# The Armanic Runes

My very first attempt in creating a font; the saying "necessity is the mother of invention" is exactly the scenario. I browsed the web fruitlessly for an evening trying to find a good looking set of the Armanen or Listian runes in a Windows font to absolutely no avail. I found an excellent shareware program (Font Creator, which can be found at http://www.high-logic.com) and created this font in a couple of hours.

There's mistakes, I'm sure, but if your looking for a quick Armanic font, here it is. There's only 18 characters in the font, using only capital-case letters as follows:

ᛁ	ᛒ	ᚦ	ᛌ	ᚡ	ᛉ
A	B	D	E	F	G

ᚼ	I	ᚲ	ᚱ	ᛉ	ᛏ
H	I	K	L	M	N

ᛜ	ᚱ	ᛋ	ᛏ	ᚢ	ᛏ
O	R	S	T	U	Y

If you find a better version of these letterforms, please let me know about it.
