Abstract

A brief list of 34 government patents are provided on inventions achieving some form of mind control. This list is just an introduction – there are hundreds more that are referenced from this initial list, and that can be found on google patent search, or on the US Patent Office (USPO) website. What is not included in this list, are thousands of patents that have been issued, but were hidden for “national security” issues. The Federation of Scientists has a recent tally of more than 5,135 patents that are subject to a secrecy order in the United States. Some of the patents on this list were issued under the CIA's MK-Ultra project. This secret program performed grisly electroshock and torture methods on hundreds of unsuspecting CIA victims from the 1950's to 1970's. A lawsuit was filed in Canada representing some of the victims, and the CIA admitted the program's existence. One victim of Dr Ewen Cameron's grisly treatment was deliberately overdosed with insulin and placed into a coma for 21 days, where they severely electroshocked him many times – erasing his conscious memory. He didn't know his name, his family, or anything about himself. Then repetitive messages were used, over hundreds of hours, to “reprogram” his personality. Dr Cameron even bragged that he could turn an ordinary person into a vicious serial killer, using these methods. This is the Manchurian Candidate method that was described in the book of the same title. There is evidence that this CIA program continues today, under a different name, in spite of Congressional orders to shut it down. The CIA continues to fund research and pursue political targets using mind control. One possible recent example, is when Russian leader Putin, recently dismissed 18 senior military generals – this may have occurred because these Generals had been compromised by subliminal targeting. This is a new technology that targets people while sleeping and employs specific frequencies (about 3900 MHz) and techniques using geostationary satellites. A number of recent government whistleblowers have described this new technology, and its ability to elicit specific statements and responses from targeted persons. Although it cannot be called complete mind control, these subliminal messaging systems apparently have the ability to force specific statements from someone, without physically touching them, and this is a disturbing development. This may explain why Putin fired many of his senior Generals. This material is relevant to Targeted Individuals.

Introduction

The CIA became interested in mind control when soldiers returning from the Korean War, had

been brainwashed by their captors into praising communism and communist leaders. The CIA began an illegal program called MK-Ultra (MK stands for Mind Kontrol in German). This grisly electroshock program used innocent civilians as part of the research into mind control.

A brief list of 34 government patents are provided on inventions achieving some form of subliminal mind control. This list is just an introduction – there are hundreds more that are referenced from this initial list, and that can be found on google patent search, or on the US Patent Office (USPO) website. What is not included in this list, are thousands of patents that have been issued, but were hidden for “national security” issues. The Federation of Scientists has a recent tally of more than 5,000 patents that are subject to a secrecy order in the United States.

https://fas.org/blogs/secrecy/2010/10/invention_secrecy_2010/

According to the Federation of American Scientists, there were 5,135 inventions that were under secrecy orders at the end of Fiscal Year 2010, per the U.S. Patent and Trademark Office. The Invention Secrecy Act of 1951 restricts distribution of new patent applications on inventions, subject to secrecy orders, if government agencies believe that disclosure would be “detrimental to the national security.”

Some of the patents on this list were issued under the CIA's MK-Ultra project. This was a secret program that performed grisly electroshock and torture methods on hundreds of unsuspecting people from the 1950's to 1970's. Dr Ewen Cameron was one of the recipients of large CIA grants for his research in Canada. Many people became the victims of these disturbing experiments. A lawsuit was filed in Canada representing some of the victims, and the CIA admitted the program's existence. One victim of Dr Ewen Cameron's treatment was deliberately overdosed with insulin and placed into a coma for 21 days, where they severely electroshocked him many times, and then used repetitive messages, over hundreds of hours, to “reprogram” his personality. Dr Cameron even bragged that he could turn an ordinary person into a vicious serial killer, using these methods. This is the Manchurian Candidate method that was described in the book of the same title. There is evidence that this CIA program continues today, under a different name, in spite of Congressional orders to shut it down.

Canadians' lawsuit in CIA brainwashing to begin this week

WASHINGTON (CP) — A courtroom battle opens Tuesday that will pit the CIA against eight Canadians who say they were unwitting human guinea pigs in brainwashing experiments that left them impaired for life.

The trial in U.S. District Court, is expected to last several weeks and produce mountains of conflicting testimony on a core question: Were the Canadians victims of "reckless" and "negligent" behavior by the Central Intelligence Agency?

Or were they patients of a well-meaning psychiatrist whose work fell within acceptable medical standards at the time and happened to be partially paid for by the CIA?

The Canadians are suing for \$1 million U.S. each, on grounds they were patients at the Allan Memorial Institute in Montreal during a 1957-60 period in which the CIA secretly financed psychiatric experiments by Dr. Ewen Cameron as part of a program to collect information on military brainwashing

knowledge that Cameron's work was also supported by the Canadian government in the 1950s and early 1960s, something the CIA cites in its defence as evidence the

The Brunkan Patent # 4877027, and Stocklin Patent # 4858612 are discussed below.

The CIA continues to fund research and pursue political targets using mind control. One possible example, is when Russian leader Putin, recently dismissed about 18 senior military generals – this may have occurred because these Generals had been compromised by subliminal targeting. This is a new technology that targets people while sleeping and employs specific frequencies and techniques using geostationary satellites. A number of recent government whistleblowers have described this new technology, and its ability to elicit specific statements and responses from targeted persons. Although it cannot be called complete mind control, these subliminal messaging systems apparently have the ability to force specific statements from someone, without physically touching them, and this is a disturbing development. This may explain why Putin fired many of his senior Generals.

Seth has previously stated that one of the best protections against subliminal messages of any kind, is repeatedly stating, “I will only react to constructive suggestions.” Repeated at bedtime is the optimal time to do this.

Specific Examples Using Technology for Subliminal programming:

http://www.bibliotecapleyades.net/scalar_tech/esp_scalartech08.htm

The Brunkan Patent # 4877027

"Hearing system" is a device capable of verbal microwave hearing. The invention converts speech for remote introduction into the head by parabolic antenna with indication of direct microwave influence on neural activity. The microwave spectrum granted is broad: 100-10,000 MHz (0.1-10 GHz.) Pulse characteristics are essential to perception. Bursts of narrowly grouped, evenly spaced pulses determine sound intensity by their amount per unit time. Although a wide spectrum is patented, with ranges of pulse and burst duration, preferred operation has burst duration at 2 microseconds, and pulse duration at 100 nanoseconds. Operation is at 1000 MHz, which is the frequency of optimal tissue penetration. Another patent application based on microwave bursts is "designed in such a way that the burst frequencies are at least virtually equal to the sound frequencies of the sounds picked up by the microphone," though the transducer here is not remote."

Stocklin Patent # 4858612

"Hearing device" affirms the microwave hearing effect. Stocklin gives exposition to the concept that a microwave component is part of neurophysiology and electroencephalogram (EEG) potentials. Microwaves are considered both emitted and absorbed by nerve cell membrane proteins. Microwaves generally excite the brain perhaps by influencing calcium, a central ion in nerve firing.

Stocklin represents the auditory cortex as normally producing microwave energy, which the device simulates, thus eliciting sound sensation. Each acoustic tone is weighted for several microwave frequencies by a formula called the mode matrix, which is used to calculate best perception requirements.

Observation of EEG desynchronization, delta waves, and brain wave amplitudes helps calibrate the device. The lowest frequency for hearing is estimated by the cephalic index. Microwave speech transmission in this patent is unremote with the antenna over and sized for the auditory cortex. Other patents have non-remote transducers of radiowave elicited hearing."

MICROWAVE HEARING

Allan Frey was the first American to publish on the microwave hearing effect was in 1962, yet radar technicians had hints of microwave perception in World War II. Deaf subjects, even with earplugs, can hear appropriately pulsed microwaves up to thousands of feet from the transceiver. At power levels above those producing the effect, resulted in a severe buffeting of the head with dizziness and nausea, while power levels below the effect make a pins and needles sensation.

An Army Mobility Equipment Research and Development Command report affirms microwave

speech transmission with applications of "camouflage, decoy, and deception operations."

"One decoy and deception concept presently being considered is to remotely create noise in the heads of personnel by exposing them to low power, pulsed microwaves... By proper choice of pulse characteristics, intelligible speech may be created" quotes the report.

Dr Nick Begich

Dr Nick Begich recently demonstrated the simple ability to project sound into a targeted person's head. Former Governor Jesse Ventura was given the demonstration, where music appeared in his head that no one else could hear.

Ventura speaks with Dr. **Nick Begich** who has been researching H.A.A.R.P., another directed energy weapon capable of beaming multi-billion-watt radio frequency signals directly into the ionosphere, for many years. While the entire segment is vastly informative, for the point relevant to Alexis' claim, skip ahead to about **4:21**.

Dr. Begich demonstrates a crude device fashioned after H.A.A.R.P. on Jesse, making the former Governor hear music **inside his head**.

DoD 5240 is a Department of Defense manual that details what research and experimentation can be performed on military and civilians. While it seems to be written to protect persons, a careful reading makes it clear that the “exceptions” were the true reason for this document.

(2) Individuals or organizations that perform commercial services, provide products, or perform other services without professional recognition or publication privileges.

Figure 8. Exceptions in DoD 5240

This instruction does not apply to:

1. Activities that do not qualify as research or activities that do not involve human subjects as defined in reference (b) and as determined by IRB Chairs, IRB Vice Chairs, designated IRB administrators, or designated officials of the HRPP. Investigators shall not make this determination.
2. Individuals or organizations that perform commercial services, provide products, or perform other services without professional recognition or publication privileges.

Consider how broad and easy it is to get around the protections that this document should provide during testing of any person. "If it does not qualify as research" - means if it can be called "torture" - then it is not research. If the committee Chair or Vice Chair says it does not apply - then it doesn't. Simple.

Can you imagine a situation where your Constitutional rights only apply unless some committee person suddenly says - "It doesn't apply anymore."?

Any outside commercial organization means - any company doing work for the government under a security clearance - does not have to follow these rules!!

This document is basically a military authorization to promote and allow torture and experimentation, in violation of a person's Constitutional Rights. Think about that - a military document that basically says, we don't have any rules for protecting individuals (and don't intend to), as long as it falls under these categories.

From a military magazine:

(it is) ... possible to create high fidelity speech in the human body, raising the possibility of covert suggestion and psychological direction... Thus, it may be possible to "talk" to selected adversaries in a fashion that would be most disturbing to them.

Bioeffects of Selected Nonlethal Weapons(fn 1)

This addendum to the Nonlethal Technologies--Worldwide (NGIC-1147-101-98) study addresses in summary, some of the most often asked questions of nonlethal weapons technology, the physiological responses observed in clinical settings of the biophysical coupling and susceptibility of personnel to nonlethal effects weapons. These results identify and validate some aspects of maturing nonlethal technologies that may likely be encountered or used as nonlethal effectors in the future including:

- Laser and other light phenomena.
- Radiofrequency directed energy.
- Aural bioeffects.

While the FOIA request is dated 2006, the paper itself says February 1998, **over 15 years ago**. One of the main topics regards the effects of “**radiofrequency directed energy**”. The document discusses the ‘incapacitating effect’ of ‘microwave hearing’:

Figure 8. The “incapacitating effect” of microwave hearing.

Ted Gunderson - (quoted from the following:)

<http://thecontrail.com/forum/topics/ted-gunderson-a-man-to-remember>

“Ted Gunderson conducted seminars with Brice Taylor, a healed survivor of MKULTRA trauma-based mind control, who went public. She wrote the book: Thanks for the Memories: The Memoirs of Bob Hope’s and Henry Kissinger’s Mind-Controlled Slave. In it, Taylor documents the process used to create artificially-induced Multiple Personality Disorder, also called Dissociative Identity Disorder. This trauma-based conditioning technique can produce many discrete “personalities” inside a single person.

These personalities can then be programmed, somewhat like a computer, to perform specific tasks, as either sex slave-prostitutes, couriers, or “mind-files,” accessible only to the person who knows the special “codes” that will access the “program.” Gunderson also interviewed MKULTRA victim Paul Bonacci. Former victims Cathy O’Brien and Arizona Wilder have also shared their experiences. In the interview with Brice Taylor, Gunderson also spoke with Gene Tatum, who during his twenty-two years as a deep cover CIA and DIA operative, participated

in a remarkable series of covert operations including narcotic smuggling to assassinations.

Gunderson worked tirelessly to expose the sexual and satanic ritual abuse of children by the global elite. He was instrumental in exposing the Franklin Cover-Up, involving government drug smuggling, money laundering, child kidnapping and recruiting boys from orphanages in the Midwest for sex with U.S. Congressmen.”

Conclusions

So we have provided an introduction to research on mind control, because many people are unaware of the level of technology at the CIA and other agencies. Readers are encouraged to research these ideas and form their own opinions.

This document is a living document. The author reserves the right to make corrections and changes.

Readers are advised to review the website drjudywood.com which provides compelling evidence about 9-11. Dr Judy Wood and Dr Morgan Reynolds, university professors, filed lawsuits against the US Government for fraud and conspiracy about 9-11. Dr Woods scientific presentation is available at youtube. Readers are also advised to see the movie "Sirius" by Dr Steven Greer, M.D. It is available for free on Netflix, where it is the #1 documentary, and to watch the youtube videos by the Honorable Paul Hellyer, former Canadian Minister of Defense. He has a book titled, "The Money Mafia."

Also, find my brief educational videos on youtube (Some have been blocked from the search engines).

For more than 4 years, this author has been stalked, harassed, and threatened by US Government agents from the CIA, FBI, and NSA - because of the content of these ebooks. My home has been broken into, repeatedly. In May 2014, my girlfriend was drugged and kidnapped from LaGuardia airport. This is not a joke. My computer, phone, and alarm system have been hacked, including those of my friends and family. It is truly sad and pathetic, these agencies have become criminal organizations. If something happens to me (disappearance, false criminal charges, sudden accident, etc. - my readers can be certain that the FBI and CIA were involved. In my opinion, the Council on Foreign Relations (CFR) is behind these criminal acts. David Rockefeller has been the CEO and Chairman for many years.

JFK Jr. carried a piece in his "George Magazine" in March of 1997 exploring the evidence that Israeli Prime Minister Yitzhak Rabin was assassinated in 1995 by a conspiracy, not a lone nut. Powerful factions feared that this was a prelude to JFK Jr. raising questions about his own Father's assassination. JFK Jr.'s plane went down in 1999, amidst sharply conflicting reports on the facts and circumstances surrounding that crash.

In Shakespeare's "Hamlet", first published in 1603, King Hamlet seemingly dies in his sleep, but his son discovers he was given a dose of poison in his ear.

And, information that seems much stranger than fiction is covered in books and videos such as "Targeted Individuals" by Richard Lighthouse. This book describes modern-day sophisticated attacks against individuals which experts say can cause heart failure and other fatal or debilitating results. Lighthouse bases his book on information and testimony from such investigators as Dr. Barrie Trower, retired British military scientist, author Dr. John Hall M.D., and Oxford-educated scientist, Dr. Katherine Horton, among others. NSA whistleblowers William Binney and Kirk Weibe recently announced their support for "Targeted Individuals."

In other words, there are more ways to hurt or kill a President or political leader than by a bullet.

So, let me address the dark side of the relevant intelligence agencies, whose names may be known to the public, or unknown: if anyone takes a shot at President Trump, NO ONE is going to believe it is a lone nut this time. And any other type of sudden death or extreme illness visited upon President Trump during his term or terms will NOT be viewed as a natural phenomenon by hundreds of millions in America and around the world, including myself.

In a few days, you are about to be the only President since John Kennedy to call out the CIA publicly. JFK fired CIA Director Allen Dulles the day after the Bay of Pigs disaster, vowing to smash the CIA into 1000 pieces. (The CIA was only 14 years old at that point, having been started in 1947.) Millions of Americans are discussing on the internet and face to face that they fear for your life because you are publicly clashing with the current CIA Director and other elements in the intelligence agencies. Put your own people in control of these agencies as quickly as possible.

Perhaps it would be a deterrent to any contemplating such nefarious action if a new, independent investigative agency under the President was instituted for immediately investigating any attempted attacks on the President. It would be known that such an agency would be spring-loaded to look past any planted evidence and contrived "official cover story" - and find out what really happened.

2. Reshaping the Fed and the Economy

Mr. Trump, if you become the man who finally updates how new money is issued into circulation in the United States of America in this Age of Plenty - in this era of astounding computer and technological advances - then you will go down not only as the greatest of US presidents

Appendix 2

The following is from:

Presentation submitted to the Senate Hearing on “The State of Civil and Human Rights in the United States,” Tuesday, December 9, 2014.

Dr Daniel Lebowitz, M.D.

“Dr Ross Adey - formerly of the Brain Research Center at the University of Southern California, worked on the CIA’s infamous Pandora project. His research involved inducing of specific behavior modifications by electromagnetic means. In his pioneering work, Dr. Ross Adey determined that emotional states and behavior can be remotely influenced merely by placing a subject in an electromagnetic field. He also demonstrated that EM radiation, properly modulated and pulsed, can induce calcium efflux events to interfere with brain’s function---the so-called “confusion weaponry”. Again, this is by 1970. “

“Jose Delgado—the scientist who stopped the charging bull by remote control. Dr. Jose Delgado’s secret work in Project Pandora was directed towards the creation of a “psycho-civilized” society. In his paper “Intracerebral Radio Stimulation and recording in Completely Free Patients”, using radio waves, Delgado observed that: “Radio Stimulation on different points in the amygdala and hippocampus in the four patients produced a variety of effects, including pleasant sensations, elation, deep thoughtful concentration, odd feelings, super relaxation, colored visions (hallucinations), and other responses.” Speaking in 1966, Delgado asserted that his research “supported the distasteful conclusion that motion, emotion and behaviour can be directed by electrical forces and that humans can be controlled like robots by push buttons. Delgado stated that EM weapons were “more dangerous than atomic destruction.” “With knowledge of the brain, we may transform, we may shape, direct, roboticize man. I think the great danger of the future is that we will have roboticized human beings who are not aware that they have been roboticized.” He created a brain transponder that was IN FACT used to roboticize human subjects.”

“A 1980 NASA document [*NASA abstract Report Number: AD-A090426*, June 1, 1980]

described that one can remotely create the perception of noise in the heads of personnel by exposing them to low power, pulsed microwave.... By proper choice of pulse characteristics, intelligible speech may be created. 1980. Yes, 1980."

"Dr. Emery Horvath - a professor of physics at Harvard University, has stated in connection to these generators,"These electronic 'skull-zappers' are designed to invade the mind and short circuit its synapses... in the hands of government technicians, it may be used to disorient entire crowds, or to manipulate individuals into self-destructive acts. It's a terrifying weapon."

"To quote José Delgado in his book Physical Control of the Mind: Toward A Psychocivilized Society, p. 116:

Individuals whose brain centers are electrically stimulated believe their evoked actions are their own ideas; their conscious mind rationalizes the evoked actions away. People experiencing this electrical stimulation aren't consciously aware of an external influence. In summary, these weapons have the ability to mentally and physically torture people, and to influence human psychological behavior. With, or even WITHOUT the target's knowledge or awareness. "

"If you know someone who this is happening to—don't count them as crazy. They may be a victim of this program. Recognize that the issues they were speaking about before they got into their current situation are still just as valid now as they were before. **In fact, it was probably the very legitimacy of their issues that led powerful forces to want to discredit them so thoroughly. Remember that.**

Whistleblowers must come forward who are aware of this program.

Fearless journalists must pursue the story. It was investigative journalists who brought widespread attention to MK-ULTRA, COINTELPRO, and much of the unethical experimentation that has occurred in the USA.

Targets must come together. There is strength in numbers. Targets should never give up the fight.

Finally, Congress MUST thoroughly investigate the intelligence agencies, DOD research programs, and black operations. The targeted individual program is happening. It's not science fiction. It needs to be EXPOSED AND SHUT DOWN FOREVER. Thank you for your attention. "

Again, all of this is part of Dr Daniel Lebowitz's presentation.
