rhythms=shortens lifespan

caffeine contains methylxanthine=thinning of bones

<caffeine also is chemically related to strychnine and is a nerve poison; poisons the heart/
makes you 'heartless">

cause of disease: TOXICITY

toxins can be broken down to: hydrogen; carbon; nitrogen; sulphur--->combine with
Oxygen=detox toxins can't live in oxygen rich environment as anaerobic micro-organisms
H₂O₂(ozone) oxidizes above=clean air

chronic pain= symptom of low voltage make new cells:

50mv=reduces toxins; H₂O₂; O₂; vitamins/minerals/amino acids chronic disease=~ability to
make new cells

physical causes of disease:

nutrient starvation; sleep deficiency; chemical toxicity; injury; PH imbalance; proliferating
pathogens; toxic bodily responses; oxygen scarcity; emotional states; EMF
negative ions=life(negative charge)--->pathogens can't take negative charges;
balance=negentropic(opposite of entropy)

BRAIN

Right brain: integrative/participatory; verbal linguistic transduction holistic/metaphorical
info

Left brain: dealing with world(logical lattice/bitmap/blueprint work imposed on reality)
transduction[logic;math;cause-effect]

[imagery;art;dance;intuition;subjective;spontaneous;holistic;dream imagery; creation of imagery]

kidney: marjoram; cat's claw; comfrey root; fennel seed; chicory herb; bearberry; gravel root; marshmallow root; golden rod;

HOW TO COUNTER PSYCHIC VAMPIRISM/VAMPIRES:

'finger interlock technique': thumb+middle finger, both hands interlocked; imagine light sphere; eyes focused on region of pineal gland

ENGRAM=electrical impression in brain

photic stimulation(light flickering and colour) in alpha/theta range=reduces anxiety, increases relaxation/mental clarity,etc. (strobe lights of varying freq./flicker rate); also called photic driving add sound=sonic driving=audiovisual integration

MIND/YOGA:

wu-shin: ('no-mindedness', sun tzu); zen-style meditative technique involving cessation of discursive thought/internal dialogue through concentrating attention on the ajna chakra(third eye/pineal gland) between eyes and seeing through the visual field of sense data(if keep eyes open); crossing eyes assists somewhat to mechanically shift attention via sensory feedback loops to this region; eyes shut works best; best position if zen pose(on knees) or mountain pose(standing erect), fingers avoiding contact to minimize sensory input from extremities, tongue on hard palate(roof of mouth)to increase activation of region; neutral spine; nostril breathing with mouth shut; breath retention optimal to build up CO2 in blood circulation and create greater nerve stimulation/nerve force generation through internal pressure

CLOTHING:

bodily apparel is multi-factorial in its utility: warmth; mechanical protection; comfort; fashion; psycho- social/magickal influences. The 'most for the least' principle of economicity obtains here, ie.clothes are necessary to wear in most cases in society,

therefore their utility should be maximized/optimized in all respects to suit as many beneficial purposes as possible for the individual.

The following presents various examples/recommendations of apparel that serve most purposes for the above/average person: [sources for all: thrift stores; hand-me-downs; garage sales; military surplus supply stores; used via internet, eg buy and sell] temperature: coldest weather: goose/duckdown filled clothes(parkas/snow pants/face masks, etc.). Duckdown is less expensive. Exterior should be heavy cotton twill or wool, etc.), possibly treated with waterproofing for wet weather. 'milsurps'(military grade surplus) are best quality but incur possible social stigma with certain groups(PC libtards, trendoids,etc.)

fur/leather mitts: lining should be exterior, and contain additional inner layers; goretex gloves with polar lining)

boots: mukluks/snow boots ideally with rubberized bottoms(feet) and goretex material for waterproofing. thermal underwear(long johns): merino wool,etc.; wool socks(outer); cotton/nylon(inner); snow goggles optional

note: dressing in layers increases warmth via convection.

wet weather: waterproof garments(pvc lining/goretex exterior or similar fabric); show covers(rubber) hot weather: brighter clothes deflects heat, darker absorbs heat. Light linen/cotton/silk is best.As few clothes as possible should be worn at all times tailored to prevailing conditions(social setting; temperature; environmental threats/hazards,etc.)

Hazard gear: stab/slash proof gloves(kevlar; semtex; or similar fabric); with leather exterior ideally extending beyond wrist to protect arteries. Gloves that protect against needle stabbing also available. Kevlar lined jacket/clothes for same purpose and to prevent abrasive effect of falls,etc. colours: for magickal/psycho-social influence of different combinations amplifying/modifying effect of colour fabric/texture: influences mood in different ways depending on person(something to keep in mind in inducing certain states/ mood alteration) weight: influences mobility as well as mood mobility/stretch: based upon principle of specificity(specific purpose require specific things) the garments should suit the task.

Enhancing mobility through garments. As most athletes/martial artists practice, loose but not baggy, light weight,some what stretchy fabric that is breathable non-abrasive and feels good/not at all detectable on skin is best such as cotton, silk, etc. Also increases elastic/kinetic force through elastic cuffs or tucking pant legs into socks and jacket/shirt into gloves is desirable. This works through placing pressure on tendons which augment the stretch/shortening cycle of muscular contraction via feedback loops in the golgi tendon organs. Pressure activates tendon/muscle complex which increases electrical activity and speeds nerve transmission time and hence contraction enabling one to act more quickly. Wearing a belt or tucking the shirt into pants/shorts has a similar effect activating trunk musculature.

BED:

earth bed via copper wires to outside ground, preferably in/through moving water source to increase voltage

-drape EMF shielding fabric/tent around pyramid to buffer EMFs from cell towers/wireless routers/electronics/dirty electricity from wall/electrical outlets/machinery-have water flowing in surrounding environment

-ensure bed is away from above as far as possible

-place orgonite pieces(preferably pyramids) underneath/around bed according to sacred geometric/feng shui protocols

-surround bed with plants(= increase oxygen/chi/prana/vril/orgone/odic energy)

-run negative ion generators 24/7 and keep windows open as much as possible

-have alternate bed(as above) with South polarity magnets to stimulate body

magnetic: necklaces; bracelets; chain/wire around waist(inside pants touching skin or inside money belt made of silk etc.)

Energy medicine/healing equipment:

O₃[ozone]/plasma generators: this type of machinery destroys pathogens in the atmosphere through binding with them

-kills bacteria, pathogens both external/internal to physical body.

-O₃ dissolves in water and is absorbed through drinking/assimilating water external application: atmospheric cleansing/germ/bacteria/pathogenic destruction

recommended usage: ozonation of water for internal application: bubble in desired quantity of water 5 minutes minimum:

1) neti pot: 'amaroli neti' once sinuses are clear of mucous pour O₃ water into sinuses'.

variant: a) plug lower nostril and retain to allow diffusion of O₃ into brain and head.

Sensation points to efficacy/reality of absorption of O₃ into cerebral tissues<caveat: may be dangerous>.

2) drink a)post; b)with straw while bubbling for maximal absorption

3) rectal insufflation: a) bubble ozone internally via enema attachment to existing liquid administered to colon(eg.water,coffee,etc.)<caveat:can be very dangerous;not recommended> best method is to ozonate H₂O prior to administration

MAGNETISM:

create magnetic field around body to increase longevity/vitality/healing. Greater strength/quantity of magnets=greater effect type: neodymium rare earth magnets=most powerful; those shaped to conveniently apply either polarity(North or South) for intended purpose; preferably flat with rounded edges effect:

North: sedation; calming; drains excess energy; caveat: potentially depletes vital energy

South: stimulates; activates; adds energy; caveat: potentially augments

tumorigenesis(tumours)/carcinogenesis(cancers)

applications: on objects:

South pole on plants=growth; on water=+energy/voltage; on bed=energizes/stimulates

on bathtub=magnetizes water or on taps(at end) with funnel=vortexes water, increases

voltage through movement(hydroelectricity) on body=magnet on heart strengthens;

increases virility if sit on; right side of neck=decreases blood pressure; on temples=reduce

psychosis; schizophrenia; epilepsy; on crown of head=increases melatonin/human growth

hormone; forehead with North pole at base of skull=increases psychic awareness

North pole: opposite effect

UV is proportional to Cancer; vit.D3 requires UVB not UVA sunglasses=no(causes scleral damage)

how: no UV light. UV light needed to produce melanin to protect skin; sun exposure only when exposed to UV light

through windows=no; filters out UVB; destroys vit.D3 in blood

lack of sunlight=MS(multiple sclerosis); myelin sheath destroyed(in nerves) sun exposure guidelines: when(before) skin turns red; sunburn=bad

UV radiation index=myth you acclimatize to sun; increase cholesterol=increase vit.D3 synthesis

create sun shelter in winter

sungazing: morning with rising sun(stare briefly into sun; look aside; repeat 5 minutes)

DIABETES:

cause: overworked pancreas(beta cell burnout):
too frequent meals; decrease fat and protein; reduce simple sugars/caffeine/stimulants;
reverse: increase insulin receptors(exercise/sun)=increase insulin sensitivity/fasting
hypoglycemia: fat coats cells' insulin receptor sites=no glucose availability; fat absorbed via
lymphatic system--->thickens blood+prevents O2 delivery to cells<a debatable and
dubious claim> excess insulin=excess cholesterol deposits=atherosclerosis=degeneration
of capillaries=blindness/ deafness; haemorrhaging; clogs internal mucous lining; blocks
hormone entry insulin secretion is proportional to fat generation=craving/weakness
proportional to hormone sensitive lipase refined starch=cell damage(excess insulin)

BASTI/ENEMAS:

yoga/age old natural hygiene technique for colon cleansing/absorption of nutrients directly into the bloodstream via veins through osmosis

yoga technique: mula bandha (activates muladhara chakra; initiates development of kundalini serpent fire to be worked up to higher chakras/energy centers/
-blood/internal organ and tissue purification depending on substance absorbed

two modalities: 1) flush; 2) retention; latter=absorption/circulation around bloodstream through absorption via osmosis

retention procedure:

a) flush colon with water/urine(1.5l x 1-2 times) using enema bag in bath tub-->step out and expel into toilet(if weak perineal muscles/unpracticed possibly use colema board over toilet); repeat if necessary

b) absorb coffee/substance;retain; remain in tub and massage side to circulate blood. Liquid should not be more than slightly warmer than or equal to body temperature(use back of hand to test prior to administration)

-variations (see liver herb list for specific effect desired)<caveat: recommend against any retention enemas as possibility of sepsis/septic shock; also insulin shock w/ caffeinated beverages as caffeine is absorbed directly into the bloodstream via the blood vessels in the colon>

detox/calm: dandelion; valerian; camomile; chapparrel;

DEFECATION:

conventional 'western' toilet: causes strain and eventual colon cancer through incomplete elimination and retention of faecal matter in colon leading to putrefaction & chronic obstruction(sepsis, etc.). Use: elevated toilet stool(~18" high;can be homemade out of wood); user should squat and compress the abdomen with the thighs to fully excrete waste matter and eliminate the obstruction. This increases longevity/energy as $v(\text{vitality})=p-o$ but reducing the 'o'(obstruction) it increases the 'p'(power) and thereby the 'v'

Bidet attachment: as the name connotes it is prevalent in Europe('Bidet') and in all civilized nations. To properly clean the anus and debris via water spray. Eliminates waste of T.P and deforestation. Costs nothing financially as he can be hooked up to plumbing via toilet. Most important feature: maximal cleanliness. How does rubbing chemicalized paper on yourself clean you? What kind of chemicals are used in toilet paper? Alternative to this(or

absence of proper attachment) a pot can be used; fill with water and clean with hand; wash hand. however repugnant this may be to some it is better to be as clean as necessary than have unnecessary excrescence adhering to the body.

Elimination: squat position: no stagnation of faecal matter in colon therefore no polyps; IBS; ulcerative colitis; diverticular disease; colon cancer
colitis: no soluble fibre; spices; sugar; caffeine ;fat

G.I tract/digestion/excretion

acid environment: cancer cells have mutated to neutralize trapped metabolic waste; lactic acid; uric acid; urea and ammonia

re: Dr.Leonard Coldwell, "The Only Answer To Cancer"

"the benignity or malignancy of a cancer in fact depends on the capability of tissular reaction of a specific organ expressing itself ultimately in the capability to encyst fungal cells and to prevent them from developing in ever- larger colonies"

MOUTH:

PH=key; acidity(grains/refined sugar/honey/dried seeds/fruits/cooked food/unripe fruit/fluoride/animal products); less chewing=less saliva=increased residue/bacteria=decay;also less water=less saliva=greater acidification plaque caused by acid PH

nutrients needed for health teeth: vit D3; silica; vit.A; magnesium; phosphorous; calcium; flourine; K2; vitamin C; amino acids

bones:i)movement/stress/force/impact/vibration/pressure[increases density; stimulates RBC production/movement via increased metabolism/mechanical pressure

ii)(cf. nutrition) remodels bones

HAIR:

though considered by many self proclaimed 'gurus' as an 'extension of the nervous system' enabling psi power/remote viewing capabilities recommend shaving off/cutting as easier to clean Self. nose hairs: use trimmer

esophagus('food tube'/stomach/G.I tract: amaroli(auto urine therapy-recommend against as possible toxicity); occasional fasting(24-36 hours)

intestines: citrus juice; O2 based cleanser(magnesium oxide powder on empty stomach); clay; activated charcoal; colonic hydrotherapy(back to back enemas no need for 'professional' services)

LIVER:

'liver flush' recommended by prominent 'gurus'(such as Andreas Moritz) is a scam as what is expelled is saponified olive oil and is therefore not recommended

-liver is the major organ of detoxification; detoxifies itself mainly between 2200-0200 hrs mainly when people are encouraged to poison themselves by consumption of alcohol

which is a nerve toxin which destroys every cell it contacts and necessitates the liver attempting to minimize the damage thus neutralizing its detoxification of other poisons

-meals eaten later in the day obstructs optimal detoxification should be prior to 1700 ideally

nutrients for detox:

herbs: dandelion; supplements: MSM; malic acid(from apples); proteins: chlorella; bee pollen; legumes; juice: citrus; raw beet juice/powder

LUNG:

major organ of detox

always nostril breath/belly/'full' breathe

breath holding=tissue saturation with oxygen+blood vessel massage nostril breathing breaks up arteriosclerotic plaque; do pranayama breathing (belly breath) prior to eating cardio facilitates the above+habitual practice which must be consciously learned if not entrained in early life('keep your mouth shut')./swaddling of children(cardio helps for deep breathing)w/ 3rd eye meditation

TESTICLES:

recommend no ejaculation to conserve fluid as related to nervous/brain tissue; consequence of conservation=retention of youth/longevity; greater strength/energy supply,etc.; reabsorption of components into body=no waste of elements tantric yoga (auto or other)

<caveat: benign/malign prostate hyperplasia/hypertrophy/prostate cancer if no ejaculation? minimize to 1x/week maximum>

anus:

bidet attachment/'pot'

shave (to eliminate/minimize residue which generates bacteria) oil (from basti: lubrication of enema bag tip=antimicrobial/germicidal) cf. 'basti/enema section

GENITALS:

exfoliating cloth(scrub)--->oil

AMAROLI/SHIVAMBU/AUTO-URINE THERAPY:

(not recommended as potentially causes infections; also claims to therapeutic value probably exaggerated)

purpose: -'auto-vaccine'; internal microorganisms create antibodies/antigens/antitoxins excreted via urine; reabsorped=vaccine highly specific to own biology and pleomorphism or pathogen/viruses in body

-re-absorption/re-use of nutrients; hormones; enzymes=increase longevity/health through minimizing metabolism

components:

melatonin=anti-aging/calming

-urokinase=vasodilation

urea=anti-viral;(converted into glutamine via ammonia)=increased immunity

-reduces pressure on brain and spinal cord

-anti-carcinogen

-germicidal/antiseptic

-salt: cleanses mucous membranes+laxative; detaches wastes/draws water into intestines; removes surplus sugar from blood; draws toxins from veins

-cortisone

-diuretic: accelerates flow of substances(eg. uric acid) out of body

-cleanses kidneys

-purifies blood stream

-biological transmutation/sympathetic resonance:

urine=liquid hologram containing crystalline vibrations; purpose=healthy body resonance through positive feedback/forward loops; rectifying ailments through this vibrational information=homeostasis/authenticity

shivambu/'waters of shiva'=urine purification/detox/ hormonal nutrient recycling(kriya yoga) see reference section for sources

purification/detox: anti-cancer agents:

dehydroepiandrosterone (a male anabolic hormone); uric acid/urea (antibactericidal):

destroys worms; cleanses gastrointestinal tract; male hormones conducive to antiaging;

DHEA serves as a powerful testosterone booster as deepening of the voice and sensation post consumption confirms as well as increased vitality and energy (this may simply be derived from the uric acid)

-also facilitates perpetuation of life through furnishing substance generated by oneself; recycling of own substance enhances personal resonance can maintain identity over time(DNA/energetic signature reabsorbed)

-protocol prescription (experimentation)

- 1) mouth swish/rinse daily 1st in morning; rub on eyes
- 2) neti(using neti pot or cup or spout pouring in one nostril and out other tilting head to side); cleanses sinus; tear ducts; eustacian tubes of mucous and debris much better than water because of uric acid contained therein. Recommend to finish with water to prevent possible infection <warm distilled:1-2 cups in neti pot--->
- 3)basti(enema):i) purge ii) retention(retain indefinitely to the point of absorption if desiredorexpel30minutes later, cf.'basti'section)
- 4) drink: most important to absorb hormones/nutrients;recommend2x250ml/day

SANITAS(sanitation/cleaning or specific areas of body):

EYES:

- a) sun gaze(to side of sun early morning allowing solar rays to enter into pupil-> activates pineal gland & energizes body/brain
- b) kriya yoga
- c) pinhole glasses(read simultaneously; don't wear glasses as weakens eye muscles=weak eyesight)
- d)-eye problems are typically caused through different shape of eye ball; only wear glasses when essential(driving, etc.)
 - sunglasses: filter out UVB and cause macular damage; sun gazing doesn't but is natural (not recommended however as may cause macular/scleral damage)
 - eye glasses: glass lenses if must be worn as plastic deteriorate over time worsening eyesight especially if 'coated'

EARS:

- a) earplugs:prevent entry of debris;enable/facilitate'inner peace'through shutting out extraneous noises: 'the stinking breath of the mob'

B) regular cooked:

grains/grasses(eg. millet/buckwheat)/tuberous roots: -sugars in above must be dextrinized for optimal assimilability meaning adequate temperature/duration of cooking necessary to convert starches into sugars(dextrinization=dextrose) and adequate liquids(water) must be used

-cooking with water-most efficient as more viscous and substantial liquids impede proper dextrinization although thin vegetable juice broths and low sugar liquids(eg.cabbage juice, etc.) are possibilities

ORGONITE:

For all orgonite recommend using only beeswax; metal powder and crystals as more healthful than synthetic/chemical resin

BED:

place pyramid frame (larger sized) as above around bed with bed placed in center following same proportions as above (giza/pythagorean) materials: iron bed frame; metal solid core door (without window); copper pipe(large enough to surround bed); orgonite pyramids and charge plates; magnets (as above as many as desired and evenly distributed on bed frame and door surface) 1) place door on frame head facing magnetic North slightly elevated; 2) place magnets 'appropriately' as above negative polarity facing up ward for reducing inflammation increasing voltage/negative ions/healing/relaxation; 3) place orgonite mattress pad up to 8" thick on door; 4) place sheets/orgonite blanket on top; 5) encase in faraday cage (eg. silver cloth tent or mosquito screen panel frame)

POSTURE:

'alexander' technique; chiropractic; osteopathy(atlas readjustment)

daily activities: stand for 2 hours minimum ideally 3 (to maintain bone mineral density)

sitting: conventional sitting in a chair with thighs at a 90 degree angle or more acute with torso upright or bent forward is contra-indicated for the following reasons: kinking the femoral artery reduces blood flow and eventually leads to thromboses, strokes and heart attacks which is why office workers are prone to these conditions in 'western' society. In japan standing desks are used and those conditions do not obtain to as great a degree. Second compression of spine through extreme pressure/force generated through itself via the pushing (not pulling) force of gravity emanating from the galactic center (or black sun/ source field). This leads to degeneration of the intervertebral discs and vertebrae over time leading to sciatica, shrinking/reduced height. The pressure generated in such posture is extreme. Also wears down the pelvis

BLOOD/LYMPH:

gravity boots: lymphatic drainage, etc.; yoga technique(legs/arms over heart) blood shunting/milking technique: alternate hand squeezing russian systema spetsnaz blood

shunting/muscle activator technique:

contract all muscles beginning with calves ascending to neck repeatedly to bring blood/oxygen into tissues to awaken in morning

-trampolining=lymphatic drainage especially if arms are lifted overhead intermittently throughout the session

VIBRATION:

handheld massages/standing vibration machines/foot baths transmit vibration through tissues assisting in breaking up adipose tissue/calcium deposits in joints, increasing blood supply to area and increasing muscle electrical activity through localized stimulation of nerves. Facilitates relaxation of tissue that have excessive tone and are overly stimulated/contracted through activating other areas and creating a more balanced electrical activity throughout the region. Given that the physical body is a crystalline transceiver (transmitter/receiver) of electromagnetic fields the vibration (or disturbance of social/energy fields) resonates /radiates throughout the body facilitating its own homeostatic resonance (Aristotle's entelecheia, loosely translated as 'integrity') through feedback loops-the mind/body/spirit self- knowledge/ self-identification of itself through itself.

Musical so has this effect as well as any sound waves(in fact every 'thing' which is registered in consciousness as a 'thing' is vibrational/informational and therefore a meaning conferring alteration of consciousness in and as itself).

caveat: excessive use of vibration generating equipment can cause nerve damage through overstimulation (the 'white hand' people on road crews and miners get through continual vibrational overuse injury). However a briefer session daily or even multiple times per day would not be detrimental reading/studying/work postures: an addition to standing on ground(ideally barefoot on stone/slab or wood/boards/bamboo/hemp mat is to obtain reflexology mat/sandals and stand on this alternating with perhaps slightly comfortable item as above if the sandals are sharper spikes/pointed (eg. reflexology sandals). magnetic insoles or addition of magnets to mat/sandals which increases voltage through feet

reverse: standing: enables greater circulation of blood and increased metabolic rate. This increases energy expenditure and reduced adipose tissue for sedentary people. Also enables shifting of weight which reduces calcification of joints, improved blood circulation and electrical activity/tone of muscle. The notion of varicose veins caused by venous backflow (blood flowing backward and pooling in veins which have one way valves) being caused by standing for prolonged periods is a myth-a result of sedentary life and lack of physical movement. Thus recommended is to spend most of the day standing/ moving while one works.

Equipment: obtain or make(out of wood or metal) a standing desk. If this is excessively difficult at first self may transition from sitting for prolonged periods by alternating with standing periods increasing the latter while decreasing the former over time and or

working in a kneeling position a la japanese kneeling desk. Eventually self develops adequate conditioning to enable self to stand for the requisite period and eliminate deleterious influence of sitting for prolonged periods

CLEANING(internal/external):

UV light; plasma(allegedly stronger degrades environment pollutants spores, bacteria, fungus, chemtrails)

HYLE:[physical]

EXERCISE purpose:

develop the physical body into a light body and efficient soul vehicle to manifest one's destiny

-cultivate its existential modalities and create a harmonious state between itself and the subtle bodies which concretize in its form-amplify awareness; fundamental purpose is attainment of the diamond body within the duties/parameters necessitated by the material world(Midgard) and its circumstances/conditions, ie. the development of willpower to fulfill one's destiny

modalities/faculties:

STRENGTH: i) tissues<--->ii) will(interplay between cultivating both necessary to knit together Midgard and Asgard via intensity of concentration of energy fields and their directedness/focus upon a given modality of employment.)

optimal time: 1500-1900hrs: 1500-1700hrs: power/endurance/muscle(red fibre); 1700-1900hrs; strength(white fibre)(assuming a sleep time of 2100-220 hours)

tao of physical strength:

strengthening physical structures to use/strengthen the will through nerve force development; ' the soul is developed through extreme living'

-physical force/intense emotion(concentrated upon an object)=development of willpower (note to the following: the author recommends only doing weightlifting with mainly cables and light free weights as heavier lifting causes musculo-skeletal damage; joint deterioration and imbalance as well as excessive adrenal hormone secretion and sympathetic nervous system dominance. As aforesaid this causes joint damage; excessive adrenal stimulation and musculoskeletal imbalances over time.

Efficiency is key but within the paradigm of lighter weights (80% 15 repetition maximum) and higher volume (4 sets of 8-15 repetitions for 2-5 exercises 3 times per week).

-a)weightlifting schemata;[musculo-skeletal nervous system total body systems] i) force vector through axial skeleton(spinal column, hip/knee); 'vertical' from sky to earth via bony levers(skeleton) moved around arthroses(joints) via muscles via nervous system via will--->back to will=willpower

specifics: ii) heavy as possible; iii) most basic exercises; iv) least amount of time: " most amount of work; least amount of time": German overload principle/principle of energy economicity: "minimum output maximum productivity/yield"

-common sense principle: "most for the least";v) qualified by physiological ability to generate enough ATP to produce the desired training effect:speed-strength/power(olympic lifting);absolute strength (powerlifting);hypertrophy (bodybuilding)

-type of activity('exercise' type): related to purpose or type of work depending on desired result:

1) nerve force: a) olympic lifting(power: def. speed strength):

exercises: clean and jerk(C&J); snatch; front squat; push press/jerk; step-ups

rep range: 1-3

rest period: 1 minute between sets sets: 8+/exercise/workout

exercises: 2-5/workout=volume(sets x reps x weight; max volume=max nerve force

output= max willpower development; caveat; volume should be proportional to recuperation/rest

cycles: micro/meso/macro(monthly/quarterly/yearly)

-recommend: 30%+ weight/strength training energy(relative to overall temporal structure/ goal: long term progressive strength increases, competition; maintenance---alternating work with adequate rest to create a harmonious state often called 'homeostasis')

-b)absolute strength('powerlifting' style strength/weight-training):

exercises: deadlift (variations); squat (variations); overhead press (variations)

rep range: 3-15; rest period(more= more force output/set-ATP regeneration=max force

output sets: 5-8/exercise; exercises: 2-5/workout; 2 minutes max; 30 seconds preferable as time saving/cardiovascular benefit

cycles as above

strength/endurance/strongman: 'world's strongest man' is a good forum or showcase of this style of training as is wrestling(competitive/olympic)

recommended exercises:

w/barbell: with other implements: logs; barrels; anvils; stones; weight vests; anchors; pull sleds; cars; weighted pull trailers

waiter walks: walk overhead with barbell extended to arms length elbows 'locked out';-take barbell from squat stands/cage to clean position(against collarbones)and jerk overhead or C&J from ground or hang position(hips extend from arms); walk: i)backwards; ii) forwards; iii)back and forth; iv)sideways,etc.

-length and weight selected depend on desired effect, etc.; longer=more balance/proprioceptive development; less intense; less large motor unit recruitment and vice versa with more weight/mass having greater effect on cartilage[stiffness]/bone[density]/increased metabolic rate/myocardial thickness, etc(as with all of the following exercises):

farmer's walk: dbells in each hand; walk around as with waiter walks; bbell on back(caveat: less biomechanically sound, possible spinal damage given forward motion and necessity to flex/bend cervical spine to accomodate bar); barbell in front of thighs (awkward movement)

1-dbell overhead snatch: from hang or ground or clean to get overhead and walk with fully extended); 'instability training'; must do with both hands in different sets to retain symmetry.

static holds: from deadlift-->hang(hold for time);

-from standing press/C&J-->overhead(as with waiter walks)

-squat: different hip/knee angle eg. 45 degree, 90 degree, etc.

the purpose of this in addition to the above is to strengthen tendons and increase joint stiffness as cartilage/joint stiffness is proportional to load; also enables heavier weight to be endured as maximal mass can be utilized

weight vest walks: heavier=less time; vice versa; eg. 0-60 lbs x 45 minutes; 60-100 lbs=10-20 minutes; 3x/week

-notes on 'crossfit' and other trendy exercise modalities:

the notion of combining exercises that rely upon aerobic energy systems (aerobic exercise) with anaerobic energy systems is flawed for the following reasons:

1) to regenerate ATP (adenosine triphosphate-'the energy currency of cells') requires adequate time. Those energy systems utilized in anaerobic exercise (exercise undergone 'without oxygen', ie. anaerobically) confer enough ATP to produce brief and intense neuro-muscular effort up to 30 seconds. ATP requires 30 seconds to regenerate. to continually produce effort ('work') drawing upon ATP reserves beyond this time is impossible as no ATP exists upon which to be drawn. Given that the recourse is to hypersecrete cortisol an adrenal stress hormone that causes catabolism (breaking down) of glycogen (the storage form of glucose in liver and muscle) for energy.

The demand for ATP cannot be met in spite of this meaning that the end result is an excess of adrenal gland metabolism and consequent burn out/exhaustion. Therefore undergoing exercise modalities that require heavy,intense neuro-muscular exertion ('work') beyond a brief intense period (which are properly spoken of as aerobic) cannot be sustained at the same level of intensity ceteris paribus and even at a lower level induce hypercortisolemia and concomitant adrenal fatigue.

The threshold existing between anaerobic (ATP-CP-adenosine triphosphate/creatine phosphate) and aerobic (oxygen/glycogen) energy systems is the turnover point on the

continuum of metabolism that switches necessitates different exercise modalities eg. load-bearing; brief intense neuro-muscular contractions/nerve force output to sustained, enduring, lower level continuous exertion.

Certain muscle fibre types are utilized in each and cannot be 'cross trained' at the levels of intensity prescribed in 'cross fit' training without failure contraction for the above reasons(lack of ATP). Red fibre (slow oxidative) in muscle enables sustained contractions having a greater blood supply thereby drawing upon oxygen in circulating blood to deliver oxygen to muscle fibres for sustained contraction over time; white fibre ('fast fatiguable') having poorer blood supply enables rapid,brief contraction drawing upon ATP-CP localized to contract. The two being distinct can't be 'cross-trained'.

Strongman exercises are similar as they represent an exercise modality of sustained neuro-muscular output with maximal loads. They are thus contra-indicated if adequate rest periods of minimum 30 seconds(to regenerate ATP) are not taken. However the benefits of strength endurance they confer render their inclusion in a routine valuable if undergone for briefer periods per set, or kept to a minimum(eg. walks with weight vests and other more lengthy exercises). The focus of a strength training routine should be on speed and absolute strength relying upon olympic and powerlifting exercises in that order of inclusion. If one's goal is metabolic conditioning/the development of sarcoplasmic hypertrophy (increase of mass in the muscle cell sarcoplasm)/the infusion of blood and lactic acid in the muscle/increase of VO₂ max (lung volume)/endurance, the lower weight/higher rep 'pumper'style of bodybuilding routine below is indicated which can be much easier on the joints utilizing an 8-12 or even up to 15 repetition scheme.

ROUTINE PLANNING/DEVELOPMENT:

Design a routine to be well-rounded, eg. incorporating different modalities of exercise: endurance; strength; agility; etc. monodimensional routines have minimal carry over to real life unless the life is monodimensional(and this could be an undue limitation to the individuals' self-cultivation/expression), ie. they could be selling themselves short).
prescription:

speed strength/skilled movement(1st)

'core movements', ie. those utilizing most lean body mass and requiring most force output-that undergone 1st(eg. speed strength/skilled movements)

(2nd)

strength endurance: preferably kept separate in a distinct training period, preferably with a day of rest separating the two; accessory movements/exercises

(3rd/4th)

-those which rectify deficiencies and supplement the overall capacity of the person (such as trampolining, cardiovascular, balance; coordination; those requiring less intense exertion and those who enable a cool down period, eg. cardio for blood circulation; clearance of hydrogen ions; lactic acid; CO₂ from muscles, etc.)

Beginners--->advanced trainers: number of exercises/sets/weight (eg. 'volume') would vary as would complexity; more volume/complexity with more advanced ceteris paribus not all advanced trainers require complexity, the goal should be economy (most pays off for least investment, eg. Bulgarian olympic lifters.)

Exercises:

Higher skilled movements develop the neuro-muscular coordination and greater central nervous system activation/control of physical body. Basic core exercises that establish strong pillars upon which to build:

Recommendation: all exercises be done barefoot on solid hard ground (stone preferably, though concrete can serve as a substitute). This strengthens the feet as well as more effectively transmits sensation throughout the body enabling increased control & self-awareness.

Press: The goal ('the heights'-getting the bar at arms' length overhead in a lockout position and feeling its weight impinging on Self from above).

reasons: enables balance and dexterity; this facilitates 'handling' through conscious awareness, the obstacles pervading Midgard (mundane life/physical) and inevitable soul development <perfection, there is no evolution not even metaphysically just devolution and perfection> generated through the application of knowledge to human experience, ie. wisdom. The instability of the bar, the juggler's magic act, in balancing it conditions consciousness to gain awareness of that same instability and the duty as an incarnate soul to stabilize it. This is known instantaneously/intuitively through the performance of the act.

Squat:

reason: enables understanding via receptivity to physical 'falling' sensation of squatting down; the movement must be controlled necessitating heightened consciousness to avoid injury/deal with threats to physical body: heightened awareness serves as the doorway through which information enters, opens the tap of information flow; This exercise forces itself upon one being a literal physical burden shouldered; understanding of what one carries is a necessity in the act of carrying: a bag of feathers requires a different response neuro-muscularly/psychobiologically than a load of iron. This is an exercise requiring constant control to avoid the sickle of saturn; a sublimation of the death drive; Self must

drive the feet into the ground in the concentric movement to attain the heights(physically/topographically the 'top position' of the movement). The sinking sensation(death) is understood in the decline(eccentric movement) and must be actively resisted for survival, the continuance of the spirit in the flesh.

caveats:

squats place excessive load on the spine ; hips; and knees and have a poor return for their energetic investment. To actuate the thigh musculature for maximal muscle contractions with squats one must load the joints excessively-hence not recommended. As leg extensions (rectus femoris/vastus medialis and vastus lateralis muscle activation/sartorius-'quadriceps muscles)) and leg curls (semimembranosus and semitendinosus- 'hamstrings'muscles) place minimal load on the joints while conferring the same stimulus to the muscles they are a better alternative.

Deadlift:

reason: activates solar plexus via spinal cord and correlative peripheral nervous system employment. Truck muscular contraction initiates feedback loops that necessitate continual nerve transmission to maintain sustained contraction.

-Body must move as a unit a sun center axis point around which the limbs orient head alignment ,must be symmetrical with body with eyes maintaining centralized focus (on target) which anatomy moves as it were rotationally around this psycho-biological point. Hence it is the middle pillar unifying opposites, left/right side of body. effect: stability; enduring strength; radiation of nervous energy throughout physical body raising the serpent fire to Sol, the sun of mind. Bridges gap between sun (mind/manas/soul) and earth (feet/physical ground).

caveat: places excessive load on lumbar spine and excessive stress on central nervous system, hence overall not the best exercise for back. Rely on hyperextensions for erector spinae and pull-ups/lat-pulldowns and/or standing barbell rows

weight routines:

note: the first below routines are examples for building raw power/strength and are damaging to joints if done consistently over time. hence if to be done at all they should be done only periodically, eg. once every month; 1.5 months or 2

A: minimalist

3x/week; 1-2 exercises/session; 8-10 sets/3-5 reps/30 seconds-1 minute rest/30 minutes-1 hour maximum time

M=deadlifts/rows/T=squats/W=press;press->waiter walks overhead/Th=deadlifts; rows/F=squats/press/S=off/S=off

recommended: deadlift variation: powerlifting; sumo; chinese (chinks);

C&J squat variations: low bar; high bar

press variations: push jerk/push press; standing press; C&J

stepups: utilizing a 16" high(approx knee height+) stable bench 1+' wide and longer than shoulder width place barbell on back and step up on bench with 1 foot then other -->reverse. The some(unilateral) or alternate legs may be emphasized

Minimalist speed-strength routine:

squats(low bar); push press/jerk(2 minutes rest between sets) repeat(high bar; low bar squats)

push press/jerk 5 sets x 5 reps

The above routines are designed to economize time/\$/effort (your energy) while utilizing the following concepts/principles conducive to a state of harmonious well-being in the physical and for performative capacity in most daily routine affairs.

T.U.T (time under tension)/'poliquin' principles of charles poliquin: his repackaging of the "German Overload principle"(most amount of work least amount of time): more time under tension=more volume/intensity/training effect

-goal should be to generate as much 'work'(as defined in physics) for any given time, ideally in the least period. This generates maximal force output recruiting as many motor units/muscle mass/having maximal metabolic/hormetic effect thereby economizing training time and achieving the most beneficial training effect for strength and general conditioning using external objects/load/mass. This applies to most practical applications of strength such as in emergency situations wheres peed-strength(the ability to rapidly generate maximal force output and recruit in minimal time as much motor tissues- eg.muscle,tendons, etc. as possible) is necessary.

For other applications such as strength endurance(the ability to exert maximal force out put through a period of time)the appropriate training modality is necessary to apply in accordance with the principle of specificity, ie. training modality related specifically to a goal where the changes occuring physiologically/anatomically specifically relate to the effortful action, ie. are specifically 'relevant' thereto.

Rest should always be balanced with exertion such that continued exertion can be upheld maintaining or improving upon physical capacity in terms of one's agility, flexibility, strength, endurance, speed, posture, nerve force, etc, The more intense the exertion the more recovery(rest) requires emphasis.

Better resistance training (weight lifting) routines for overall fitness, strength and conditioning:

3 times per week spaced out as evenly as possible (eg. tues/thurs/sat): perform all exercises with 30 seconds-1 minute between sets in sequence: <--->=superset (alternation); --->sequence the heavier the weight the lower the reps and vice versa

day 1: legs: (superset leg curls & leg extensions reversing the order biweekly, eg. leg curls 1st--->leg extensions 2nd and reverse): 4-5 sets of 8-12 repetitions--->calf raises (machine; barbell; dumbell alternating legs from weight plate or block)

day 2: arms+shoulders: (a giant set of antagonistic muscle groups as above: eg. biceps: alternate biceps curls<--->triceps pressdowns--->bent over dumbell lateral raises--->dumbell alternate standing raises= 1 set; do 4-5 of 8-12); omit forearm training as possibly causes carpal tunnel syndrome and reduces fine motor dexterity

day 3: chest+back: 4-5 sets x 8-12 reps (superset antagonistic muscle groups: lying dumbbell flyes/cable crossover--->lat pulldown/barbell rows/pullup(weighted or no)--->hyperextension;

Strength endurance:

'Strongman' style exercise:

the purpose of this exercise modality is to 'endure' throughout muscular exertion over time the performance of a certain exercise. it builds 'endurance' under load/external object although bodyweight can be utilized as in 'static' exercises such as remaining in a certain position while undergoing muscular contractions also called iso-metrics (same measure, the limbs/joint angles neither increasing 'eccentric' nor decreasing 'concentric' during the exercise). This latter was used by Bruce Lee and was popular in the early days of strength training as well as in the military. examples: plank position; '6 inches'; freestanding squat; push up position; leg raises with legs outstretched;a comparatively useless exertion as doesn't utilize normal bodily motion in 'real life'.

'olympic lifting exercises':

snatch/C&J: requires great flexibility and neuro-muscular conditioning/mind/muscle motor unit recruitment pattern development the development of the neuro-muscular' groove through which the exercise is undergone. This requires a longer amount of repetitive training . Also requires proper equipment for best execution: adequately tensile barbell with rotating collars('olympic barbell') lifting platform and shoes with elevated heels preferably made of wood.

purpose: speed strength maximal nerve force generation multiple sets of single movement enables best recovery and minimal delayed onset muscle soreness(D.O.M.S)

'powerlifting exercises':

Deadlift:

simplest, quickest, least amount of equipment most efficacious in body systems training (neuro- muscular): force vector transmitted through axial skeleton and utilizing maximal lean body mass(muscles, cartilage, nervous tissue,bones,connective tissue). No weight belt as it creates a 'weak link', ie. lumbar spine ligaments and lower back as well as trunk musculature ('muscular corset'). This equipment leads to spinal injuries which belt-less lifting prevents. The purpose of weightlifting/strength training is implicit in the name,ie. building strength through weight/mass 'lifting' , eg. exerting muscular force against an

external load resisting the pushing force (not pulling force) of gravity itself emanating from the galactic center <black sun>.

types of deadlift: sumo (wide stance; clean grip shoulder width apart)

ducktoe (toes close together angled outwards 45 degrees; wide grip hands out stretched to limits - can be hard on the knees; hips and low back and cause postural problems. Also called 'chinese deadlifts' or 'chinks'); romanian deadlift (snatch grip: wide as possible; under/overhand)

performance:

position self with barbell over feet in center of bar; take grip position; maintain neutral spine (neither flexion nor extension but normal spine curvature). Let fall to ground. Squeeze bar throughout, hold breath throughout lift. Lift with legs pushing into ground ('through the ground' in the imagination) and maintaining maximal muscular tension (time under tension; more tension = more nerve force = more training effect). Eyes directed towards one spot ('focal point').

squat: (the 'deep knee bend' of yesteryear physical culture)

purpose: similar to deadlift: stimulating/activating as much LBM as possible for the least motion/time expenditure for strengthening body systems (musculo skeletal/nervous/cardiovascular/endocrine/connective tissue, etc.) Adheres to the German overload principle and constitutes one of the fundamental pillars of a strength training regimen.

Typically self starts by stepping under a weighted barbell itself positioned on squat stands/power cage. Stand erect/shoulder across trapezoid muscles (below neck) maintaining fastness in torso with spine in neutral position eyes facing spot parallel to eye level (imagined or actual). A mandala may be affixed to wall to entrain the mind; step back unracking bar maintaining symmetry; squat down in controlled fashion maintaining a bar path (imaginary/actual path bar travels from start to finish) within the same plane in both eccentric (descending) and concentric (ascending) phase of exercise. Rerack; wait 30 seconds - 2 minutes and repeat for desired rep and set parameters. Drive feet into ground when transitioning between phases. Anecdote: Egyptian lifters do this exercise as fast as possible with 1- 1.5x bodyweight. Their goal is speed. This may conflict somewhat with absolute strength development (as in powerlifting). It may better develop the kundalini shaktipat/nerve force as more rapid rate of force development has greater effect in overall nervous system conditioning). Caveat: head must be parallel to neutral spine eyes focused on targeted object (visible or invisible).

Press: (many variants but 'push press' or 'push jerk' is prescribed)

Bar taken from racks/squat stand or 'cleaned' from hang (sometimes from ground but this incorporates erector spinae muscles over much and is best reserved for C&J movement of which this mirrors one of the phases) to clavicles with grip beginning as overhand and hands/arms then positioned under with elbows directed either forward, midway, downwards (180 degree angle from torso), the latter is best. Self then dips down and drives the bar upwards with axial skeleton starting from hip/knee transmitting force to arms which complete the movement overhead supporting bar for time if desired (as in waiter walk, etc.) Eyes are again focused on target and neck thrust forward somewhat as bar clears face preceding it.

Strongman/sustained strength:

(absolute strength; ability to continually exert force output over longer duration with maximum load of external object transmitting force through axial skeleton over most amount of body tissues thereby recruiting maximal motor units/contractile tissue (eg. collagen fibres in cartilage=increased stiffness=stronger joints=less injury=greater integrity of physical body)

exercises: farmers walk; static holds; waiter walks (all with dbells or bbells); sled pulls; implement throws; weight vest walks: i) walk for time; ii) for distance (with max weight)--- external load centered around trunk; force vector transmitted through axial skeleton). 1RM(1 repetition max) lifts: power lifts (deadlift; squat, etc.); possible static movements at certain ranges of the lift; intensity is the goal-- 'most amount of work least amount of time' = maximum force output for an adequate time to achieve desired result
-length of time proportional to weight; heavier=shorter time

note: usage of energy within the scheme of one's life should be harmoniously managed, ie. allocated in such way as to support all the purposes that enable one to attain the diamond body. This might be called 'optimization', ie. the best of all possible good things, accentuating the positive, eliminating the negative to the greatest possible extent.
-This exercise modality should be segregated from Others as builds different capacity; do on separate day if possible
-exercise/workout; 3-6 (3 min minimum); sets: 3-8/exercise; reps=1 cycle: recommendations; 1x/week of training eg. 25% of weight/strength/training

Accessory movements/exercises:

with equipment:

purpose:

general safety/utility in daily life in emergency situations, etc.

i) neck training: a) head harness(extension/flexion-lying or bent over) b) weight plate(extension/flexion on bench) b)weighted helmet

c) spinal twists (with small barbell bar ~15 lbs max or broom handle etc.) a) rotation (standing/seated)

b) side to side (one side up<--->one side down): 20 reps each medium pace; keeping torso; faster pace with lighter weight

iii) chin up/dip bars: over/underhand: wide/medium/narrow grip spacing
purpose: blood circulation; electrical activation of muscles; synovial fluid secretion (joint lubricity); collagen fibre strengthening

iv) trampoline: purpose: motor coordination/balance/proprioception (body position awareness/equilibrium maintenance);lymphatic drainage(raise hands above head extending arms periodically or throughout session); joint strengthening(cartilage stiffness proportional to load therefore impact is desirable for this purpose)
5-6 minutes per day minimum(preferably 2x per day every 8-10 hours)

v) hand exercises: a)baoding balls: i) metal (tungsten carbide steel=heavier; chrome steel=less); ii) stone (different weights; resonances; eg. nephite jade; haematite; schorl different influence on body/mind/spirit) iii) bells(inside)=greater dexterity developed to avoid tinkling (develop 'gypsy touch')

vi) spring squeezers (hands):a) 'oldtime (multispring rectangular frame);b) 1spring'v-type' <hurts wrists>; c) eagle claw-type (widegrip)

vii) pinch pins with weight attachments;vi) pinch weight plates,etc.; hold for time; use select fingers to develop specific muscles etc.

NON-IMPLEMENT TAO of PHYSICAL STRENGTH:

static exercise: maintains/sustained conscious control over physical body: static squats; pushups(dynamic/static: strengthens/bones/joints//wrists); 'jumps'('plyometrics'); 'dynamic tension' exercises(sustain musculature contraction in various limbs)

dynamic: walk on tiptoes; balls of feet(widdershins/clockwise/back and forth/outside of feet- inversion/eversion); acrobatics/gymnastics

-internal organs; skin; eyes; energy centers; gums; teeth,etc.(see appropriate sections).

CARDIO:

large muscle group (eg.thighs/legs; shoulders/arms/chest) continuous movement repetitive
% of heart rate maximum(HRM): 45%+

purpose: greater than normal respiration (inspiration--breath in; expiration--breath out) is achieved; that blood is circulated at a more rapid pace; that heart rate increases/blood temperature increases/perspiration occurs(secretory toxins)/gas exchange(CO₂/O₂) occurs at a more rapid rate and greater volume thereby oxygenating tissues and clearing away waste/secrete synovial fluid in joints/ increase electrical activity in muscles/ oxidization of adipose tissue(eg. fat loss). The above enables the purification of the physical vehicle and enables greater concentration; metabolic efficiency; detoxification/clearance/elimination of wastes(via sweat/water vapor/CO₂/H⁺[hydrogenions] exhalation]

recommendation: 30 minute session 5x/week minimum with the same amount of regular walking daily if living a sedentary lifestyle; 1 day of rest/week maximum

modalities:

with equipment; elliptical (upper/lower body=increased metabolic boost/physical capacity); recumbent cycle (easier on spine/perineum than cycling); stationary cycle (less so and can also cause testicular cancer and impotence through crushing the blood vessels in the perineum shutting off blood supply to the genitals; also wears down the perineum); stair climber; treadmill (running); bicycle (racing bike=faster); rowing machines (not as continuous/rapid paced;/too much muscular tension/ resistance to enable more rapid movement without undue strain)

without equipment: brisk walking; running (hard on joints;if at all recommend barefoot on dew,grass under sun) time: morning in fasted state between 0600-0900 or when convenient according to schedule/purpose of individual

-sweating profusely and continually should one of the main goals(eg. of detox).

ZARYADKA (joint mobilization exercise):

This is similar to tai chi/qigong and is derived from a ukrainian surgeon Nikolai Amasov. all movements ~30+reps following one another ad sequentia (in sequence) without break;

approximate time: 15-20 minutes

Intend to go as fast as movements can be performed without undue strain.

Purpose: secretion of synovial fluid/increase muscular electrical activity/blood circulation/lymphatic fluid circulation/prevention of joint calcification/development of corresponding movement patterns: stand throughout

- 19) knee extension to front: right--- \rightarrow left;
- 20) (bent over) mule kicks: right--- \rightarrow left;

DARK SIDE OF STRENGTH TRAINING:

The light side is what accords with cosmic/natural law, ie. harmony (attunement with the
sum total); Dark side is the inverse, namely ego-driven vanity and self-absorption. The

credo of the modern age: 'demon et deus inversus', the degeneration/materialization of culture including physical culture: from productive strength development and 'being all you can be' in accordance with your True Will to self-genuflexion, status seeking and superficiality: 'max. muscle/min.fat'; capped teeth; tanned skin; 'bigger, stronger, faster': qui bono? For what purpose and why? How long, how sustainable in terms of achieving the diamond body and the surrounding environment (mental/physical/social/natural)? The image of the steroidal bodybuilder gorging himself every 2-3 hours, injecting cycles of synthetic hormones; consuming fat loss drugs; spray tan on the skin, etc. Contrast this with any healthy/strong person from 100+ years ago--who lived longer/better? why? The former bears no resemblance to the latter spiritually or materially. The mass monster bodybuilder is the embodiment of beast consciousness (Titan), the classical olympian the embodiment of the consciousness of the gods.

Commentary on team sports:

benefits: creation of hive mind/ubermensch/collective consciousness; rule-based activity; subordinates individual to collective; merges individual with collective; creates followers/creates leaders; physical talent and its expression restricted to adherence to rules and apparently trivial purpose (eg. throwing implements in hoops/holes/nets, etc.)
detriments: all the above when used for a negative purpose cultivation of physical capacity should work towards attaining the diamond body

MARTIAL ARTS: "Arts of War":

purpose: self-discipline [cultivation of willpower; strength; agility; physical capacity directed towards self-defence and other-defence; Love under Will [ie. True Will]]

style: given that society now (assuming temporal linearity) is not a society from 15th century Japan or 8th century China or India or Ireland or Germany etc. it behooves the aspirant to adopt a martial arts style or styles that accord with the present aeon and all of the conditions relevant thereto. This the individual must decide.

recommendations: arts which are meta-physical as well as physical: which condition/develop the will and energy bodies as well as versatile applicable skill sets to street level practice/emergency circumstances: ninjutsu; kung fu (dim mak and other variants/boxing/kickboxing/pancrase).

emphasis should be on developing the martial elements of consciousness, invoking martial energies to subjugate physical threats qua threats a.s.a.p. brief contact if any and only if necessary and to the extent of its necessity. "Deadly force to combat deadly force"-the extreme of natural law principle of counter-violence. cf. law enforcement force continuum charts

practicality: brief contact=striking martial arts
(ninjutsu/kungfu/boxing/kickboxing/pancrase); centrifugal force based
(aikido/judo/hapkido); uses opponents force; joint locks (jiu-jitsu);
weapons: knife; baton; cane most encounters are brief

advice: carry weapons on hand at all times; use only as above indicated (eg. self-defense in accordance with natural law against violence initiated by others) or to combat deadly enemies

note: positive law [the law of the state] is not Moral/Natural/Cosmic/Divine law
-disregard all laws when beneficial to your higher purposes; the right of self-preservation supercedes all others; the state and its agents are not 'god'
-the individual is sovereign and can develop his own capacity--no martial arts 'guru' is necessary
Be your own protector and defender

JOINTS:

Heavy impact forces(eg. olympic lifting)

cartilages of joints subjected to regular impulsive loading with relatively high contact stresses is mechanically much stiffer and better adapted to withstand exceptional loading

lower load=softer cartilage

load is proportional to stiffness of cartilage

cartilage heavily loaded infrequently softens due to decrease in proteoglycan production, the collagen network loses its cohesion and the cartilage deteriorates

caveat: excess force damages joints. Thus one must optimize load to optimize joint health

FRUCTOSE:

Doesn't suppress ghrelin=no satiety

30% fructose load=fat; hepatotoxin; metabolic syndrome(obesity; type2 diabetes; lipid problems; hypertension; cardiovascular disease); increases very low density

lipoproteins=heart attack;

<fructose not fruit; soluble fibre seems to buffer the effect/influence of fructose. This is debatable>

"How to Get Anyone to do Anything and Never Feel Helpless Again",

Dr. David J. Lieberman, Ph.D.

COFFEE ENEMAS:

purpose: blood/liver detoxification

what/means: increases activity of glutathione-s-transferase (GST) an antioxidant

synthesized in the liver which: solubilizes free radicals and detoxifies carcinogens, clearing them from the blood. Caffeine stimulates bile production in the gall bladder and dilates the

bile ducts. Kahweol and cafestol (compounds in caffeine) stimulate GST, green coffee ('yigacheffe') 2x effect. Roasted coffee=600% liver GST; 700% small intestine GST. Eases pain. Blood circulates through the liver every 3 minutes clearing toxins; activates kundalini

caveat: as above said causes: potential insulin shock; hypercortisolemia; caffeine addiction; sepsis/septic shock; adrenal fatigue; sympathetic nervous system burnout, etc.

MSM:

(methylsulfonylmethane)=sulphur purpose:

repair/building: joints; cartilage; hair; skin; nails; connective tissue; muscle

-supports energy production in body

-formation of blood protein/amino acids

-analgesic/anti-inflammatory

-inhibits muscle spasm/increases blood flow

-enables proper absorption of blood sugar and insulin

-increases permeability of cell membranes for nutrient/O2 delivery

-cellular detoxification(+liver sinusoids)

-balances ph of bloodstream and tissues of body

-reverse: degenerative, rheumatoid arthritis; fibromyalgia

-reduces inflammation

-facilitates collagen synthesis

best source is eggs and meat (sulphur) as well as garlic cloves boiled for 20 minutes

electromagnetic mind control:

how to block it:

emf shielding(aluminum/metal); faraday cage; silver particle clothing; metal foil hats, etc.;

change the frequency; meditation/auto-hypnosis trance induction

sources of EMF mind control: HAARP; GWEN cell towers; microwave phone,

microwave/directed energy weapons (D.E.Ws) etc.:

these technologies alter brain wave frequencies and induce DNA modification/expression through alteration of the electromagnetic spectrum/astral light

concrete reduces EMFs by 50%

see "Targeted Individuals Handbook: Combating Gangstalking and Directed Energy Weapons" for an expose on how to defend oneself and others

CANCER:

no disease can survive in an alkaline environment
increase cooked greens; alkalizing; chlorophyll (gives body O₂)

DEW PLATES:

glass plates on grass overnight=dew-->drink

OXYGEN:

When cell denied 60% of Oxygen required=cancerous-->when occurs cells go from aerobic to anaerobic metabolism; cells survive via fermentation of glucose
free-radical=good; (singlet molecule of oxygen); cause of free radical damage=lack of oxygen singlets

NEGATIVE IONS:

stand on earth

-'grounding mat'(from earth); footbaths (epsom/salt)
coffee/tea(caffeine)=decreased myoinositol=diabetic neuropathy

collagen/connective tissues; conducts energy and transforms it into different information;a communication system (brain and spinal cord too)

pratyahara/dharana (control of thought):eg.backwards reading

fasting increases metabolic rate=decreased physiological aging (caveat: increases stress hormone release and muscle wasting; therefore not recommended)

fasting=gallstones: bile concentrates-->eat fat=gallbladder empties; frequent eating stimulates gallbladder emptying; increased cortisol=increased estrogen/insulin=increased visceral fat high meat/fat/low fibre=increased estrogen (colonic dysbiosis);

-fibre=lower estrogen; lignans (woody fibres, eg flax)=lower estrogen lower fat=lower estrogen; dairy=increases estrogen

muscle: calories=muscle (especially carbs=increase insulin)

muscle growth: ca+(calcium) sustains skeletal mass; zinc (generates skeletal/myotissue; iron=expansion of red cells)

-fructose inhibits glycogenesis->stores as liver glycogen=fat

EYES:

'bates method'; increase vitamins(especially retinol/vit A/C; cataracts(opaque areas in eyes=low carotene and anti-O₂; zinc deficiency=macular degeneration; use pinhole glasses; "Strengthening the Eyes",Bernarr A. MacFadden

HEARING:

saturated fat creates hearing problems; blood cells membrane too stiff can't circulate and nourish cells
fatty diet decreases liver efficiency

SOAP:

glycerine soap dries out skin(pulls moisture from inside); animal fat soap: dry/corrode skin;
sodium laureth sulphate=hair loss; sodium based=dry skin; use 100% olive oil soap or natural alternative

CHLORINE(trihalomethanes)=colon/kidney/bladder cancer

BONE:

osteoarthritis= lack of water; too much pro inflammatory food; salt; diuretic; meat/dairy
reduce: phosphorous (excess=calcium deficiency); fluoride; excess sugar, salt (=mineral excretion; nightshades=arthritis

-insulin secretion proportional to fat generation=cravings/weakness; also proportional to hormone sensitive lipase

-akrasia=weakness of will

DIABETES:

Refined starch causes cell damage and cancer (too great exposure to insulin) protein consumption is proportional to insulin need (to synthesize); therefore excess protein=insulin resistance=type2 diabetes; 'diseases' which are really diabetes: heart disease; cancer; arthritis; MS; alzheimers; parkinson's; dementia

causes: sugar(refined/excess starch); protein(protein fibre in basal membranes of blood capillaries) type 1 diabetes:

signs: frequent urination(nocturnal); extreme thirst+dry mouth; weight loss; excess hunger

cause: destruction of pancreatic beta cells

type2(meat)/insulin resistance

cells=glucose deprived=diabetic ketoacidosis (when body breaks down fat for energy)

appetite=blood glucose incompletely metabolized
-fat metabolism=hyper- acidity

hypoglycemia: sugar level drops

symptoms: insatiable hunger; chronic fatigue; brain nourished exclusively by glucose and oxygen
diabetes: liver unable to remove glucose

hypoglycemic: islets of langerhans overproduce insulin (cause: stimulating food; sugar; stress)
caffeine: causes liver/pancreas to release glycogen=increased insulin

high protein=hypoglycemia: uric acid (waste product of protein metabolism) is related to caffeine (both of the purine family)

RAW FOOD:

vegetables--->stomach bloat(hard to breakdown=metabolic stress=aging)

-deterioration of joints/artries

-exhausted digestive system->can't break down fibre->bacteria attempt to=fermentation
green juice=toxins(indigestible)

-why initial energy on raw foods: mobilization of immune system to counteract enzyme inhibitors and food antibodies/alkaloids

DISEASE(definition):

Fermentation and decay process of body substance or of surplus and unnatural food material which in course of time has accumulated especially in the digestive organs and which makes its appearance in the form of mucous excretion[chemical decomposition of cellular albumin, ie.protein]

grey hair=gas accumulation(sulphur)

-symptoms of aging are latent disease(clogging up/accumulation of mucous)

-leukocytes(white blood cells/corpuscles=mucous incompletely metabolized food is mucous inducing

SEXUAL STRATEGY:

Tantra

biological transmutation of germ plasm into grey matter and bioenergy via avoidance of emission(ejaculation). Cultivate the diamond body through eliminating waste but retaining bioenergy(same material as brain tissue=semen): "to cerebrate the semen and inseminate the cerebrum/brain"; fundamental technique of longevity and virility cultivation.

Eros technique(solo or partner): stimulate to the point of no return; consciously control retention; black out(wushin/non-thought) & work the energy upward along the spinal cord/mentally through will power; correlates energy centres/chakras; wait necessary time and continue in cycles.

Caveat: "God is love devoid of the ape-like nature"-Jorg lanz von Leibenfels quoting John 4:16 in 'Theozoology: The Sodomite Apelings and the Divine Electron'

celibacy over profligacy; sex magick over bestial coupling; no ejaculation outside of conception:"inseminate the cerebrum, cerebrate the semen"-->Midgard to Asgard; 1x biweekly ejaculation maximum

'NoFAP'[no porn because causes excessive dopamine spikes as a supranormal stimulus which later lowers dopamine levels causing addiction to return levels to normal to avoid depression(decreased dopamine) in a negative feedback loop; this leads to arousal addiction which leads to dysfunctional brain stress circuits which leads to reduction in normal arousal & erectile dysfunction; impulse control; lowered prefrontal cortical activity & grey matter in this regions (hypofrontality); increases social anxiety(loss of normal contact);suicidal ideation via depression]; minimal masturbation for above reasons as well as a decrease in drive and testosterone levels

CANCER:

If body toxins exceed filtration capacity

(via_liver/kidney/lymph/skin/lung)=deposits=cyst/moles/tumors/cataract/arteriosclerotic/arthritis/rheumatism/ cancer=stored in weak places

protein metabolism->pancreas(clogs pancreas)=reduced digestive function=reduced pancreatic enzymes=increased protein metabolic waste=liver congestion; therefore no/less breakdown in protein metabolism=no/less cancer

protein consumption increases=60%Oxygen reduction:Oxygen blood reduction=Oxygen starvation=mutation/cancer

cancer recipe:

- 1) alkalizing diet
- 2) detox program
- 3) eliminate causes of cancer
- 4) exfoliation of skin

perpetual youth: warm climate at high altitude; non-polluted; alchemical pathworking
-cooking meat generates fumes=polycyclic aromatic hydrocarbons=cancer

Diet comparison: vegan fasting diets (not long term as leads to degeneration of myelin sheath in brain and all bodily tissues through lack of assimilable essential amino acids and cholesterol from animal products)

fruitarian:(pros): {+}digestion/energy/cleansing/alkalizing/prepare time/stool volume; {~}energy?<fructose not as efficient as glucose>; ripening; teeth decay; limited/inadequate amino acids

starch-based diets:{+}storage time/shelf life; energy; <glucose?>; cheaper; {~}energy; digestion; sluggish; bloated; mucogenic/congestion; increase prep time; increase stool volume; decrease nutrients; limited

criticism of animal products:

meat=carcinogenic(diseased animals); iron=excess oxidation; acid load=muscle loss; autoimmunity; excess fat=diabetes; arachidonic acid=meat; meat phosphorous acids are buffered by bone calcium and magnesium; increases White blood cell reaction (a claim some make though bone is comprised in part of phosphorous)

-pine nuts=complete protein

-turmeric=disorganizes chromosomes

-cooked starch=hypertrophied pancreas(overuse/insulin)

-smoking=arteriosclerotic plaque formation

-fat+protein=artherosclerosis/lipotoxemia (a dubious claim indeed)

-vaccines:avoid completely using religious ground for exemption: no foreign matter of any animal into bloodstream

-meditation strengthens pre-frontal cortex

-tongue 'thrush'(white stuff)=candida overgrowth=immune compromised(tongue is the top of the G.I tract)

EARWAX ELIMINATION:

fill glass container with pure water(submerge in pot with heated/hot water to warm or use warmer element to approx body temperature)--->take dropper with hydrogen peroxide---->lie on side for 10-15 minutes placing hydrogen peroxide in ear--->go to sink with head tilted--->flush ear with warm water repeatedly until cup is used up---> repeat with other ear
