

API: 'The Balk' & Serpent's Walk

Welcome, welcome now to Aryan Practical Idealism, where we are discussing the book *Serpent's Walk*, the novel by Randolph Calverhall, which is published by the National Alliance and is not too widely available. Hopefully it can be put up on Lulu sometime. But our guest again, Serpent, is discussing this book.

He's just completed the book. So what is your your general impression of it? I would say that there are a lot of interesting, kind of like what I said in the last stream, where there are some things where if they're with these pandemics going on, and the pandemics in the novel, which are Peikov and Starak, you know, something I noticed is I think that there could possibly be a war between, you know, war with Russia, because in the novel, on page, what was 418, basically, one of the agents mentions, we use Peikov to save Israel from the Russians. Soviets are planning a bit of surgery on the Middle East, convene conventional warfare under the pretense of stopping Israeli atrocities against the Arabs.

But the Americans busy elsewhere would have been busy for Moscow to push Israel back to its old boundaries for Cairo, North Africa before the Baalbek war, which was the war that they, you know, said in the novel took place in 2010, like it was in the 1990s. So we're going to do the world a grand favor, bought off the Soviets, occupy Mother Russia, sweep up the pieces, give some spoils to Israel and some of our pals and incidentally become the supreme power on Earth. And that's basically they created it against, you know, Russia.

And that's kind of like what is going on now, where there seems to be some rising tensions with Russia. So maybe there is a war with Russia sometime in our midst. Well, it definitely seems that that's what their plans are, to create a war between Russia, China and the NATO powers.

Yeah, I know that's what Francis Parker Yockey was talking about. I'm just listening to his collected works, the *Lost Works*, which are also available from *Invictus Books dot com*, which I also have in physical form. And he was talking about how that's inevitably what's going to occur, that there's going to be Russia versus America or a third world war.

Of course, he predicted it would be in the 70s or so. And he was writing in 1948. So that was quite a discrepancy.

Just as the book that you're reading, there is a bit of a discrepancy there. It wasn't there in terms of historical chronology. Yeah, like predicting that there would be like a Middle Eastern kind of war in 2010, even though there was obviously Afghanistan and Iraq.

But, you know, what they predicted where it was a, how do you call it? Sort of like the tensions right now with Iran, that kind of thing. Yeah, sort of the war. It predicted many

of these things to happen sooner.

Yeah, the war has sort of been going on for a long time now. It's sort of like a protracted war in the Middle East. It's like what I mentioned earlier with the Turner Diaries, you know, that was written in 1978.

And basically they predicted, you know, it was taking place in 1993 or whatever it was. So I think that a lot of these novels tend to predict things much sooner than they tend to be. So that was Israel trying to clear out the Middle East to have greater Israel.

Yeah, yeah. And so did they actually achieve that in the novel? Did they manage to achieve this? I think so far as I recall, I read only about 50 or so pages. That's all I had time for.

And they were talking about having more or less the entire control of the Middle East. No, basically they started to have some enclaves. But by the very end of the novel, which stretches all the way to the year 2089, they are actually, you know, they basically just keep doing what they've been doing throughout history, except they've just continued to self-destruct themselves.

And they become almost basically nothing when it comes to power by the end. By the end of the book, Lessing, you know, who in the beginning of the book is sort of like this weenie liberal character who's married to an Indian. And then it's sort of halfway through the book, the Indian gets killed by this Israeli agent, Richmond.

And then basically, once that happens, he becomes more, you know, I guess, awakened to more masculine. Yeah, basically, under the petticoats of some non-white poontang pie that he wanted. Yeah, basically, and ironically, later, by the end of the novel, he becomes the leader of the, you know, the new, you know, Reich, basically.

And he marries this other woman, like a German woman or something by the end of the novel. And then, and then there was a point where he thought that, you know, he was going to she was dead, because there was that, this battle between him and this other agent, Hollister. And he was like, ah, ha, ha, I bet you didn't know that I was an agent or something.

He said something along those lines. And then he ended up right before he was going to shoot him, the building collapses on him. So, just to get back to the main plot, the whole idea of the novel is pretty much that the Third Reich or the Fourth Reich is sort of underground in the form of various private corporations that are being used to fund it, based upon the National Socialist Gold Reserve that disappeared after the Second World War, and then was channeled into various corporations in Third World countries.

That's what I got out of it. I only read about 50 pages, so I'm not too sure. Somewhat.

So they're trying to rebuild the Fourth Reich, in other words. And then basically, he ends up being interrogated by this agent named Shapiro. And then, you know, that basically frustrates him even more.

You're talking about Lessing? Yeah, yeah. He was interrogated after that agent killed his curry, you know, platoon tank. So then what is the general purpose of the plot? There's obviously these figures who are National Socialists, who are very high level, powerful people in the background.

That's it, right? I think it sort of predicts future tensions between countries and what could happen about how pandemics would sort of create a war. This could sort of be looked at as like a, you know, a view of what's possibly to come in, you know, in soon. Well, maybe.

Are you sure that it's not something like a predictive programming that this novel has been deliberately written as a sort of revelation of a method of what could be the future? You could look at it as something that seemed to have been. It's possible the author was actually. I haven't really found much information, but apparently he was a just found it on a thread on a. On a storm front that the author was actually a professor named Muhammad Abdul Rahman Barker, real name Philip Barker, and he was a professor of Urdu and South Asian studies who created one of the first RPGs, Empire of the Petal Throne, and wrote several fancy science science fiction novels based in his associated world setting of Tucumel.

OK, so what's interesting is the book doesn't even appear on his Wikipedia page. So wasn't he a member of the National Alliance? That's what I had heard you said last time. That was what was speculated.

Not much is really known about that, but I found that that Michael Jeffrey guy, I don't know if you're familiar with him. That's what he said somewhere on some storm front thread. He said that.

Yeah. So in other words, the point is that this book could be a revelation of the method or predicted. Yes.

Of what they're intending to engineer and of what and that this might very well be a reflection of the actual realities of what's going on behind the scenes, that the National Socialist Gold and various other assets were used to establish private companies in different third world countries and countries over the earth so that they could build power and using that as a mechanism of opposing the Jewish power. So it became underground, basically. So the main protagonists that I had read about were sort of a coterie of national socialists behind the scenes who were using these mercenaries to achieve various objectives.

And this Lessing figure is one of those mercenaries who was hired to work with this group. And they basically framed him so that he was forced to work with them. That's pretty much where I left off.

So what happens after that when they're discussing things in this roundtable? There's quite a bit of that throughout the novel. There is a lot of discussion between different characters and basically, you know, it is repetitive in that sense. And my critique of this book is I think it's I think it could have been trimmed down.

I think maybe if it were 100 pages less, I think it would have been more interesting. But too much of a social novel of a drawing room novel type thing. A little bit, it just was a little for what it was, it could have used some maybe some editing or it was very descriptive of certain, you know, the area where whenever a character would enter an area, it would describe every little detail of the room kind of thing.

Right, so did that have any essential bearing on the actual plot and the meaning of the book, or was it just a guy getting off on literary amusement? I think some of yeah, some of that is, you know, what some could call, you know, mental masturbation or whatever. That's what some could call it. But it, you know, you could, I would I would recommend it, but it just definitely could have been for what it was, it just could have been a shorter work, because it it was around 450 pages.

Yeah. So. So so what happens then in terms of the plot, what what occurrences go on? It's just basically a bunch of wars that happen and so forth.

Are there not any wire pullers behind the scenes that are making the wars happen or wanting them to happen? Yeah, I see that. What? Or is it just organically that these sorts of things happen based upon the concatenation of geopolitical relations or, you know, or is it something deliberately orchestrated by hidden hands behind the scenes? It's basically just an underground group, I mean, in a lot of parts, I just think that when they use that language where they just go on and on and on about minor details, I think that tends to make it more difficult to tell what's really going on. That's how I look at those.

Types of works, but it doesn't say anything about people actually doing anything to make these events occur, they're just or do they occur organically or are they deliberately contrived by the National Socialist Underground or by the Jews or and Masons or what is it? What exactly is the point of this book? The point is, what's the what's the trajectory of it? What's the objective other than just to try to portray, you know, geopolitical affairs? It was basically about them participating and I actually had a pretty hard time really telling what was going on at certain points. It just it was just the style of writing was not. It was it was not really the cleanest read when it came to that sort of a lot of rambling.

There's there's rambling and there's just a lot of, you know, back and forth between

certain characters. You know, and like it goes through, you know, there were a couple presidents in the novel and they, you know, basically died and were they assassinated or something or what? Basically, they were they were assassinated and it's really all over the place. You know, if I had to describe it, it's just very kind of scattered with.

There's a lot going on. A lot to pay attention to in the novel. Yeah, I find those sorts of novels to be very annoying to have to read novels like Billy Roper's *Hasten the Day*, where it's just a giant mass.

Yeah. Yeah. Billy Roper actually he actually enjoyed this work.

So maybe that might be an indication of what influenced his style of writing. Yeah, it's just my reading of Billy Roper, first of the third of the three *Hasten the Day* trilogy novels, is that it's just this endless mass of details that just goes from one place to another place and, you know, discusses particular relations between people, a lot of psychodrama and, you know, socialite babble. Yeah, it is sort of what I got out of it.

I would just say what to take away from this work is what the powers that be, what their plans could be in store for. Let's talk about that in more detail. The next decade.

About the plans. What exactly are these plans? Because you haven't said so far. What I just said was probably incite a war with Russia and try to basically keep occupying land in the Middle East and sort of just do what they've already been doing, except on a larger scale.

You know, something that I thought was interesting lately was I was bored last night and I walked around Union Cemetery and I noticed the amount of gravestones were Freemasons. So that tells you that about the amount of Masonic influence in our government for centuries now. So I think that's an indication that Freemasons play a big role of running the show.

And I believe that this serpent, you know, serpent's walk, the symbology of the serpent may be an indication that like kind of like what you said of maybe some, you know, pro white wizard of Oz going on. I don't know. Maybe I'm misreading it.

I was always speculating that there might be some sort of order like in the *Turner Diaries*. And this book suggested to me that that might be a revelation of that method as it means of gaining insight, trying to draw inferences to whether there was or was not some type of order hidden behind the scenes as a white hidden hand that's opposed to Masonry in the Jewish sense and Jews. I'm not too sure what that would be specifically or whether Masonry, as I've heard from people like Dennis Fetschow and various other more disinfo agent types, they were saying that Masonry was just co-opted and corrupted by Jews.

And I think even Julius Evola intimates that in some of his works, as does René Guenon,

the radical traditionalist, stating that Masonry was basically just co-opted by Jews through Adam Weishaupt and around that time period, around like the early 1700s and more increasingly toward the late 1700s. But Masonry was actually otherwise pro white. And then it got subverted.

So what's interesting about that is, you know, the connection with what we were just mentioning about Billy Roper. Billy Roper, you know, given his association is probably a Mason. Probably.

His shield wall network has that triangle sign. You know, the balance of the thoughts, emotions and actions, which is equilibrium. And then he's got, you know, a lot of association with the KKK, which is a Freemasonic organization.

Yeah, I don't, you know, given the mysterious nature of the author, there's not much known about this book. And if that guy even wrote it or not, it's not even on his Wikipedia page and no one talks about it. This could be some kind of, you know, sometimes they sneak their plan into things and by accident.

And well, I'm not sure it was it would be deliberate, in my opinion, you know. Yeah, it would be a revelation of the method. That's the whole reason why I gravitated toward that book in the first place is because I thought, like the Turner Diaries, that it might be a blueprint or a revelation of the method orchestrated.

Yeah. So in that novel, there's like a schism, obviously, between Jews and the National Socialist organization behind the scenes. Don't doesn't that organization have a name like some sort of a cult significance or? I believe it was the 85.

And then, of course, there were. I think that Hollister guy was an infiltrator. And then he's like, ah, you know, I got you now.

And then he's about to kill him. And then that part of the building collapses and kills him instead. So, yeah, but isn't there.

So the secret organization is called the 85. Is that what you're saying? I believe that was the case. It was like I said, the type of the way it was written, it was a bit hard to follow along.

Yeah, you should have taken notes about that so we can understand. There's no index in there. No, no, nothing of that kind.

Because, yeah, so so we can't really know if you if you can't recall the National Socialists, what sort of order or cult organization that they formed or constituted. Was there any reference to a Fourth Reich or something of that sort? Yeah, at the very end, actually, he said that last paragraph is at last, blessing could let go. The thousand year Reich had gone off the track, derailed for a space of one hundred and forty four years.

But now it was back and chugging along strong. It looked as though this right would last a while, hopefully forever. So that's sort of like the conclusion of the book that the National Socialists win.

But how do they are the Jews defeated somehow? Is there like a final solution or something of that kind? Basically, what happened is the, you know, towards the end where that building collapses, there isn't really there's sort of a gap in time between there because the previous chapter, chapter twenty nine, that was in twenty sixty. So fast forward ten years. And then basically, let me find the part here.

Oh, basically, they got enclaves in Kharkov and Khybyshev, which I believe are parts of the Ukraine, I believe. They as in the National Socialists or? No, the Jews. OK.

Yeah. Basically, they they were ran out of Palestine and basically they got coincidentally full of immigrants where they were occupied. And then basically they just kept retreating and retreating and retreating.

How did they get run out of Palestine? I don't know. I really just couldn't follow along with this book. It was it was really just not.

But if you can wade through all the. There won't be no Khybyshev either. All of northern lzyland will be in our hands by this evening.

And the Turks will be in Kharkov, and Kiev will keep in their packies happy. Oh, so basically the National Socialists took over Israel. That's pretty strange.

So how did they manage to do that? There was. Yeah, there were. What's interesting about that is that there were Bible verses that were quoted throughout the book.

Oh, yeah. Maybe some kind of Christian agenda here. I don't know.

Implicitly, at least. So the guy was like a Christian identist or something like that? Possibly implicitly, just because of the amount of Bible verses in the book. But there weren't really any characters that were Christian.

It's just using the tradition of Christianity to try to sell the book to Christians, maybe. That's possible. Yeah, it's when it comes to religion, it's very kind of ambiguous.

It doesn't really take a position or mentions it much at all. Yes, that serves the function of not alienating Christians and trying to hook them into a more pro-white orientation in their thinking. I think that might be what this what the psyop of Christian identity is, is to try to hook more white Christians into pro-white activism, if that is an actual psyop that's created by whites as opposed to created by Jews to try to hook white people into Christianity to neutralize pro-white activists.

So it's difficult to tell, really. Basically, and that kind of diverts them away from, you

know, because a lot of them seem to side with that more than being racial. I think a lot of those Christian identity types tend to side with the magic Jew, you know, instead of their survival.

That's what I seem to get out of a lot of them. Yeah, they're basically just mentally crippled people that have to fall back on a mental crutch called Christ insanity. They have to rely on external authorities because they don't have any internal strength.

They can't stand on their own, so they have to rely on external authority. They're lemmings, conformists, mentally. Right.

So this book still tried to accommodate those types so that it wouldn't be, you know, overly repulsive to them, which I guess William L. Pierce somewhat did that in his American Dissident Voices broadcast. He didn't really attack Christianity over much throughout those, so far as I can recall. Yeah, he basically, the reason for that, that Pierce said, he just didn't want a war with the Christians, basically.

Yeah, because once you start criticizing Christianity, they'll basically start backstabbing you or shunning you, and then you won't be effective in reaching more white people. Some of them actually try to incite violence on people that don't buy into their, I've actually heard some on Telegram that were like that. Like there's this one guy that's like, kill all non-believers, you know, saying stuff like that.

I don't know if he's a fed or not, but it's definitely suspect. Yeah, I'm wondering if there's not a bunch of pro-white people in the government at some level, because they leaked out protocols of the Elders of Zion recently, the FBI. So maybe that is some way of trying to demonstrate, you know, sort of counter strike against Jewish pushiness.

Yeah, maybe there's some in the shadows that maybe really have our interests in mind. But, you know, it's sort of like what I mentioned in the case of Star Wars, where the emperor, who's kind of like the stereotype, you know, you know, rubbing his hands together and, you know, and then you have Darth Vader, who's like his puppet, and then he sneaks up behind him and throws him down the shaft or whatever. Yeah, it's sort of like the hired goons of the Jew, you know, they understand that their survival is not really guaranteed, that if they don't, if they don't side with their own people, they're not going to have a future anyway.

So, you know, they're starting to see the writing on the wall. They have to take a side. You know, siding with the system is a losing game.

And if you side with that, then you're just bringing about your own destruction, because the Jews are just going to backstab you like they backstab everybody else, as their whole track record is. Is there anything like that in the Serpent's Walk novel, about any sort of insiders in government? Yeah, like I said, with that agent, that Richmond guy who killed

his Indian wife or whatever. No, I mean, pro-white insiders.

Oh, okay. Well, I mean, I think, I believe that they actually were agents themselves. They were, I think that they were actually a government agency.

Who was? The, his group, Blessings group. You mean the National Socialists? Yeah, I think, I think so. I don't, I'm, I, again, it was hard to follow along.

I'm not too sure about that. I don't think so. I know some of them were allegedly British people.

Yeah, some were British, some were French. One of the guys was Swedish. Yeah, there was a South African woman as well.

Yeah, I know that at one point, they try to team up with a Black Muslim guy named Khalifa, and he's just like, she, you know. Right, a little comic relief, I guess. A little bit, yeah, yeah.

Yeah, Black Muslim. Sort of like the, there was a little bit of that in the Turner Diaries, where there were like these, I don't know, neat, huh? Yeah, I remember that scene when they're like, open the door, honky. Yeah, open the door, honky.

Something like that. That is definitely one to reread at some point. Yeah, it's a very revelatory novel indeed, in terms of the blueprint of what will occur, almost certainly.

Since time seems to permit, would you like to discuss balkanization and why it is a failure? I guess so, yeah. Since the novel, for the most part, you know, it has some things to offer. It's sort of, you know, a little bit of predictive programming, a little bit of insight into what might be.

So for people who want to know, from an insider's perspective, revealed through fictional literature, what might be the case, then that might be a good idea to read that novel, since it's obviously free. You can get it, I'll attach a link to the video so that people can get it for free. Maybe put it up on Lulu if you want.

You could even sell it for like two bucks or whatever the case, whatever you want to do. Whether it's copyright or not, I don't know and I don't really care either. Yeah, as for Lulu, I just put gold in the furnace up.

I used a non-descript cover for it though, for obvious reasons, as the time I put up that, you know, ultimate avatar book, it was flagged down almost immediately. Yeah, so there's lots of restrictions. So that might be the case if you put *Serpent's Walk* up there.

Yeah, because of the symbol of the, you know, the swastika and yeah, maybe that would get taken down. Plus you have Strom. I wonder if there are any actual book companies where you can produce books on demand that will actually allow that.

Maybe unless you have Strom, who I don't know how he is with copyright, maybe he would try to, you know, flag it down. Like with the Revelope, I was thinking of putting up Revelope Oliver's Origins of Christianity, but who knows if you try to flag that down or not. But I wonder if there's any third world country that would have books on demand publishing service.

Yeah, I'm not sure if there are any competitors that Lulu has that do print on demand. I'm sure they're around, but I just don't know of any specifically. Yeah, because if you did it with a third world country where they have less restrictions on freedom of speech, then that would be a good way to go.

Just like the novel speaks about investing in third world countries and so forth as a means of building power and, you know, being able to actually do things without endless regulation. You know, with the bureaucrats in those countries, you can just basically throw some money under the table and then, you know, they'll look the other way for the most part because they're so corrupt. So I guess the more corrupt things become, the better it is in a way.

Did the Serpent's Walk novel discuss that at all? How the government was sort of eroding like the states? I think I remember there being something. Yeah, like on page 226, it says that Peikov and Starek had not destroyed Western civilization, not with a bang or even with a whimper. They might have unbalanced essential flywheel.

However, now centrifugal force would gradually send the outer looser pieces hurtling away. And alas, the whole thing would whirl into fragments like a fireworks pinwheel on the 4th of July. So obviously, they were in already a pretty decadent state then.

It seems a little bit questionable to me, though, about the mentioning of these viruses, because you see how the Jews are really pushing the virus agenda. If you just walk around in your local community, you'll see how all the Jews are, you know, trying to convince people to go along with all the rules and mask laws. So to me, where I'm at, they make it.

It's like you're basically forced to leave buildings if you're not wearing a mask. It's really stupid. Speaking of the fact that the Jews want that, right? So if the novel is speaking about releasing viruses, then maybe that suggests more that the novel is just written by or serves the Jews more than anything.

It might be written by a Freemason. And if that Freemason were affiliated with the National Alliance, and is putting forth that sort of revelation, then it might be the case that that was the intention of the Jews in the first place, and that they're the ones behind it, scribing these little writings and so forth. You can never be sure.

It's hard to tell. Yeah, it could just be a, you know, their plan on paper. You never really

know for sure.

But I think this novel could have, like I said, value on what we could possibly be seeing in the near future. Despite it taking place in 2049, I think it could possibly happen sooner. But then again, you know, they thought that all of these wars would happen sooner.

And, you know, you never really know. It seems a lot of these predictions tend to be, you know, they tend to predict things much sooner than they really are. Sort of like that Back to the Future 2 movie where it was taking place in 2015, and they thought that everyone would be floating on boards or whatever.

And, you know, have self-lacing shoes and all this, you know. Well, I think things are progressively not. Due to the lack of innovation and things like that, things of that sort, it takes much slower time for things to happen.

Close the door, please. Thank you. The purpose of that is basically just so that they can show people what they're doing, and then get them to expect it to occur at a certain date, but then it doesn't occur to a later date.

That way it helps to precipitate it into being through the law of manifestation, through their thinking those thoughts and having those thought forms in their mind, in a collective consciousness or the mass mind. And then that reifies it. That makes it a reality.

It brings it into being based upon that predictive programming propaganda vehicle that they make up these sorts of ideas and means, and then it becomes a reality more likely. I definitely do think that there is an agenda against Russia, because that is where these viruses in the novel first were, you know, created. They're basically created against the Russians, and they were most negatively impacted by that.

And what's interesting is there's a statistic somewhere that by 2050, I believe it's that like millions and millions of Russians are, you know, are going to die for a variety of reasons, you know, environmental, societal, and it's like 80 million will die by 2050 or something like that. So that could be a revelation method itself, that there's some plan against, you know, the former Soviet Union, because, you know, a lot of these in the circle would say that, like, that is sort of the last stand for, you know, national identity is the former Soviet Union. Yeah, I wouldn't say that.

They're definitely wrong in saying that, because Soviet Union has been Jewish controlled from since 1905, and it's basically just a Eurasian polyglot multicultural society. It's not a nationalist or racialist society at all, except a cryptically Jewish. What about Poland or Croatia? Well, those aren't really the Soviet Union, though.

Well, it is Eastern Europe. Yeah, but it's a distinct thing, though. Balkans region.

So yeah, for Balkanization, we could just. Yeah, it goes in there, Balkans, Balkanization. Do you want to talk about Roper and Covington and Butler and.

Yeah, basically the whole idea for Balkanization that was allegedly initiated by Pastor Richard Butler of the Aryan Nations, who was probably an operative of the Cabal, who was a half breed Cherokee Indian. He was also a 33rd degree Mason. Yeah, he was critiqued by Ben Classen in, I think it was Raho, This Planet is All Ours, or one of those works.

And he, Butler, had created this Butler Plan, which is that the Northwest should be the place that all the pro-whites should congregate toward. And that will be a means of creating a so-called ethnostate. That was also a book by Wilmot Robertson called The Ethnostate in the 70s and 80s.

Actually, I think that was the 80s. It was a dispossessed majority, which was the late 70s. And then he had Wilmot Robertson had the ethnostate in the 80s.

So those two agendas were being, you know, sort of pushed, the same sort of agenda being pushed at that time. It must be why you have these alt-right, Dugan, you know, Richard Spencer types, you know, always use that term, you know, the ethnostate. Well, that way they can program people's minds by simply repeating something over and over again through classical conditioning.

Yeah, it's like, wait, no, no, no, go on. I was just going to say Billy Roper does that all the time on his shows. He says, the bulk, blah, blah, blah, blah, the bulk.

Yeah, what it is, is it basically is, you know, there's a video of Ramsey Paul and Harold Covington and Ramsey Paul is joking about him like, isn't that like white Zionism? And he's like, kind of joking about it when that's basically what it is. You know, with Christian identity as well being pushed on top of it. Yeah, and that's interesting.

You're becoming like, go on. It's interesting how it began with the Christian identist Richard Butler. Yeah, maybe there's just some, it's sort of conditioning to make whites more like Jews, basically.

Well, I would say what the whole purpose of it is, is to gather all the whites together so that they can be killed, basically. Yeah, yeah. You want to see, you know, you know, the, like what you said about drone strikes and geographical, they could poison you.

They could dump a bunch of firebombs on your enclaves or whatever the case. It's basically no different than walking into a trap, going into some sort of unified enclave with only pro-whites in it. You'd be basically killed off like Ruby Ridge or, you know, Waco or something like that.

That's the worst policy, in my opinion, is to just gravitate toward these so-called ethno-

states. Of course, you want to be in areas where you can have a sustainable existence, but you don't want to be trapped in the middle of nowhere because then you're totally dependent on, you know, being able to get along with all the extremely narrow people who live in those places, which is almost invariably the case. The smaller the place, the more narrow the mind.

And if you ever expose racial views to people and they don't share your views, which most people in small towns, you know, they might be implicitly racially oriented, but given the cultural climate and the TV and so forth, its influence, most people who are white, who live in predominantly white areas, are not ethnically conscious. And for that, you know, they're not explicitly, and they wouldn't tolerate any explicit ethnic consciousness. Yeah, Serdic Walk mentioned that, where it was basically the influence of the television that has programmed people to think the way they are, decades and decades of that.

Yeah, pretty much. And they take that for reality now. Anybody who disagrees with their consensus gentium of egalitarian pacifism, they have no tolerance for and would just shun you and reject you, which I personally have experienced in a small town.

You know, communicating vocally about Jews and what's going on, you'll just be totally shunned and rejected by... Yeah, for those listening out there, they should check out your latest videos of you filming people gang-stalking you. Yeah, basically that's what happens to you once you're known as a so-called racist. You'll be persecuted and harassed and gang-stalked.

Like that car, there was a car in one of your uploads, where they were sitting in front of a building, and then right as you pointed them out, they drove away. Yeah, there's definitely... You see a lot of stuff like that when you're gang-stalked. You know, they'll just hang around outside your house, create noise, pollution, drilling into things, doing make-work construction projects that are not, without any reason, all of a sudden construction will just pop up right outside your residence, which will just be ongoing for a super long time.

And then there'll be people having their parties outside all the time. You know, one of these people in the next-door neighbors, they were screaming out, Black Lives Matter, Black Lives Matter, and like that one o'clock in the morning. One o'clock in the morning.

And then if you call the police, the police either won't respond on time or they won't do anything about it. And they'll say, oh, didn't seem too noisy to me, because the police are in it with them in gang-stalking activities. If you're a targeted individual who is notorious or known to have criticized Jews, then they'll go to their way to basically persecute you, follow you around the town.

Everywhere I go, there are police vehicles working in tandem with various undercover

people and various members of the community. It's called community policing, which is the same thing as Stasi tactics. What they do is basically just chase after people and follow them all the time, making sure that they know that they're being followed, walking on the opposite side of the street, deliberately trying to walk into you or near you or park right at you or try to cut you off.

When you walk across the street, they'll deliberately drive their vehicle right up to you pretty much and pretend that they're stopping right in front of you and so forth to try to make you feel stressed. And countless other petty little things that they do. They'll go even further and try to break into your house and sabotage it and so forth, which hasn't happened here because I'm typically here 24 hours a day, almost always, for the most part.

Somebody is always in this place. So they couldn't really do that with ease. They have locksmiths working for them.

I've seen locksmiths tailing me around all over the place here, too. You know, they'll knock against your wall to disturb you. They will put around my around my place here.

They've got about three properties, which is had installed on them very, very bright lights that are shining into my room in the night so that like three different properties, they all get these super bright lights and they're all shining it right into my room, beaming it right at me. And before I knew about gang stalking, I was thinking, how come all these these people are shining these lights here? It's pretty rude. You know, I was thinking, how come all these people are driving their vehicles so inconsiderately across the street when I'm trying to cross? You know, they just like run right at you.

And then I was thinking, basically, their method is passive aggressive. Yeah. Yeah, it's basically plausible deniability, so long as they could make it appear that that, you know, it appears normal enough that if you were to pick out any of these one particular instances, then people would just say, oh, you're crazy for thinking that.

And then they can use that as a means of justifying institutionalizing you. Basically, that's their technique. It's a absolutely cowardly and pathetic game that they play.

But that's a typically Jewish, you know, subterranean manipulation technique that they use. So if you're ever vocal in anywhere you live and become notorious for being a so-called a racist or whatever their stigma may be, then they'll gang stalk you and harass you and persecute you. And if the Jews ever find out about you, then they'll basically tail after you everywhere you go anyway, because they're an international network.

So that's what happened to me. I'm basically right now drafting up a document about that, about my personal history, how I've been basically stalked by these people for well over a decade now that I reflect back upon it, all the instances in my life of what they've

done everywhere I've gone, you know, at various times I've roomed with Jews without knowing they were Jews. And then it turns out, you know, because of their features and behavior, you know, I can come to that conclusion in retrospect that they were actually Jews and they were seeking to undermine my existence at various times.

Do you want to title it? How Echo Echo Echo They Ruined My Life? Yeah, pretty much I'll do something of that sort. What would you use as the cover? Well, basically just Jews spying on me and sabotaging me. But just to get back to the bulk thing that we were talking about just there.

The point being that if you become notorious in the smaller the place you go to, the more under a magnifying glass you're going to be. So you'll be notorious. That's why sometimes, as I said on the previous discussion, it's better to swim in the sea of the people.

As Mao Zedong said, you know, you don't want to become too isolated because the more isolated you are, the more people look upon you as one of those, you know, as the media stigmatizes them, not survivalists, you know, one of those low, not gunman types like like they always portray survivalists. So, yeah, like when I was in school, when I was in high school, back then I wasn't really aware of much of this stuff. Even earlier on, like when I was 13, 14, I was sort of I would wear like all black clothes and stuff like that at one point.

And then basically the mestizo cholo types would kind of say, haha, school shooter, you're a school shooter, because they try to reinforce a stereotype about like maybe they're trying to do like people being school shooters or whatever. Maybe the Jews incited them to do that because that's what happened to me when I was a child or, you know, like around 13 and so forth around that age. You were called similar things.

There's one Jewish girl whose last name was Blight, properly so-called, and she was saying that I would be, you know, I'd probably go on a rampage and kill people at some point. That's basically how they, I don't know what the word would be, sort of predictively program you, I guess you could call it. Basically, if you're an introverted white guy who is heterosexual, you're basically painted as a school shooter or whatever.

And the reason why that is, is because they want to eliminate those who are intelligent and creative because we're the ones who can threaten their system, whereas all of their, you know, various other white race trader types who just live for money and their careers and so forth, they know that they're just bought and paid for prostitutes, basically, that they're system prostitutes or you could call them political whores who just sell themselves to the highest bidder for profit, possessive individualists. They're basically robots. Yeah, that's exactly what Serrano called them.

I think that they're robots of the demiurge, these Zogbots or Zionist robots. They don't

even look like a human being, really, the way they behave and act. They have their eyes half shut all the time, this fake smile plastered to their face, you know, this sort of robotic behavior.

I'm speaking especially about these office worker types, you know, like the Zionist Christian white collar workers. Most of them seem like literal zombies to me, so I would not dignify them with the term human because they don't deserve the term applied to themselves. So if you're going to be targeted by these people, don't expect them ever to relent because in my opinion, even though it was stated by that Gosling guy, that Jewish gang stalking operative, he said that they... Yeah, actually, you finish.

I was going to say something about that guy, but go ahead. I'll just say this. He said that people who are generationally nationalists are targeted, and I'm writing about that now autobiographically, that when I was a child, outside of a place that we lived in, they always had like empty houses for police, you know, how they have that.

They just move the police in and out. You know, when they're doing training and so forth, they stuck the police training houses right next to where we were living and so forth. So there's all sorts of examples and cases of how I've been persecuted throughout my life, and the reason why they target people who are generationally nationalists, because they must know that we have the blood memory, that we understand, we have a healthy consciousness, that we are, you know, the biggest opposition or threat to their power, those who are of a more ethnically conscious mind, whereas all these sort of bourgeois types who just live their lives for money, people like that are just unhealthy instincts, and so they don't look upon them as a threat because they can just be bought for the most part.

But go ahead with your point, you were going to say something about that Gosling guy? Oh, basically he commented on our last upload, and he was like, you know, you guys are, you know, make white people look bad or something, and then I replied, says the Jewish trainee agent who shuts entire channels down, and then guess what? I look on that upload today, his comment was gone, so evidently I exposed him, and he had no response to it. How could he erase comments? Was that Bitchute who erased it? No, I think he deleted his comment. Okay.

Because I don't really see any reason Bitchute would remove that comment. I think he deleted it because I exposed him in my comment section. Yeah, maybe.

I remember seeing that tranny comment on your part, but I never heard or saw the other part of that comment. Yeah, he's probably just an Antifa agent type. My opinion is that he's a Christian because he's always defending Christianity, and no Antifa people would do that, for the most part.

But that, and he also, he talks like a fag, so I anticipate that maybe he's an Antifa or

something. Yeah, today I was walking around, and one of these Antifa people were tailing after me. That's usually what they do.

They walk on the other side of the street and text, and then after a while they'll just turn off, and then someone else will pick the tail up. It's just a continuous visual for this gang stalking. They want you always in their sights all day, every day, so that you can be psychologically disturbed, so that they can make you, basically try to drive you insane by- I think that's what they want out of you.

They want to bother you. They want to push you to go over the edge and do something. That's happened several times, especially in the States, with a lot of these alleged mass shooter phenomena.

Apparently that's a result of the gang stalking. They have no recourse, because it goes, it accelerates with these gang stalkers. They start using microwave weapons on you, and directed energy weapons, which they actually do have, and that's easily proven.

Then they beam it through the wall, and they can basically cook you from the inside out, or cause burns, cause a rupture of your blood-brain barrier, which is what separates the blood from the brain, and that way it makes it look like you've had a stroke or a heart attack. These people are definitely a sick bunch of scum. There's no question that they are basically murderous in their intent.

Who is to say what will happen, but definitely something to watch out for. You don't want to be known as a racist. It doesn't really matter how honorable your motives may be, because you're not dealing with honorable people.

You have to play the role of a gray man in this society, otherwise they'll try to take you down in some way at some time. So basically, you have to be super clandestine. That's why I would advise against going into any of these small reclusive little podunk towns, because you're just going to be notorious.

The only people who live in those places are either Christians, or blue-collar alcoholics. All the towns are always structured the same. They have a white-collar who are running it, Freemasons and Jews.

And then the upper class of the town, usually, if they're not Freemasons or Jews, then they're one of the affiliate organizations, or they're Christians. And then they've got the blue-collars who do all the work for them. That's pretty much all the town is.

So, if you're going to go somewhere, even if you have work and an excuse to go there, and you wind up being, you know, if you're an outspoken person, you're going to wind up a target, basically. Even though a lot of people in the country have ethnic consciousness, and they don't like what's going on, at the same time, you know, there are always these Christian scum, and there are Jews who are spying and peeping on you all the time.

That's how they enforce their tyranny.

They've got their, basically, a Christian church is like an enemy citadel in white society. So, they're the ones who traffic in all the foreign invaders, the churches. It's not liberals who are doing that, even though most liberals... Yeah, they're trying to shift attention away from Christianity, because they want to create the positive association between white people and Christianity, so they can hook white people into their churches, and thereby neutralize national socialism.

And then they want to blame liberalism for everything, so they can get the Christians to go and attack their own people, who they call liberals, which is anybody that's not Christian. That's how the dialectic works with these types, with the Jews and their puppets, because... You're putting out. No, Christianity is a slave religion, basically.

Yeah, it's sort of like a... I kind of look at the, you know, the liberals, I kind of look at that as, like, you know, the Punch and Judy sketch, where it's just like, oh, look over here, ah, and then they pretend to attack each other, and then, you know, look, it's gone, ha, ha, ha, ha. Yeah, it's really quite pathetic, as well as malevolent on the part of the scum who control the society, to manipulate the population in that way. But obviously, Jews are psychopaths, so they do not care about the existence of other people, except as a slave to themselves.

And all those who affiliate themselves with them are also psychopathic, and basically ego-driven. And most of the slaves that they lord over are ideologically brainwashed or brain-polluted, either with Christianity or with leftism, whatever you want to call it specifically, liberalism or communism, whatever particular term, leftism, so... Egalitarianism, basically. Yeah, and they're both egalitarian creeds, so they're all brain-polluted, and they're not capable of thinking outside of that.

So, if you make yourself a target in a small town, then if you don't have any means to get out of there and go to another place, then you're going to be in very bad circumstances. So, I advise, personally, for people just to go to smaller cities, like under, ideally around, you know, between 50 and maybe even as much as 300,000 people, preferably, you know, within like the 50 to 200,000 people range, or maybe more like yeah, around that 60 to 200,000, because where I am here is about 70,000 people in the whole area, and it's got a little bit too much of a small town feel to it, although you get some degree of anonymity. I think it's also because of... So, do you have any suburban areas? Well, it depends on how far they are from the cities and how big the city is that they are sort of annexed to.

Basically, the bigger the city, the more further away you want to be, as a general principle, for this sort of strategic relocation, balkanization issue. I think the balkanization we pretty much refuted, you know, it's pretty clear that that's the Jews' intention, that their whole purpose is basically just to try to split up society so that they can divide and

conquer, although other people have disagreed with that and said they don't need to do that. That's why I think, actually, again, I don't want to interrupt.

No, go ahead. I was going to say, I predict that there may be a civil war in the United States because of this election. They say, oh, you know, Trump might accept the results of this election, so maybe they might have some, like, fake civil war to, you know, try to divide and balkanize, in the literal sense, the states.

Yeah. Some people have said that they don't need to do that because they have enough power that they don't need to bother splitting the nation up at all. But at the same time, my understanding of the balkanization thing is that if they do that, if they were to create artificial chaos, a race war, and then try to create, as Billy Roper always preaches on about New Africa in the southeast and in the southwest, Aztlan with a mishmash, and then in the interior you have whites, if they try to do that, then they can justify bringing in the United Nations to, quote unquote, quell unrest or to try to help people.

And then who will be the United Nations? Chinese, Russian troops on the soil. And then they can basically target the whites more easily on the interior because they will have troops in New Africa and Aztlan as a sort of, like, international landing point. So if they were to do that, because I think they already have international zones in the states for China and so forth, already they have specific designated areas where they have total control over for the most part, I've heard.

So balkanizing it is probably what they want to do because that way it just obviously divides and conquers people and they can get all the white people in a more finite space and more easily target them. But then again, who's to say? It just appears that that would be something they would want to do. As to suburban areas, I would say, you know, it's all well and good if the place is small enough that you are not going to be subjected to any sort of raids from the inner city and you can defend your suburb.

You have like some type of security company that you run that guards your community or some neighborhood watch organization or something of that sort. And yeah, the bigger the city, the more danger there will be. So I advise people just to keep away from the large cities.

But of course, that depends on what your intention is. Yeah, I also would pay attention to demographics on top of it for obvious reasons. Yeah, basically.

You don't want to be around large numbers of non-whites. Because then you'd end up, you know, like the terror diaries, basically. Yeah, pretty much.

I drew a little map about the balkanization, which I shared with you before. I don't know if you remember that. I just know that the balkanization, those pushing it, they're all for different parts of the country.

Like, you know, Covington was the northwest and then Tom Kaczynski is the northeast. And then I think Dr. Michael Hill and Billy Roper are the south. Yeah, that's their sort of way they have of pushing that.

My opinion is basically that so far as I know, not having really been to the states to any great extent, the safest spaces are basically a sort of like elliptical pattern overlaid on the interior of the states, starting on the northwestern tip of it in Washington, and then drawing it like an elliptical shape to around maybe Tennessee, and then maybe dipping down just a little bit to northern Arkansas and northern Oklahoma and so forth. Are you referring to the Ozark Mountains? No, I'm talking about my ideal map for strategic relocation and safety in the states if people are interested in relocating and not remaining where they are. Then basically upper middle America.

Yeah, sort of. That's pretty much seems to me the best idea. And then maybe, of course, maybe somewhere in Maine, but then you're trapped around New York and Boston and all those places.

And that's sort of right around the military industrial complex. You're also right below Canada, right? Yeah, right there. And that's near Ottawa and around there, too.

And that's big time military and industrial region. Are you in southern Canada geographically or? I guess, I don't know. Like what state do you think would work best for you, do you think, generally? For Canada? Maybe not specifically, but.

Basically, for me, in my opinion, Canada, it depends on where you're going, how far north you want to go. For the most part, obviously, as everybody knows, Canada is very cold. It's a very dreary country.

Probably wintertime lasts five to seven months of the year, depending on where you go. Probably I would say cutting off, starting from the West Coast, it would not be anywhere around Victoria or on Vancouver Island, because that could sink into the ocean. It could be used as a Chinese military staging point or Russian.

It's right next to Vancouver. Vancouver is basically taken over by the Chinese. Going further east, you have in what is called the interior of BC, of British Columbia, on the West Coast, the most westernmost province.

I would say you can go to around the Okanagan Valley and around there. That is safe. There's not very many people around there, comparatively.

Maybe drawing a line all the way into the next province of Alberta to the east, but under Calgary, not to the north of that, and then tapering it off. Of course, in Saskatchewan and Manitoba, those are the prairie provinces, which are very dreary and dull and very cold. I personally wouldn't waste my time even going in that direction.

Having lived in the middle of the country in Winnipeg, which is the murder capital of Canada, that's a very non-white infested country, or a city, a Jewish-controlled city. Sort of like the Chicago of Canada, basically. Yeah, that's what it's notorious for, known as, that it is the Chicago of the north.

That's lots of non-whites of Negroes and Filipinos and Redskins. I think the Redskins are like 20% of the population or something like that. Same with Regina, Saskatchewan, and Saskatoon, Saskatchewan.

They dumped a bunch of Somalians in there to a great extent, making it more or less an unlivable place, very high crime. Same with Calgary. But of course, everywhere you go in the country, it's pretty barren outside of the major cities.

But even then, they keep dumping the non-whites in. But the main problem with Canada, obviously, is cold. And that's mainly the real issue.

And it's a pretty barren country for the most part, everywhere you go beyond a few of these larger cities. Southern Ontario is like the sort of Mordor of Canada, is what I refer to it as, a sort of hot bed of manufacture and non-white immigration. And there's this sort of dirty place.

Jew-controlled, basically the New York of Canada, equivalent to New York, and Ottawa is equivalent to Washington, D.C. So they're basically more or less around the same area, Montreal, Ottawa, Toronto, within a few hours of each other. That whole region is just overpopulated. I wouldn't want to go there.

If you're French-speaking, Quebec would probably be tolerable enough. Fredericton, which is in New Brunswick on the far east coast, east coast gets a lot of storms. There's not very much jobs available there.

I heard from somebody that they put in about 750,000 Arabs from Saudi Arabia in Halifax, which had only about, I think, 350,000 people. So basically, that's total ethnic cleansing right there. And the people in Halifax were like the you know, the old stock Irish and British Canadians who created the country in like 1600.

So that's a deliberate genocidal act on the part of the Jews there to put them in there. But for the most part for Canada, I would just stick with a sort of western Canada, mainly from like the Okanagan Valley in D.C. to around where I am right now. I'd prefer not to be in any of these places where there's lots of Christians, just in general, because it makes for a very unpleasant place to live.

Very hostile people. I don't know about you. Where you are, I guess it's more a liberal type of region.

You don't have to tell. It's kind of more like liberal and a lot of mestizos. You know, that's

basically where I'm at.

I'm in the middle of the, as Jordan Peterson would say, I'm in the belly of the whale, basically. The belly of the beast. Yeah, basically.

I mean, would you kind of agree with that without giving too much away? I'd say so. I would say that that and a couple of the regions in the states are definitely hot zones that are going to erupt. Yeah, like my brother, he's in Chicago and that's like in the middle of that.

That is like a dead zone itself. I keep telling him, like, you got to get out of there, man. But he's like a brainwashed liberal type.

He doesn't listen to me. Yeah, most of those people have to go down with the ship for the most part because they're incorrigible. They have no willingness to listen to others or be receptive to information outside of their dogma.

Yeah, it's like the time where he was pushing all this Black Lives Matter bullshit. And, you know, he asked me about it and I told him, you know who controls Black Lives Matter, right? And he was like, you know, you know, and asked him, you know, do you know who controls the media? He said, they're a bunch of white people. And I'm like, no, it's Jews.

And then he's like, so are you anti-Semitic? And I'm like, no, you know, it's just a fact. It doesn't mean if I am or not, it's just a fact. I mean, he had no response to that.

That's a perfect microcosm of the brain pollution of the average white person in this society that they, as soon as you say the word Jew, then they go on a defensive and they pretend that they're defending Jews as if the Jews are a perennial victim. Well, it's kind of like with any group that isn't white. It's like, you know, if you criticize a black person, you'll, oh, what are you, a racist? Right.

But if you criticize white people, then you get a gold medal in the mind of these retards. Yeah, exactly. Weaving a rope by which they'll be hung, these Lib Tards and Christ Tards, they have no clue about reality.

What is your opinion about if you were to relocate, what section or region would you think would be optimal? I would say probably around what you pointed out. I just think that the, I don't think the Butler plan is, I don't think the Pacific Northwest is the perfect spot. Like, you know, they would make it out to be because I heard that there's actually a lot of Asians up there.

And Maine, like you said, is around New York and Boston. And in the South, you know, obvious, you know, you already know why not the South, you know, despite, you know, a lot of those in this sphere being from there. I think it's because of having to deal with being around, you know, yo-yo types more.

I think that's why they're more like that. Because a lot of those I've talked to are from like, you know, even just the East Coast. I mean, there's really not many on the West Coast that I've encountered, at least on the web.

I haven't encountered any in real life. Most I've encountered in real life are, you know, it's like the movie They Live. They're just like zombies.

They don't know anything about what's going on. Well, most people are a clueless bunch of retards. They just think that like all the problems in the world are like, you know, for the libtard, it's like, oh, it's Trump.

You know, it's just that's the scapegoat for all the world's problems. And then the conservators are just like, you know, radical Islam, you know, let's go bomb, you know, yeah, you know, they'll, you know, send them all, send the troops. I think they're powerful by beating the war drums to serve the Jews in the name of, you know, childish sentimentalism, peace and God and various other meaningless words.

So yeah, for the democracy and all this mushy saccharine language. For the situation, it's basically for the states on the south. Southwest is the mestizos, southeast is the Negroes.

The northeast is the Jew, southeast is a Jew to some extent. And then I guess maybe that sort of Rust Belt area, they've got a lot of Jews too, like in Pittsburgh and Pennsylvania, that whole, I guess that's more like the northeast still. So yeah, it seems like no matter where you go, they dumped all the non-whites in everywhere.

So anywhere in a major city, then you're. I would say at least anywhere, yeah, anywhere that's a major city, an urban area. I would especially stay out of really big cities because if something broke out, you would be basically left, you know, to go down the ship, as you said.

It's like that footage of during all this, you know, Black Lives Matter bullshit, there was a guy filming outside of his window and he thought that he was basically virtue signaling and he was giving them a thumbs up. And then, you know, someone threw a brick through his window and smashed his window. He's like, we're on your side.

We're on your side. Yeah, I just don't realize is they think that they are, you know, they think that, oh, we're all in this together. You know, we're, you know, we're really, you know, we're all just going to get along and, you know, but what they don't realize is that they hate you.

You know, why do you want to try to work with people who hate you? You know, It amazes me that people are so gullible and naive that they project their own thoughts and sentiments on other people, on other non-whites, I should say, since they're obviously not people, and they don't realize that. It's like they go up and, you know, they

don't even realize it where they talk in this kind of Uyghur language and they're like, hey, man, or whatever, you know, yo, yo, bro, or whatever it is, they go up to them and they just kind of look at him and laugh. Like this guy's an idiot.

You know, you're buying into, you're our doormat, basically. That's how they look at these Uyghur types. Yeah.

Well, basically there's no getting along with non-whites. They're just there to use you and then to try to kill you if they can get enough power. That's really all it is.

They'll never get along with you and they'll never blend in with you into some sort of one world brown mass of garbage or something like that. Even South America. Ocean of mud.

Yeah. South America is a perfect example of the failed nature of multi-cultist societies. You know, there's nothing but crime there all the time and the people there are just a bunch of apathetic, lazy, stupid, violent savages for the most part.

I mean, they've got drug dealers driving helicopter gunships, you know, having gun battles with police helicopters or military helicopters. It's just, you know, a ridiculous level of crime and violence. But I guess so long as the Jews can hide away in their gated communities behind their military slaves and they don't really care very much.

What was Klassen's, I know in Klassen's refutation of the Balk, didn't he just advocate us all just forming our own communities? No, he basically said that if the guns were taken away from the Americans in a free speech, then we'd be going to basically war against the federal government. So far as I can recall, he was basically saying, yeah, basically. Of course, it was to say that he wasn't just an operative or a Jew himself.

You can never really be sure about that. But yeah, I'm not too sure that people will have too much of a willingness to be uprooted from their properties and homes that they've been there for countless generations and just relocated en masse to wherever. I think Billy Roper's book, *Haste in a Day*, is a pretty good, pretty accurate predictor in terms of what may very well be planned.

Because the book, the first part, I only read the first of three because I couldn't tolerate the massive details that it entailed, all the characters and their interrelations and all the Christian identity bullshit. But it still is a pretty useful understanding of what may very well be intended to occur. He basically says that in California, the Chinese or the mestizos start trying to act up and then they start trying to have their ads land and they create chaos.

And then the Chinese come in and quell that and basically just take over. And then there's like gang wars between the triads and various other Oriental gangs, which is also depicted in O.T. Gunnarsson's *Here the Cradle Song*, another valuable book, which is

situated around Los Angeles in that region. From there, the mestizos end up having a lot of disease spreading around in their community and so forth.

And then the Chinese basically take it over, but the Chinese can't hold it. And then the Chinese try to strike against America and America nukes them or something like that. And then it all starts falling apart.

Then there's another there. The country divides into regions. You have New Africa or something along those lines in the south.

There's a faucet line. And then I'm just saying what Billy Roper's book says. And then there's a there's like some sort of like Christian Zionist country in Texas.

Texas becomes its own place. And they try to forcibly evacuate the Jews to go to Israel because they think it's their Christian duty. And then what happens? I think New York probably gets blown up.

There's another another enclave in around Salt Lake City in that whole region. They basically take it over. And The Cradle Song mentioned Ozilong.

I can't remember exactly, but something along those lines, if that's what their intention is. It all gets started off by these ethnic riots, which is what's happening right now, that all the mestizos start trying to create chaos and then they end up screwing themselves over. So I'm sure that's what will happen, basically, for better or for worse.

So that's why I'm thinking there might be an order of some type behind the scenes, like a pro-white occult order that's actually more influential than we know. Only it's just not known because we only know what the media tells us and what we can see with our eyes and infer based on reason and whatever sort of information we get in our lives, which is, you know, limited to our particular circumstances. So we can't really know all the details of what their plans are.

But yeah, I'm pretty sure that if there is any balkanization going on, then it may very well be, you know, a positive conclusion in the end, regardless of what happens there. Right. I can see there being a very massive race war between the mestizos and the whites in the southwest, though, from from probably like Texas to California.

And then from the southeast, from wherever, maybe like in the Carolinas to Louisiana, that whole region there will be totally ripped up through the Negroes. But I highly doubt that anyone's going to be relocating. All the white people aren't just going to relocate to any sort of like.

No, no, no, no. That's that's the issue with these novels is it's really just fantasy that, you know, everyone would just magically retreat to a certain enclave and that's not going to happen. No, I'm pretty sure that the more they concede to the niggers, the more quickly

they will screw themselves over.

And in doing so, then it'll just be a takeover again by whites. That's what Billy Roper said one time when I was on Bateman's show like three years ago. He was Billy Roper was on there and he was he didn't have audio, so he could only communicate via the chat.

And he was I was asking him questions about whether, you know, this bulk thing, what would occur? And then he was saying, well, you know, once they screw themselves over, then they can just be either done away with or, you know, they'll just dry up on the vine, like Ben Classen says, because they can't sustain their own societies. Right. So.

Yeah, that's it's really the system itself that has elevated them to where they are now. If that were to go away somehow, it would collapse in itself, completely fall apart. Yeah, because the only work that they do is just sit around all day in some easy government job on the one hand or on the other hand, just flip burgers or they sit around on welfare.

They do basically absolutely nothing when it comes to any sort of infrastructural maintenance or any sort of technical skilled job or something that keeps society together. So inevitably, it'll blow up in their face and they won't be able to maintain. Yeah, last time I spoke to you, you mentioned about being a fanatic and this is this was a pretty good little monologue from one of the characters on page four and seven.

And I'm tired of you, Goddard, you're a fucking fanatic, fanatic, fanatic. You're goddamn right. Fanatics are people who change things.

Otherwise, we'd still be back in the caves. A fanatic is a guy who believes enough is enough in his cause to win. Alexander the Great was a fanatic.

He endured a god awful hardships and then cried when he thought there were no more lands to conquer. Jesus Christ was a fanatic. Why die on a cross when it would have been so easy to shut up and run his old man's carpenter shop? Muhammad, Gandhi, Columbus, Cortez, Edison, Joan of Arc, the Wright Brothers, Henry Ford, Florence Nightingale, the first fewer histories full of fanatics who spent their lives humping for what they believed rather than sitting at home on welfare, drinking beer and watching TV.

It's to save timid little people who never win big, never lose big, never do anything, and never are anything. Oh, they bitch and whine about fanatics, but they're happy to profit from those fanatics' blood and tears, their discoveries, their inventions, their struggles, and their martyrdoms. Damn it, we're up against people who know what racial survival is all about.

Those people play hardball. Either you play better than they do or we're out of it. Now, Lessing, you join the game or get the fuck off our team.

That was a pretty good little monologue there. Yeah, I guess Lessing is a character who, as you said, is sort of liberalized at the beginning, and that's sort of his, the average person's coming to understand, or the person who is reachable coming to understand the distinction between those who are heroic in their consciousness and those who are just possessive individualist self-seekers who don't care about anything, any higher objective or purpose than their personal animal existence, I guess you could say. So, inevitably, that's the sort of mentality you need to have at this point in time, to have a more heroic, virile spirituality, not a willingness just to lay down and, you know, conform or go along with the agenda.

I think there are enough people in the States that will be willing not to lay down. They obviously have a more rebellious mentality than a lot of the other white countries. So that's a good thing.

I would look upon it as a good thing, so long as they're not steered toward, you know, attacking their own people like the Jews want them to, with the liberals' PSYOP on their part, or the Muslim PSYOP, or the racist PSYOP, where they get all their more aggressive conservatards to attack their own kind. Right. Anything else you'd like to get out there? I think that we've covered a lot here.

Yeah, it should be a good enough stream for tonight. Nothing really else that I have to say on the topic, unless you have anything in mind about any relocation advice for people, or anything of that sort. Basically, whatever is best for survival, you know.

I mean, that's a pretty obvious thing to say, but I would just say, look out for what's best for you, and don't just retreat, run off into the woods, and retreat and run away. And, well, at the same time, you obviously don't want to run away and live in some big cosmopolitan third world area either. So you definitely need some balance with where you're at.

Yeah, because in cities, that's sort of an escapism as well. It's anonymity, where you just become absorbed into the endless mass, and you don't really have any functional role other than whatever job you're working in, and so forth. It's just beyond your capacity, really, to do anything necessarily, although there are things you could do if you are willing to take big, big risks.

But if you're not, if you want to have more sustainability, or if what you're doing doesn't entail any sort of revolutionary activism, then, you know, maybe it would be better to relocate to a more sustainable environment, maybe like a 50 to 200,000 person city, or even a lower population. But the lower you go, the more of a target you'll be, the more you'll stand out. So beyond that, it's pretty self-explanatory.

I would say people should try to coordinate with other people, maybe, and relocate, and even buy communal property, and live in that regard, because it would be certainly

easier than trying to do it all yourself, especially if you could buy a property outright, as like a shared accommodation type thing, buy a house, and then just all the people having a portion of it. But of course, you'd have to be willing and able to trust another person, and that's always a big factor. There's always problems that occur with people and their interpersonal dealings, and plans change.

But when people understand that their lives are at stake, which they are at this present time, then all the petty differences will have to be swept aside. And people will have to abide by a more honorable set of ethics, because that's the condition of survival in life. You can't survive just being one of these money-grubbing sharks, like people have been during the baby boomer generation and around that time, where they just lived for themselves, and getting as much gain as they can get, Gen X and various other of the younger generations.

That time is basically over now, and people need to start thinking in terms of collective survival and collective development. Yeah, thinking sort of more as a pack than as a herd. You don't want to be following, you know, kind of like in the case of, you know, my brother, or those who would fall into that trap of just following the status quo of what everyone else is doing, what everyone else believes, or, you know, it just, I think if more would break out of that matrix, I think that they would have a shot at survival.

Yeah, you've got to find trustworthy contacts. Maybe for some people, try to secure parental or grandparents' property or inheritance, you know, get them to pencil you in on the title or something, so that you can ensure that you'll be able to, you know, have a secure residence, and you can't be, you know, you can't wind up with them trying to sell it off, so they can maintain their decadent lifestyle, and then screw you over, and then you wind up in the gutter like myself, which is what happened to me in the recent years. So, you know, relying upon trustworthy family members and so forth is always a good fallback, because blood is always thicker than lucre, than water, and, you know, you might have all the currency in the world, but you're just going to be, you know, swimming with the fishes if you're all alone, because all the money is not going to save you.

You can't buy loyalty from people, even if you can hire security guards and everything else, if you're all by yourself and you're a target, because you don't have any backup, you don't have any people to get your back for you. So, you make yourself a target by isolating yourself, you know, you can still be a lone wolf and still work with a pack as well, but you don't want to be, like you said, a herd animal, and you also definitely don't want to be some mangy cur that's just crawling around in the ghetto area or something in the midst of mass chaos all by herself. Yeah, there's definitely no use in compromising with people who basically want you dead.

Right, because you have to understand that, as George Lincoln Rockwell said, the

uniform of the next war is the color of the skin. It doesn't matter how friendly you are, because they're not friendly to you, and that's the whole crux of the matter, the whole principle, is they understand that you are an enemy biologically, naturally, and they don't go beyond that, because they don't have a higher consciousness. So, even though white people go beyond the purely natural animalistic state of consciousness, non-whites don't, and for that reason, they just, they will only act within the parameters of their natural tendencies, which are to basically be a more animalistic creature, basically.

They fight, they fornicate, they steal, they thieve, they rob, they have no, you know, honor in the sense of white people, they have no other regard or altruism, really. It's just pure selfishness is the basis of their behavior, and beyond that, it's just a sort of like collectivistic animalism, where they're a member of their herd, of their collective consciousness, but don't have any, you know, real differentiation or personal identity. It's just like a mass, you know, a brown mass, for the most part.

Yeah, it's like a big, sort of like you're trying not to drown in, you know, you're trying to swim in an ocean of mud, basically. Yeah, so you want to get away from that. You know, you don't want to drown in it, like these wiggers are.

Yeah, or Christian missionaries and Christians who are always hanging around the non-whites, trying to virtue signal. You know, all that will lead to is you're being hacked to pieces by them and served up as a cannibal feast, like it shows in the Turner Diaries, which is pretty much inevitable what will happen to a lot of those people, which is unfortunate for them, because a lot of these people can't get away from where they are. Of course, they could always just hitchhike away if they really wanted to.

I would rather do that than live in an urban jungle and be killed. I mean, if you're in the States, you could always relocate to a more sustainable area, just hitchhiking or walking. So that's what I would do rather than just be trapped in the city.

Yeah, in a lot of these cities, you really have no gun rights either. So you wouldn't be able to defend yourself if one of these savages broke into your house and try to, you know, rape your family or whatever. Yeah.

In this country, you have an obligation to leave your house if someone breaks into it. You just have to, like, abandon everything to them and then call the police, which is absolutely pathetic. Yeah.

And I've heard things about people having to go to jail for using it in their own house, using a gun in their own house, which I think is kind of ridiculous. Yeah, pretty much. There's no self-defense in this country.

That's the nature of a socialist country. And that's what they want to do for the whole world is turn it into a giant prison, basically, where nobody has any ability to speak, any

ability to have voluntary association. You can't live with only white people.

You can't have a gun to defend yourself. You can't have your own land. You know, just a dismal prospect for the future.

So you may as well stand and fight. Otherwise, you're not going to have a future anyway. So, you know, if you want to call that living right, being a total slave, better to die than to be a slave.

So you may as well get prepared for that. Yeah, it's kind of like that phrase, it's better to live, you know, one day as a lion rather than a thousand years as a sheep or whatever. Yeah, better to die like a man than live like a coward is another variation on that.

Wasn't that lion and sheep quote, was that like a Mussolini quote or something? Not too sure. But yeah, it's definitely an antichrist quote, because the Christians say that lions should lie down with lambs. But obviously, in nature, that doesn't happen.

So it's sort of Nietzschean. Yeah, I remember one incident when I was working in the middle of night in security with this Negro from Eritrea. He was delighting and telling me a story about how one old white couple went on safari to Africa and the white woman was attacked by lions and the Negro nigger game wardens who were accompanying the white couple never interfered because they claimed that the lion was an endangered species.

So they just let the white woman be eaten by lions. And this Eritrean guy seemed to delight in that like he got off on that sort of thing. He was kind of laughing at it.

Yeah. So that obviously shows what a sick bunch of scum. Yeah, what a sick bunch of scum those non-whites are.

And that's the way most of them think, too. Their behavior proves that. A lot of the ones that I knew were, you know, kind of perverts.

They were perverts and they were also very childish and very. I remember one guy back in high school. He was like this mulatto kid or whatever he in my senior year.

He was like stalking a 14 year old or something like that. Very creepy stuff. Yeah, they're all mentally ill, especially the mongrels, because the mongrel is a product of incompatible genetics, incompatible soul types.

Yeah. So it basically makes them schizophrenic and. Yeah.

Yeah. It creates an inner tension, a sort of inner chaos that translates itself into outward chaos. So that's why the more non-whites or mestizos you hang around, the more non-white genetics they have, the more chaotic and liable to bursting out with violence and aggression because of their inner chaos.

And it's just easily inferable based on their behavior. You know, it's just it's just not it's not worth our time to deal with them. Now, if you have the fortune to get away from them and if you don't, then you're definitely your life is basically at stake.

Yeah. Another prediction I'm just going to throw in there was that there was going to be a Vietnamese Chinese war of 2010. And that basically in the novel really damaged California.

I'm just flipping through it here. I know Billy Roper's book Hasten the Day, the first one talks about about the Chinese war with America. And there's all sorts of other other activity around there, too, like India was also struck by Pakistan and so forth.

Yeah. I anticipate in the coming years a war against China or war against Russia. Yeah, it's probably what will be planned in the works.

I'm not sure. Maybe Iran, too. Maybe.

Yeah. So who knows what will be? I think I don't know if it was the Turner Diaries or KD Rebels, KD Rebel by David Lane, but they talked about that also about, you know, the mutual destruction of China and Israel. I'm sorry, of Iran and Israel.

So let's hope something like that happens. I certainly wouldn't shed a tear. Yeah, the entire Middle East, for the most part, there's nothing but chaos for the most part over there.

Yep. That's why it's good to be as far away from there as possible. You don't want to be anywhere near the Middle East.

Yeah, it's unfortunate how Egypt had a lot of, you know, they had the pyramids and things of that sort. But now it's obviously just crime ridden. And if you were to tour over there, you'd probably go and get beheaded or something.

Yeah, it's usually what happens to all those liberal idiots who go and tour around in those places. Yeah. I heard this story a couple of years ago about a couple, a liberal couple, and they were just like, oh, we're just like, here to enjoy, you know, different cultures because it's, you know, diversity or whatever.

They were around there. They're biking. And I think it was Egypt or something like that.

And they got beheaded. I mean, it really is just. It's amazing how stupid these people are.

They're just. What's that phrase? Lamb to the slaughter or whatever that phrase is. Well, of course, a lot of those events are fakes so they can blame Islam and, you know, curry favor with their conservator demographic, the Jews.

Yeah. I remember when that happened, it was like, you know, these, you know, the them and the Christian Zionist types were like, you know, see, radical Islam. Look.

Yeah. But the point is that that's that obviously those things happen all over where the non-whites are. More non-whites equals more crime, basically.

So keep away from the non-whites wherever they are, because obviously they're just a potential crime waiting to happen. And if you entangle yourself with them, then they'll just screw you over and use you and lie to you, cheat you, attack you, rape you, kill you, torture you, do anything to you that's not something you want. So an interesting quote here is from Nietzsche's *The Antichrist*, and this was quoted in the novel because at the beginning of every chapter, it usually would be quoting something.

And sometimes it would be quotes from hypothetical things that would happen in the future, like speeches of characters in the book, like, you know, so-and-so 2041 or whatever. The Jews are the most remarkable people in human history because whenever they have been faced with the question to be or not to be, they've always decided with an uncanny insight to be at any price, even if that price was the radical falsification of human nature, naturalist reality, and the entire inner world, as well as the external world. Yeah.

Maybe that was the H. L. Mencken translation, because I know that Nietzsche didn't like Wagner because of his beliefs later in his life, or according to his later writings, it said that. Yeah, Nietzsche has been called a half-Jew, so I'm not too sure if I really trust Nietzsche entirely, but I can say that some of his works have redeemable qualities beyond good and evil. It's got some value to it.

The *Genealogy of Morals* has some value. *Twilight of the Idols*. *Will to Power* has some decent sections in it.

The *Antichrist* is a good, scathing reputation of Christianity and its evil influence on white people throughout history. Didn't Mencken translate that one? I believe so. The best translators are Thomas Kahneman, Anthony Lodovici, and H. L. Mencken, because they were the ones who were subscribers to National Socialist Values.

Yeah, I have Mencken's book, *Mencken Christomathy*, and sort of a compilation of a lot of his writings. And yeah, he had a very witty and sort of, he had a very extensive vocabulary. And yeah, he was known towards the end of his life.

He kind of, or actually, no, it was after, I think it was after he died. His reputation took a hit in the publishing industry because of his beliefs, you know, and of course in the big publishers, you know, no, no, no. Right, because he was an anti-Jew.

Yeah. Yeah, that's definitely something that needs to be done, is to redeem a lot of these old, not as popular authors, or not authors necessarily, but. And Mencken is sort of, in

the 21st century, he's sort of fallen into obscurity for the most part.

Yeah, there's quite a lot of these figures. You had mentioned before, Frank Baum, the guy who wrote *The Wizard of Oz*, that whole series. You only hear about *The Wizard of Oz*, but he wrote several volumes of books in that series.

And I'm sure there's a lot of cryptic allusions to Jews in them as well. Yeah, and I know that you thought that he, because of his last name, you know, I kind of did as well, that he was a Jew. Yeah, I thought he was.

I thought he was a Jew revealing what Jews do in *The Wizard of Oz*. With *The Wizard of Oz*, and yeah. It makes more sense that he was actually not a Jew, and he actually advocated the extermination of the Redskins.

Yeah, like, it's funny, you know, you go and watch the movie, and it's like, the Wicked Witch is like, ah, ha, ha, ha. Yeah, well, she's Jewish, obviously. And you have Glenda, the Good Witch of the East, who is a representation, probably, of like the, of Astra, or Freya, or the Sacred Feminine of the Nordic, you know, Arian.

She's obviously Arian in appearance. And that was made by Walt Disney, and Walt Disney was a 33 degree mason, but he was also anti-Jewish, as William L. Pierce proved in some of his works. So, or his discussion of his content.

Disney had quite a lot of implicit anti-Jewish stuff, like *Snow White*, you know, the witch in that is a Jew. Yeah, and Disney's, pretty much until Michael Eisner took over, they had sort of allusions to that sort of thing. And even in just the movie, *The Jungle Book*, you know, basically the crows were sort of like caricatures of, you know, bats.

Yeah, it's pretty, some of the old cartoons are decent and redeemable, because they actually, you know, show what is in an allegorical way. Obviously, they were based on stories that were written for that purpose, as a sort of revelation of what, of the method, or whatever. Early Tom and Jerry cartoons, you ever see those? I used to watch those as a kid as well.

And of course, they made crappy ones in the 80s, but these are the ones from the 50s. Yeah, I remember there was the maid, there was like the black maid or whatever. Not too sure exactly.

Yeah, there's all sorts of cartoons that are redeemable, those old ones. You know, the racial cartoons, old Disney, old Mary Melodies cartoons from the very beginning are pretty funny stuff. Yeah.

But yeah, then they started right around, it all changed right around World War Two, as soon as they got the victory, the Jews, and they started the anti-racist rhetoric. I wrote down a quote today that I read in the translator of Julius Evola's *Three Aspects of the*

Jewish Problem that is quoted. It says, this is a quotation from a Bolshevik leader called Selenkov from 1922.

It says, we must create a climate of anti-nationalism and anti-racialism amongst whites. We must reduce patriotism and pride of race to meaningless abstractions and make racialism a dirty word. So that's exactly what they did.

That was 1922. Yeah, Professor Carrie, I believe, translated that. Yeah, that's, I just finished reading it today, actually.

I think it's pretty funny that on those translations that he did in, you know, 2001, 2002, it says, Tompkins and Carrie, but from what I've heard, Tompkins never actually did any translating. Yeah, apparently he was, he was basically a thief and a falsifier of, or just a sort of, I don't know, doing a botched job just using a translation app. Yeah, even Carl Young told me that he never did any translating of the Golden Cord.

He paid his friend to use a translator app and that was how he did the Golden Cord. Yeah, so he's basically a charlatan for the most part. Basically.

I fell for it myself, his mystical rhetoric that he always blew out of his ass in his emails to me that I had communicated with him because I was trying to find more out about Serrano. But then he, he basically just gave me a bunch of silly little mocking comments in most cases where he, you know, as a typical wannabe occultist, he sort of like denigrated me in all sorts of secret ways and so forth. Yeah, to me, he's just probably a junkie hustler type.

And, you know, like when I, when I, when I interviewed him that time, it unfortunately didn't record. But when I was talking to him, he didn't even seem like he really knew what he was talking about. I was asking him all these questions about Serrano and he was just kind of like, yeah, yeah.

Whoa, man. Whoa. Yeah.

Like he didn't really have much to contribute. He just was kind of like, whoa, yeah, that's true, man. Yeah, he wrote a book, which is based on Serrano's writings.

It's sort of like a ripoff of Serrano's writings. That is more or less just a facsimile, like a pale reflection of Serrano's work in a sort of cheesy dumbed down form. And he passes that off as his masterwork or whatever the case.

Was that Uhuru or whatever? Yeah. It sounds like the Proud Boy is how they always say Uhuru. Right.

Maybe that was just his allusion to Uhuru himself, but he's a supporter of that race mixing, you know, because Uhuru means like peace in some Negro language. Yeah, like

Swahili or something. Yeah.

Like that Star Trek figure. You know, that black female in Star Trek. Oh, right.

Yeah. Yeah. Well, it's funny about Gavin McInnes.

He created that group and he had a book called How to Piss in Public. And the reason I haven't burned it is because it's literally the worst cover I've ever seen. And whenever I happen to have a guest over or something, I show them that cover and I say, this is the worst cover I've ever seen.

They're like, wow, that's a really bad cover. What is the cover? It's literally just him holding a beer can with a bear, bear hugging the bear, and they're drunk. That's the cover.

It was How to Piss in Public, and it fell out of print because I think he wanted to be taken more seriously. So he renamed it The Death of Cool. Yeah, I never paid any attention to the alt, right? It all struck me.

I have no idea what that guy is up to now. I remember a few years ago, I would pay attention to these people. Yeah, I never did.

I just looked upon them right away and I could tell that they're just operatives because it seemed like a cartoon, like a theater actor. So yeah, like Milo is a fed and then you have, you know, the fag Spencer and then you have, you know, Mike Enoch, who just looks like a fat Jew, basically. Who else? You have Babe Goldie, you had Lauren Southern, more like Lauren Simonson.

I'm trying to remember. And then now you have that Fuentes guy who seems to be like filling the void of those people. Yeah, it's basically just Christianity trying to survive.

That's all it is, trying to hook white people in so that they can use them to prop up their dying churches. Yeah, it's like you see him and then you have E. Michael Jones and then you have that Vince James guy. I mean, they're all clearly pushing that agenda.

It's sort of like a last gasp to try to hook people. What you're trying to do is basically just to co-opt Julius Evola's work to some extent in most of these counter-currents type instances. Yeah, what's funny is they would promote Julius Evola, you know, I think Fuentes actually used like, yeah, you know, revolt against the moral world, right? The tiger, you know, I believe that wasn't he anti-Christianity? Yeah.

Yeah. Yeah. So obviously these people are just trying to utilize other people's work, trying to stand on the shoulders of giants so they could make themselves look like they're taller than they are.

I think that they probably didn't read these works thoroughly because if they did, they

would notice that it doesn't go with what they say. Well, that's a good thing though, because it's a good thing that they're so ignorant because the thing is they just screw themselves over and then everybody knows that they're just a joke and that discredits them even more. See, the thing is, Christians can do nothing to salvage their religion other than violence at this time.

It's weird how he also was pushing that culture of critique book a lot and culture critique was, you know, Darwinistic and not supporting Christianity or whatever. So it is a little funny to see these Christian types promote that book. Yeah, they're just doing whatever they can to look popular and to affiliate themselves with whatever they can use to sustain their crumbling churches.

But soon enough, the whole of America will be crumbling with the Balkanization. Maybe it's all just a business. Well, yeah, as Patrick says, Patrick Siegman, you know, America's a Freemasonic shopping mall.

So they're all closed. They're going to be closing for business, for renovations. Maybe it's deliberate.

Maybe it's organic in part. I assume it's probably largely contrived. All these Black Lives Matter and Aslan and whatever movement that they're orchestrating.

But even then, you still have to be prepared for what's coming. So you have to relocate. You have to get yourself set up in whatever circumstances for survivability.

But I guess from now we could probably stop the stream. Yeah, I agree. I think we've discussed a lot here.

So yeah, nice talking to you. And I guess we'll talk later on other subjects. Sure.
