Introduction to E-BOOK of Vedic Maths on Fast Calculation

Enough has been written about the utility of maths in our routine life or for competitive exams but still maths is an area which scares people the most. Students generally have a sort of phobia from maths. For them, the numbers sometimes become mere symbols written on the black board. But here, we would invite you to the world where numbers play with you, come alive and stop being mere symbols written on the black board and lead you to the virtual tour of intellectual journey where calculations fascinates you, thrills you and become very simple and easy to deal with. Our mind operates very fast and has a variety of operational properties and we have tried our level best to make the reader to use his hidden potential.

This E-Book contains vedic memory methods to speed up maths calculation especially for aspirants of competitive exams. We have a very rich heritage of our ancient mathematicians who discovered numerous easy methods to do any degree of complex calculation. In this E-Book, the methods described are based upon Vedic Ganit which was rediscovered from ancient Sanskrit texts earlier this century by Bharti Krishan Tirthaji Maharaj. This is the E-Book designed by Virender Mehta due to receiving numerous request mails to explain some short cut methods used in competitive mathematics, he is sharing this important E-Book with the readers. The methods described in this E-Book are extremely beneficial for the aspirants of all competitive exams. He takes delight in working out huge problems mentally-sometimes even faster than electronic gadgets like calculators or computers. These methods are also useful for our daily life to calculate anything like numbers, calculations, bills, interest or any kind of transaction. The reader for sure would enter into the world of enchantment for maths with our author Virender Mehta.

Some of the significant features of these vedic methods in the field of calculation are as following:

- These vedic methods ensharps the memory and increase the mental agility.
- These methods enhance the precision of our thought power and observation skills.
- Our short term and long term memory both are activated by these mental methods.
- These methods boost our self confidence.
- With these methods, we can solve long multiplications and divisions in a single line.
- We can enhance our innovation capabilities by using these methods.
- These vedic methods offer a very different approach to mathematics, that is both powerful and fun.
- If you practise these vedic methods regularly, then you can save your time and energy during competitive exams where time management is the success mantra.
- Practice session has been provided at the end of every topic.
- Every effort has been put to encourage mental activity.

Square of a number which ends with 5:

for example 45^2 or 35^2

we will write the answer from right hand side as we know $5^2 = 25$, write it in the answer. Then first digit of the number will be multiplied with the next number & write down the result in the answer.

Example:

$$\begin{array}{r} 4 \ 5^2 \\ (4 \times 5) \quad | \quad (5 \times 5) \\ \hline 20 \ 25 \end{array}$$

$$\begin{array}{r} 9 \ 5^2 \\ (9 \times 10) \quad | \quad (5 \times 5) \\ \hline 90 \ 25 \end{array}$$

$$\begin{array}{r} 3 \ 5^2 \\ (3 \times 4) \quad | \quad (5 \times 5) \\ \hline 12 \ 25 \end{array}$$

$$\begin{array}{r} 4 \ 3 \ 5^2 \\ (43 \times 44) \quad | \quad (5 \times 5) \\ \hline 1892 \ 25 \end{array}$$

$$\begin{array}{r} 1 \ 1 \ 5^2 \\ (11 \times 12) \quad | \quad (5 \times 5) \\ \hline 132 \ 25 \end{array}$$

Exercise: (Find out the square of following numbers)

35 55 65 85 95 125 195 275 385 995

Multiplication trick for Two 2-digit numbers:

Condition: we can use a similar trick when multiplying two 2-digit numbers with the same first digit from the left & second digit of both the numbers sum up to 10. Now to write down the result we will first multiply first digit with its next digit & make it left part of the answer and multiply second digit of both the numbers & make it right part of the answer.

example 1:

$$83 \times 87 = ?$$

$$\begin{array}{r} 83 \\ 87 \\ \hline \end{array} \quad \text{condition is true } (7+3 = 10)$$

$$72 \ 21 \quad (8 \times 9 = 72, 3 \times 7 = 21),$$

example 2:

$$\begin{array}{r} 47 \\ 43 \\ \hline \end{array} \quad \text{condition is true } (7+3 = 10)$$

$$20 \ 21 \quad (4 \times 5 = 20, 3 \times 7 = 21)$$

example 3:

$$\begin{array}{r} 456 \\ 454 \\ \hline \end{array} \quad \text{condition is true } (6+4 = 10)$$

$$2070 \ 21 \quad (45 \times 46 = 2070, 6 \times 4 = 24)$$

Exercise:

81×89

35×35

91×99

76×74

426×424

983×987

682×688

Multiplication of numbers whose last figures are same & whose first figures add up to 10:

This is the opposite method to previous technique, here we multiply both the first digits of the numbers & add the second digit in the result. Now write down the result in the answer along with the multiplication of the same second digit of the numbers.

Example1:

$$\begin{array}{r} 27 \\ 87 \\ \hline \end{array} \quad (\text{where } 2+8=10, \text{ both the right side digits are same } 7=7)$$

$$2349 \quad (8 \times 2 + 7 = 23, 7 \times 7 = 49)$$

Example2:

$$\begin{array}{r} 69 \\ 49 \\ \hline \end{array} \quad (\text{where } 6+4=10, \text{ both the right side digits are same } 9=9)$$

$$3381 \quad (6 \times 4 + 9 = 33, 9 \times 9 = 81)$$

Exercise:

27×87

38×78

95×15

13×93

52×52

71×31

925×125

Easy Subtraction by Vedic Sutra:

This is done by Vedic sutra (all from 9 & last from 10)

example 1: $1000 - 217$

now apply vedic sutra on 217 (9-2=7, 9-1=8, 10-7=3)

$$\Rightarrow 1000 - 217 = 783$$

example 2: $1000 - 762$

now apply vedic sutra on 762 (9-7=2, 9-6=3, 10-2=8)

$$\Rightarrow 1000 - 762 = 238$$

example 3: $6000 - 128$

now apply vedic sutra on 128 (9-1=8, 9-2=7, 10-8=2)

$$\Rightarrow 6000 - 128 = 5872$$

here 6 is reduced to 5 because 128 is to be taken from one of the 6 thousand, so only 5 thousands are left.

Example 4: $10000000 - 7952363$

now apply vedic sutra on 7952363

$$\Rightarrow 10000000 - 7952363 = 2047637 \text{ (Apply sutra)}$$

Exercise:

$100000 - 75391$

$800000 - 21736$

$600000 - 91199,$

$40000 - 3168$

Multiplication by 9's:

this is done by vedic sutra (One less than one before) & (All from 9 and last from 10)

Method with suitable example: 649×999

The number being multiplied by 9's is first reduced by 1 $\Rightarrow 649 - 1 = 648$ (left part of answer), (according to sutra one less than one before) then apply sutra (all from 9 & last from 10) on 649 to get 351 (right part of the answer).

$$\Rightarrow 649 \times 999 = 648 / 351 = 648351$$

example

$$79856328 \times 99999999 = 79856327 / 20143672 = 7985632720143672$$

Let us consider the multiplication 649×9999 then put 0 at the beginning of 649

$$\Rightarrow 0649 \times 9999 \text{ (No. Of digits = No. Of 9's)}$$

$$\Rightarrow 0648 / 9351 = 6489351$$

Exercise:

$78956 \times 99999,$

$89995 \times 99999,$

$7352 \times 99999,$

8599639×9999999

Profile of Virender Mehta (Trainer Speaker & Author)

Impossible is a word found in the dictionary of fools goes a famous saying. Who could think in dreams that born in a below average family to a watch maker for whom earning bread and butter was always a question, would bring national and international repute not only to the family, but his society and nation as well. And of course, heroes always emerge from adverse circumstances and the life history of Mr. Virender Mehta is the greatest evidence of this fact. He made every face turned towards him by turning impossible into possible. He created his own destiny because of his desire to overcome his weaknesses, his desire to show to the world that genius don't grow in congenial circumstances but they grow and flourish in such circumstances that appear almost impossible to an ordinary human being. Interestingly, until a few years ago, he remained a poor student at school with dismal academic record. He was extremely absent minded during his childhood. He lacked confidence and stammered while interacting in English and scraped through his exams by skilfully copying from the girl ahead of him and even wrote her name on his exam.

His Quest for the purpose of his life

He was tired of being 'ordinary' and decided to develop a fabulous memory. He did his B.Tech and M.tech in Computer science and Engineering and began his quest for being 'extra ordinary' and started researching on human memory. He worked extremely hard as he was determined and passionate to make his mark in the world. His friends would call him eccentric but he always had his goal in front of him.

After growing up, your proudest thoughts are about your first job, the university where you did your MBA or the first time you were drunk out of your wits. But for Virender Mehta, its thousands of hours spent memorizing the Advanced Oxford Learner's Dictionary. He sought help of Indian Scriptures, Vedas and relied more upon yoga and meditation to enhance his memory and mind power.

His Achievements

Every one of the 80,000 words in the dictionary from 'a' to 'zygote' is in his head. With the page numbers, that is. The name of this master memorizer has figured in the most reputed book LIMCA BOOK OF WORLD RECORDS for his ability to recall randomly selected words from Advanced Oxford Learner's Dictionary at an average timing of 13 seconds. For his extra ordinary achievement, he was called on the platform of World's no.1 reality show SHABAASH INDIA to display his unique talent in front of the whole world. He is the one amongst 25 Unusual Indians surveyed by THE WEEK Magazine.

Today he is an eminent figure in all print and electronic media. He is recognized as a polished memory wizard who guides, trains and facilitates people about how to fight with their weak memory. In spite of his extremely busy schedule, he keeps his eyes consistently on the mission of his life, that is, to train every child, every student of his country by making them realize their hidden potential.

His Aim of life

He is such a professional who not only focuses on enhancing IQ but on EQ and SQ as well which is need of the hour. He is such a dynamic,gregarious and renowned speaker and trainer who is incessantly working upon the aim of his life to take the country towards World Guru. His life is dedicated to the noble cause of upliftment of mankind and changing their old behavioral patterns which are not yeilding them any result.

His Publications

He has penned the books on enhancing memory and brain power entitled “The handbook of powerful memory”by Vasudev Publication and “Unlock your Memory Genius”published by Excel publications which have been acclaimed as India's best selling book on memory power. It has attracted feedback from the scholars and academicians from different parts of the country. If this book is kept along with other books on memory power, this one book suffices all ancient and scientific techniques and methods of memory and mind power enhancement. He has written a booklet on Vedic Maths which again has got appreciation of readers and booklet on vocabulary building with mnemonics which is getting extremely popular among competitive aspirants.

Description

This is called Shree Chakra Poster. This Chakra is very powerful to enhance your Memory and Concentration Power. It also symbolizes the arrival of Goddess Lakshmi. You have to paste one poster at the place where you worship, one at your working place, one at the door from which you exit so that every time you move out, you will see it and one in the study room. You have to concentrate on mid yellow dot without blinking your eyes. you will notice that your attention will go to different geometric figures. This phenomena will enhance the communication between two parts of the brain (Left hemisphere and Right Hemisphere). After this close your eyes and visualize shree chakra on your Agya chakra. Paste this Shree Chakra Poster on the wall at your eye level at the distance of around 2 feet. This Shree Chakra is the most powerful source of positive energy.
