

the rainbow bridge loki and jack hart kaminski

Hi, Jack Hart here. This is Kaminsky Goes Ballistic. It's not a Jack Hart podcast in case you, you know, you think you made a mistake.

We're waiting for John Kaminsky due to the hurricane to having all kinds of technical difficulties. It came right over where he is in Florida. So it's got sporadic internet service and stuff.

I'm here with Loki. Loki, you're there, right? Greetings. How is it going, Jack? Very good.

Very good. I guess better. Well, you're in Canada.

So how good are you going in Canada? Yeah. I'm going down the tubes. That's all.

Loki, if I was in Canada, man, my only thought would be, you know, I'd be in Canada. That's exactly what I'm thinking about right now. I just don't know how right now I'm in the midst of a legal trouble and I'm in the midst of waiting around for that to finalize if it ever does.

So I don't know what to do until then. Yeah. Well, you come to play somewhere like Tennessee, Kentucky, all on the Cumberland Plateau, man.

It's, you know, you'll find you won't know the difference between the Canadian people and these people. They're all, they're all Scotch Irish and stuff. And it's the same people, the same people.

They're very friendly. And you know, there's no, it's pretty, it's pretty shlomo free. You know.

That's a good thing. Yeah. That's always a good thing.

I was thinking Idaho maybe or something in the Pacific Northwest, but it's a little bit cold too. That's where I am right now. Basically.

That's what I'm saying. That's what I'm saying. You know, the Cumberland Plateau is known for being like, first of all, I'm 1800 feet above sea level.

So if Putin wants to launch any of his tidal wave bombs, I'll be safe. Second of all, it produced all of that. I mean, you know, there's, it looks like Ireland around here.

Everything is green and more green, fat cattle all over the place. They got their Kentucky Derbys that they're famous for too. Right.

That's what I have. Kentucky bluegrass and stuff. It's, I mean, this is one of the, it's listed as one of the places you would come to survive an apocalypse, you know, in the world.

So anyway, we're supposed to be talking about the Rainbow Bridge and Heimdall, the, the guy who was the horn that he's on the watch for the giants. I thought the most interesting thing about the Rainbow Bridge is, you know, my whole thing is I started off with, with the Montauk projects with Preston Nichols, cause he was the progenitor of that. And he was a friend of mine.

We had some long talks in private and stuff late at night. The actual Montauk projects, the original name of it was Project Rainbow and it had nothing to do with like the Philadelphia, all that shit you hear about the Philadelphia experiment and stuff like that. It was run by John von Neumann.

It was before the war. Now, during the war, it was, it was broken off and then it was resumed as, as, as the Montauk projects. But the original name of it was Project Rainbow and it was supposed to cross the Rainbow Bridge, which it's, it's not pronounced a Rainbow Bridge, it's a Beavott, Beavott Bridge.

It's actually mispronounced, well, that's the English word, but it spans between Asgard and Midgard. That means the world. Right.

Bifrost. The Bifrost. The Bifrost.

Bifrost was supposed to say, yeah, yeah. But it spans between the gods and mortals. And this was the intention of the Montauk projects.

I did research on this because of that. And I ended up, you know, I got a little bit into Heimdall. And it's a, it's pretty, the strangest thing, well, first of all, when they tell you about Norse mythology, man, you know, I can look at like four different translations, five different translations of the runes of like old Norse, and it'll be five different, five different things.

It's even worse than Sumerian. So, you know, they really don't have it down pat, but I, this Heimdall is easy, easy, the shining white, Heimdall either means swarty, black, or shining white. So you figure it out.

But the strangest part about him is that he's, he's got nine mothers. And this corresponds to the nine daughters of Ran and Aja, the goddess of wind and sea, Ran being winds, Aja being sea. These are the nine wave medians.

And, you know, you talk about Nikolai Telsa, the secrets of three, six, and nine, this is actually revealed in the saga, the famous saga, the Herovar saga, which is one J.J. Tolkien used, where King Heimdall. Don't you, I think you mean the Havamel. Is that, is that how you pronounce it? Will you help me out with this Norse pronunciation? Yeah, it's the Havamel, Havamel, which is basically like one of the most significant portions of the poetic edda.

It's like, I'm, I'm basically about 77 or more percent Scandinavian. So that's sort of the background that I'm coming from. And one place where my ancestors came to Canada on one side of my family is actually called Gimli, Manitoba, which is just north of Winnipeg.

And Gimli is like the Nordic conception of, of like a heaven. Yeah. Was Ginnifor, wasn't that where, uh, they, they, they, they, they slayed the giant and they, uh, they made, uh, some Ginnifor.

I don't, uh, some Ginnifor, I know Ginnifor is, you know, Snorri Sturluson's talks about it, but I'm not quite sure how he does, uh, but in that saga, you got to help me out with the, see, I'm from Brooklyn and it's going, you know, we have Brooklyn China, uh, but in that saga that, uh, uh, uh, King Heinrich, he, uh, he's questioned by Odin, Odin disguises himself as somebody he's going to execute. And, uh, you know, you got a choice. You can have a riddle contest with the King, you know, and if you can beat the King, you can get out of being executed.

And Odin disguises himself as a guy to be executed. And he asks him a bunch of riddles about these wave maidens. Uh, and, uh, I, I got into it with, uh, uh, I did an exegesis on, on the, uh, I'm going to call it the Hero of our saga.

Just correct me when I go. The Havamal saga. Havamal.

Yeah, that's, that's the one we're talking about, the J.R. Tolkien one, by the, uh, the Valkyries, if, uh, gets Typhling, the sword of destiny from the island where the, uh, the, uh, the, uh, the berserkers all kill each other and the island is concealed. Uh, here, I got it right here. Oh, there's a new translation of the Havamal that came out in recent years.

By some guy named Elfric Avery, who's in Canada. And Tolkien's son did a translation of it too. Oh yeah.

Yeah. I heard that Tolkien's son was sort of like a traitor though, to his, I don't know, to, I guess you could say, it's an academic. What do you want? You got to kiss Shlomo's butt, you know, get nowhere.

Uh, says, uh, Young did the same thing. He sold out the Shlomo too, you know? Uh, so, uh, right. Yeah.

Serrano talks about that. And I know he does. When I wrote my book, uh, uh, uh, those that would arouse Leviathan, I, all I had access to was, uh, Young.

So, uh, you know, I use the transference. I use Mysterium Canunchonus, uh, and I use that Rosarian Philosophorum we were talking about before. But, uh, Serrano opened my eyes to, uh, the way I saw it, uh, you know, and, uh, almost like a Luciferian sense.

It's the same way, uh, you know, the S as far as I'm concerned, Miguel Serrano is, is the, uh, is the spokesman for the SS and, uh, I think the SS still exists and there is, uh, yeah, that makes sense. There's all sorts of evidence that he provides in his works, basically. Yeah.

I, I believe he met Hitler in the, uh, in the South Pole, you know, after, after the, after the, I don't see why not. Cause he was all over the whole earth visiting the Dalai Lama and everything else. So if he had connections to people that high up, then there's no reason to doubt that he wouldn't have met Hitler himself.

Well, there's a story about him where, uh, the, uh, one of the India from India, one of the, uh, the, uh, diplomats from India wanted to open up the Antarctic to, uh, like all the other countries that didn't have claims there and make it like an open thing. And it was, this was presented, uh, you know, to, to, to the world and they were going to do this and, uh, you know, the, the Argentina, Chile, uh, the United States all objected, uh, and they all sent their, their, their, their biggest diplomat standard to try to talk to him. Uh, the United States has sent a special envoy.

He's pretty famous. I forget his name, but, uh, he, he was talking, they couldn't even get a, uh, uh, they couldn't even get an interview with this guy in the room that was running, running India at the time. But, uh, Serrano was going out with his daughter, uh, and, uh, he, he, he talked to him and, uh, uh, and, uh, after that, India withdrew this proposal to do this.

Uh, actually he made a big thing out of it. He got up and he put a rose in, in Serrano's lapel and almost like, you know, this is, uh, uh, it was this act of subservience. And, uh, after that, uh, uh, Eisenhower was all in the same year or a year later that, uh, they, uh, they had that, that treaty, the Antarctic treaty in 58.

That way it prevented the Anglo American establishment from crowding in there and taking it for themselves. Yeah. And the Russians took the Russians to the right.

True. Two pincers of the same octopus there. Pinching Europe together.

You think so? I'm hoping Putin's had a change of heart here with his Z's on there, uh, on the tanks, you know, it has an occult significance, uh, yeah, yeah, the SS rune, uh, seen in a different direction or something, I'm not really too sure. There's an occult site that talks about the Vero girls and, uh, it was put out from, uh, it was being put out from Austria. It was an extension of the, uh, the Vienna, uh, uh, uh, group that was, uh, but, uh, they'd been been online since maybe 2007.

I think the guy was funny. He was chased to Iceland, but anyway, it's, it's the best occult site on the internet. And it's, uh, what's the name of it? Cause it cause a Nostra cause a Nostra.

Uh, it's all in German. Uh, but you can, you can use the translator. I had to go through the whole thing.

Right. And, uh, they talk about all the things that, you know, Serrano talks about. They never mentioned Serrano, but, uh, excuse me.

And the end, uh, the end result is that, uh, all these factions are split up all over the world and inter-dimensionally and stuff. And, uh, uh, the last thing, the final thing is plan Z, Z plan. And Z plan is when all these factions come together and they, it's Serrano's, uh, you know, when he talks about, uh, the, the, the, uh, the order to attack the, uh, that's what it is.

That would be a good thing if that were true. Yeah. A lot of the research I did into Serrano or into Putin just seems like he's affiliated with the Koshar Nostra, but maybe he just has to deal with them.

Uh, yeah. Uh, he's got to deal with them. He was affiliated with the world economic forum, but then again, he's a KGB guy.

They, you know, they infiltrate and they assess that's what they do. Right. No.

So, uh, just be, what is that your phone? Or is that John? Yeah. I'm gonna have to try to unplug that or something. I'll just leave it off the hook.

Yeah. Yeah. Maybe it was John.

You should have answered it. Yeah. I don't know.

Well, if it is him call again and then I'll do that. Well, they like to, they like to call in at the worst time, right? Like when you're in the bathtub or something, if you're being gang stalked by this cabal of nuts, yeah, he was talking about, you think you're being gang stalked. Uh, I know I'm definitely being stalked by these guys.

Creeps. Cause everywhere I go, they're all over me. Yeah.

Good website is stop gang stalking crimes.com for people who want to know more about that subject, very involved. But basically they just stalk you and they harass you and experiment on you for their neuroscience research, their transhumanist agenda. Well, the second you start talking about, uh, Miguel Serrano, you make yourself a target, uh, suspected of being, uh, you know, uh, I think they have a lot of problems with the third power right now.

So I was saying with those Z's on the tank, uh, I know, I know people that know, you know, that are, are over there and five places and I, you know, they got those, those rockets that do mark 25. Those are not supposed to exist. And they were only supposed to be theoretical.

That's shocked the shit out of NATO when he used those. And they got, uh, they've also used jamming technologies, uh, to, to, to land, uh, Tomahawk strikes that should have been picked up easily that, that, that, uh, NATO never saw coming. Uh, and, and China's use these, these same technologies I'm being told.

So, uh, they, they're telling me that I got them from the aliens, but alien being a code word for the third power, uh, you know, as far as I'm concerned, and the third power being these, uh, hidden factions of Germans, uh, yeah, it could very well be the case. So, uh, but I, we were supposed to get into this, this, uh, this, uh, uh, by frost bridge before us bridge, uh, and I'm waiting for, uh, we're going to go way off, uh, uh, John's, uh, uh, yeah. As agenda here, because we were supposed to bring this to bidden here.

I see it. I see him in the chat here, but I don't hear anything. Yeah.

Let me, maybe he was trying to call in or something. It could have been. No, there he is.

I see him with his mouth open. John. It looks perplexed that, well, well, anyway, what I was saying, I don't know if he knows he's on camera.

Can you see him on camera? I can see. Yeah. I was saying with this, this, uh, this Honda character, he has, uh, he's, uh, he has nine mothers, which are the wave maidens.

Just hold on a second. I'll see if it's him. Okay.

Oh, sorry. I'm busy. I don't, I can't talk now.

Yeah. Just some, some agent who's trying to worm his way into my good graces to talk. He always calls it, you know, at those exact moments when you're trying to, I get the same thing, Adam, sometimes I say, uh, there's been periods where it happens and then, uh, I'm pretty free of them now, you know, uh, this stuff that's happens and, uh, they stay away from me coincidental that they just call it certain moments and so forth.

Just when you're emailing something or whatever, you know, yeah. Yeah. Trying to find out about something and then they just call you and they start talking about the thing.

You're researching on the internet or whatever it may be. I get the same thing sometimes, you know, I get that. But, uh, I, I, I, I've, I've learned to understand that they're always there.

You know, uh, certain people in society are always, always surveilled, uh, a standard operating procedure for the NSA, uh, and for, uh, the DOD. So, uh, Sean's locked out of his own interview. He looks forlorn and lost.

I see you're back by the way. Oh, you there? I am here. I'm on both phone and thing.

I'm going to hang up my phone. Well, yeah, you should take the camera off too. She

said, I know it's deadly, but, uh, okay.

So, uh, did you want to, you want to interject? Yeah. Before we, we don't want to go way off topic. Yeah.

About, about Heimdall. It says on Wikipedia, his name is the one who illuminates the world illumination, or I guess maybe that has a connection to the rainbow bridge being like the, uh, chakras maybe, and it also says he's the whitest of the gods, right? Right. That there's one that says he's the whitest.

And there's another one that says his name means shorty or dark black. So I don't know what's which one to believe here. Uh, is he white or is he black? And yeah, I know that they're trying to whitewash that figure of Heimdall.

In a recent movie, they put a black guy playing the role of Heimdall. Well, according to what I read is he's a mean shorty one. I think, uh, oh no, you know, you know what? I'm confusing him with Seta.

Okay. But I did read that Heimdall was, was dark or black too. But that could have been inserted in here.

Cause, uh, by Marvel comics for all I know, yeah, this is like, uh, uh, it's kind of like a stock link on it. I'm looking at right here. I can't find it.

But so I could have been confusing it with a lot of those references to swarthy-ness though. They only referred to people with like black hair, right? Right. I know that Norway, right? Yeah.

Yeah. So yeah, can you guys hear me at all? Yeah, I can hear you. Okay.

Can I break into this a little bit here? Yeah, this is my show. Thank you all for, uh, and, uh, Mr. Lee for, uh, uh, guiding me here to, through Firefox. I had, uh, I had an idea if, uh, I don't know how far you guys have gotten down the road here.

Or basically just discussing Shepard, the objective of what I wanted to do, uh, which was, uh, compare the mythology of this archetypal crisis to, uh, the situation we face today. Have you guys discussed that at all? No, no. I was waiting for you to get that.

I was saying, I was just saying to Loki that, that you wanted to, to, to equate this, uh, with, uh, yeah, I mean, that was the point of it. Uh, first of all, I wanted to really introduce you as a kind of idols of mine. You've both been on the show before and, and really have, uh, uh, displayed a tremendous, uh, range of, uh, knowledge about these, these, uh, these ancient scripts, Jack, when we were talking on the phone earlier today, you kind of blew my mind by talking about how the, uh, North's myths had a tangent to ancient Persia around the time of Darius.

Right, right. Uh, well that goes with the Lokasana. That's with the flighting of Loki.

Uh, it starts with a party, uh, and Loki's not invited. Uh, they've figured out how to, uh, uh, make enough mead for all the gods. So they're all like going to drink this mead, but certain scholars and academics have linked it to a, a Vedic, a Vedic text where they talk about, uh, the, the, the, the Asura and the divas are fighting over the Soma, the Soma.

And, uh, and they, they, they, they link it to this text. It's, it's after, uh, the Asura got their hands on the, uh, on the Soma, on the Soma. So this, this mead is not beer.

It's, it's, it's something else. It's, uh, it's a chunk in the Vedics. It's, uh, it's made by the moonlight.

They say it's a plant, but then they say it's made something with a cow. The cows and the cattle. And that's why those are sacred.

Then, uh, uh, the Hindus, the, to the Hindus, but, uh, it's. I saw that Jack and song to a symbol where they're, they're like praising the me as the, uh, as, as the key to all knowledge. And I got to thinking, are these people all alcoholics? And it's not beer.

It's not beer. It's, it's something that the gods drink. It's so much.

But they're all, maybe they're talking about the blood, like the grail and they, you know, like my affiliations with these, these beings. And we're getting into that. My, uh, sub stacks, I, yeah, they drink blood.

They drink blood, you know, with, with 39 trillion bacteria cells and, uh, 30 trillion human cells and the human cells are all contained in the bloodstream. So there's, uh, there's a lot to that, that, uh, that myth, that supposed myth about vampires drinking blood. I mean, Bram Stoker didn't just pull that out of thin air.

Uh, this, this scientific fact behind it. Uh, but yeah, getting back to like this, this, this, uh, we want to do the, the, the, the, the, the, the, the, by Beefrost Bridge, which that's, that's what we're supposed to call it, John, the Beefrost Bridge. We're going to defend, uh, offend the death metal people over in Europe.

But anyway, uh, it's collapsed. It's supposedly the stardust bridge ever built, but, uh, in Ragnarok, it collapses when Surtur comes out of the South, leading the army of the sons of, the invincible sons of Mistralum. And, uh, he's got a weapon that was given to him by, uh, Sinmara.

It's called Leviathan. Strangely, that's what I named my book. Uh, those that would arouse Leviathan before I knew it.

This is where it all links back to Sauron. I'll tell, but in any case, uh, they come across the, uh, Beefrost Bridge and, uh, and, uh, they collapse it due to the weight of the heavy

weight. They're all giants and stuff.

Uh, and the sons of Mistralum are like the burning ones, uh, uh, almost equivalent to like the Bolignante, the shiny ones, uh, uh, of, uh, of Mesoamerican mythology. Uh, but, uh, This might have, if I could interject just, it might have something to do with like the Keepers of the Flame and Theosophy, what they speak of from Venus. Well, according to, according to Snorri Stolson, that's the, they created the world out of a fire from Mistralum.

I, I, I, I, I forget the whole legend. I haven't spent a long time since I did this, uh, just three or four years ago. I think I did this, the Revenge of Loki.

I did, I did like three or four of them and, uh, the Revenge of Loki. That's got an ancient picture of Loki holding up a net. And, uh, uh, that was the only, uh, well, there was two posts that, that, that veterans today would never, uh, they won't put them in their archives or on my author's page, but they ran them.

And what, what, what a fury they caused in the comments sections. But, uh, Loki's holding up a net. That's, that's when I went into all this.

So I'm going by my memory. So anyway, the Sons of Mistralum, they collapsed the bridge. Uh, and that's the sign that, that it's Ragnarok.

And I do believe we are in Ragnarok right now, to tell you the truth. I mean, uh, I, I look at somebody like Joe Bidden and, uh, this is madness. Uh, you know, like, uh, he's, he's appearing in front of that, uh, it looked like something out of like, uh, an internet, uh, uh, site about the Bohemian Grove with the fire in the back with the red lights.

And he's threatening like 70 or 80 million Americans that voted for Trump with the military. Uh, he's like a devil, man. I can't see no Satan now.

Uh, and, uh, they're all crazy. That people keep trying to find the great reset. They have a plan.

They're going to do this. They're going to do that. No, they're not.

They're on a suicide march, man. That they've gone, they've gone mad. That that's, that's what this is about.

That they've exposed themselves. I mean, with, with, uh, with the world economic forum, which is really just, uh, it's just, just, uh, uh, it's the metastasis of, of, uh, Bilderbergs. Uh, but they've exposed just what they are.

And, uh, they, they, they're losing, they're losing power in Europe. They're, they're right on the edge of revolution. It's not being imported in the United States, of course, but there's tanks rolling up, up and down German streets right now, uh, my friend, uh, or

rage.

My co-writer, he, uh, he fled Germany this morning. He says he doesn't know if he's going back there. Uh, Italy, they put this woman and I told she's a plant, but she's talking about, you know, she's, she's like, uh, the second coming of Hitler there, the way she's talking.

Uh, and, uh, they're calling her right wing and, uh, you know, the, the, the, the liberal process is like, uh, treating her like she's a second coming of Hitler. Uh, even though that would be a good thing. Uh, so, uh, this is, uh, this is anarchy.

Why, why are they, why are they picking a fight with China all of a sudden? Although my friend, uh, Phil, he says they do this every election, but, uh, I think, uh, you know, they've never denied the, uh, the treaty that Taiwan is, is, is part of China. Why suddenly are they doing that? I mean, uh, they've been in bed with China basically since Kissinger, uh, soiled Beijing with his presence in the seventies, uh, all the technology China has, they've gotten from America through Israel. And so what, what, what, why all of a sudden are they going at it with China? Why, why are they even going at it with Russia? I mean, what did they really need to start all this shit in the Ukraine? None of this makes any sense.

If you're trying to make a plan out of it, I think they're just reenacting biblical prophecy to deceive people, claiming that China's Gog and Russia's or whatever. I think dialectic, I think they're reenacting a Norse mythology or Norse religion. I think they're going with the dig.

I think we're seeing Ragnarok is what we're seeing. That's exactly what I wanted you to talk about. I wanted you to stay on topic, even though I wasn't here.

And this is a, I'm so happy to hear you doing this. Um, well, you told me what you wanted. That's right.

Yeah. Yeah. I'm sorry.

I had such trouble getting in. It's like a, like Comcast just came back on the air a few minutes ago and I've been trying all this time to get attached by phone. It's really a, it's really a tough situation, but it seems like you pretty much covered that topic.

One of the other things I wanted to do is get you guys talking about Serrano and about Herman Worth and about the Hyperboreans and what, what possibility of this lost philosophy that we have abandoned and it has been stamped in a submission by Jewish communists. Can we possibly resuscitate into maybe restoring some kind of sanity to the world? Uh, uh, I don't know how we're going to do that, but it seems to me like we've lost a better philosophy than we used to have. And we have been derailed by some people would say the Demiurge into this self-destructive path that is leading us toward our

doom.

What do you guys think about that? Uh, you know, I try to, I try to, uh, not alienate the Christians because that's what I did for the first time. I don't want to, I don't want to abandon the Christians either. They've been betrayed as much as we have.

Um, you know, but when I told you the other thing, I told you the other day, John, when they start screaming this shit about Lucifer and Lucifer's the devil and, uh, you know, and then they claim in the other hand that they're national socialists. Well, have you ever read Ronald Ron's book, uh, in Lucifer's court? Uh, have you ever read Miguel Serrano is more or less the spokesman for national socialism and, uh, in the current time, uh, Savitri Davila also said that if you're claimed to be a Christian and a national socialist and either you're, you don't know what you're talking about or you're a hypocrite. Yeah.

So many of the people who we know and we observe with our kind of horror, uh, uh, talking about how they're, uh, uh, uh, Hitler fans and, uh, and, and it's like they want to go after the Jews for the terrible, uh, uh, uh, things that they did during world war two are actually promoting the things that led to that disaster. But, uh, you know, I have a writer, Mike K and he goes into this all the time. I mean, you know, he won't, he won't go with me, me and Phil and, and I'll rage.

We're trying to like, uh, we're trying to make nice with the Christians more or less. I have a lot, I have a lot of Christian readers, you know, uh, believe it or not, you know, and believe it or not, if you knew me five years ago, the stuff I used to say on veterans today to them was, you know, that was really crazy stuff. I used to give them my address, Tom, if they wanted to fight, come on, you know, I'm a little older now.

I don't do that no more. But, uh, so what's your role on veterans today? Now, Jack, I don't really have on veterans today. Uh, I was thinking about, you know, uh, actually buying it from them, but, uh, no, it's, it's too many, uh, it's too many trolls on there.

They're too deeply wrapped in with the, uh, uh, you know, with, uh, the Jews and stuff, uh, you talk about the Kazarian mafia, who the hell coined that phrase? They did, you know, uh, Preston James, I think, right, right, right. See, well, he knows. Yeah.

He was on rents all the time, spouting off his rhetoric. Yeah. Yeah.

I know his real name. It's not his real name. So Mike Harris was another one involved in that.

And it's a, it's a tremendous, uh, it's a tremendous blinder. All those, all those, uh, synonyms for Jews, uh, that are, are, are mere deflections from the principal characters. And it's like they use it to, even Amy Goodman admitted this on our show, you know, it's like they use it to keep people from seeing what the real problem is, and if you can't see

the real problem is Jewish control of really the entire world, but most certainly the United States, then we can't make any progress at all.

And that's what we're doing right now. We're not making any progress at all. So, so how possibly can, what happened at Ragnarok and, and the, the principles that, that led to Ragnarok, assuming it's a real, uh, historical geographical thing that happened, what produced that? Was there some kind of Persian? Yes.

Was there some kind of Persian intrusion into Northern Europe that, uh, maybe, uh, serve to, uh, uh, subjugate the Germans and, and, uh, and produce the kind of, uh, takeover of that society like we see today with the Jews now controlling Russia, China, and the United States. I don't know how much they control. They, they, you want to hear my take on it? Okay.

Okay. Well, I did a lot of research and, uh, you know, it doesn't seem that there really ever was a Rome, you know, that, that Flamenco is right. That this is all, uh, this is all a nonsense.

And, uh, Rome is really Cologne in Germany. I think if you look in Cologne, you'll find 12 major cathedrals, uh, a scriptorium capable of holding 20,000 scrolls that, that which is nothing of the sort was ever found in Rome. Uh, so, uh, most of the stuff, uh, that you got written about Rome came from Benedictine monks.

Uh, so, uh, what happens is they had the Atonian dynasty, uh, which really unified Europe, uh, forget about Charlemagne. So, uh, if Charlemagne existed, he must've been a fish because there's another researcher, a famous Dutch. Yeah.

But yeah, that, that, where Charlemagne's territory was in his castle was underwater at the time, a time that they, they give it the Carolingian dynasty. Uh, what happened is, is, is, is the, these Northern French laws, this woman, she, she married, uh, uh, one of the, uh, uh, one of the, uh, the Otto's, uh, actually it was Henry the Fowler, uh, his father, I forget his name. I think his name was Henry too.

And it started the Atonian dynasty. And we were talking about, uh, uh, Wilkie pronounces it was a Haravar saga. Uh, Havamal, Havamal, right, right.

King Heidrich is Henry the Fowler in that saga. Now they try to make it, oh, it was spanked. He was in fifth century.

No, no, it goes through this. It records the two wars fought against the Huns by the Atonian dynasty that drove back the Huns, backed into Hungary. Uh, they, they, they, Byzantium, Byzantium was formed by the Russians, which, you know, they're going around now with, I don't know, what are they calling it again, the old Russian dynasty.

That's what Flamenco always claimed. Yeah. Right, right.

It was formed by the Byzant, it was formed by them and the Saxons. Okay. And they, and what happened is the Saxons were in the Vikings.

They had a feud. Uh, that was what, that was when, uh, they tried to initiate the Christian religion, Bruno the Great, another one of the Ottos, he was the Otto's brother. There was three of them.

Uh, and he was really the first Pope. And, uh, what happened is the Vikings rebelled, all the Saxons and the Germans who rebelled against this. Cause the three underclasses, they lost all their rights, man.

Now, now only the Kings and the Queens had the rights of the aristocracy. So they rebelled. Uh, uh, I forget the name of it.

It's, it's recorded in history as a rebellion, but they say it happened in the eighth century, which is bullshit. It happened in the 10th century. It gets confusing now if you read the actual historical, but there was a rebellion with, uh, with, uh, one of the Otto's sons, and that's what they're talking about.

Oh, the Stillinger Rebellion, the Stillinger Rebellion. But in any case, these, these, these Norse, they, they fled to the North country. That's why it was called Gietland.

Uh, and, uh, they, they fought them. They, they, they, they, these were all the fiercest warriors in the Germanic tribes though. So they went to Iceland to get away from, from Bruno.

That's why you got all those artists in Iceland. I mean, they try to tell you, oh yeah, well, they went there to, they, yeah, they went there to catch codfish. That's why these were the most literate men in Europe at the time.

And anything we have of European literature comes from Iceland. It was, you know, it's interesting that I'm related to a Gil Scallygrimson from Iceland, from Reykjavik. Yeah, yeah, yeah.

We could get into Iceland. Let me just say this before we go too far, since I'm so late here, uh, you're listening to Jack Hart and Loki Hulgaard on Kominsky Goes Ballistic, Behind Enemy Lines on speakfreeradio.com, where, uh, undoubtedly going to have call-in shows for interested questioners after the top of the hour and the number to call will be, uh, 1-605-562-0400. That's 1-605-562-0400.

The code you'll have to punch in after you reach the first level is 811-7272 and the pound sign. I want to apologize for being late. It was a technical difficulty and I want to thank the great folks for filling in.

And I especially want to thank these two extremely credible commentators for trying to

draw a parallel between our historical insanity that has led us to this, uh, perch on the eve of destruction that has been amply demonstrated throughout our history and has really been, uh, uh, sliced up and diced up by these two guys, uh, who are like the rest of us looking for a way to derail the people who are trying to kill most of the rest of us. And he just said something a minute ago, Jack, uh, where let me just, I want to give you the complete history. Yeah, go ahead.

Okay. Yeah. I want to give you the real history of Shlomo.

All right. Now what happened is these Vikings, they did an end run. Uh, they, they come around and they come down to Denver river and all those rivers and, and, and, and they sack, they sack Kiev and that's where they started that they did that the Russian dynasty and stuff, but, uh, they also laid siege to, to, to Byzantium.

Uh, and, uh, that's when it was settled that they would become Christians for some reason. And, uh, uh, uh, this guy, he married the Byzantium queen, uh, Vladimir, and, uh, he converted the Norse, the Norse to, uh, Christianity. His name wasn't Vladimir Putin, was it? No.

But okay. Now we get the Shlomo. Okay.

Now they go and they established all these trade routes because they had to make, they, they made a truce between the three of them. There were three major powers. There, there, there, there, there were the, the, the, uh, Saxons, there were the Russians and there were, there were, there were the, uh, actual, the Kievan Rus.

But there was somebody else in the mix that they couldn't deal with that, which was called the Pecheneg tribe. They were a lawless band of, of nomads. They never had any property, uh, and they were slave traders.

And, uh, that's, that's who the original, they, they, they, they were, they started ambushing all the caravans that were going to Byzantium from, from, from, from, from, uh, Russia. Uh, so they, they, they actually ceased trade, trade, trade ceased to exist. Uh, and now Constantine VII, he comes out with a decree and he wants to incorporate these Pechenegs into the empire.

Okay. And he's saying, and he's imploring his son, who's the next emperor. I I've reproduced this and stuff.

Uh, actually I got it from Yale and Yale took the whole thing down, but somebody else put it up. Uh, but, uh, he, uh, he gives the whole history of them, uh, how they, how they, uh, the Turks all scared and, uh, how they were raiding Russia and how they were raiding Viking caravans. So they were incorporated and then they became something called the Radonites.

Okay. Yeah. You, Jack, can you hang on for a second? Uh, the, the, the, the sound is a little weird.

Uh, are you too close to the microphone? Maybe. How's this? Oh, that's a little better. Yeah.

Okay. Yeah. I'm using a microphone by the way.

Yeah. Yeah. As you're going along with your, uh, with your itinerary there, it, it strikes me that you've left out something that we've come to consider a popular addition to history, and that is the presence of the Khazars.

Were the Khazars a real entity there? The Pechenegs were the Khazarians. They were a Khazarian tribe. They're still known as the Donmar in Turkey.

That, that, that, that there's the upper and the lower Pechenegs. They, uh, the lower one of the Pechenegs, uh, were the Donmar named after the Donmar River, which is around where they live. All you, you get the Jews from the Middle East.

They say they're Sephardic Jews. There's no such thing as a Sephardic Jew. What you got there is slaves and that they were trading with the Irish for hundreds of years.

And they had adapted, uh, this, this religion. Uh, they, they had actually gotten together with another Bruno. Like these Brunos were like immortal, man.

I traced them for like 300 years. It kept popping up with the same name. And that's when your, your Bible appeared, your old Testament.

Uh, they, she, she went over there and they say, oh, the Pechenegs killed them. Or some say he got killed by the Prussians, but that's when your Bible, the Leningrad Codex is as far back as the Bible goes. These Radonites, if you, if you study Carolingian history, they were the Jew traders.

They had, they had all the trade routes. You couldn't trade unless you were a Radonite, uh, across, across national boundaries. And that's how the Jews became rich.

They were merchants. Try not to get too close to the mic. I think you're, I think you're like blowing the speakers out on us.

Okay. All right. So, okay.

Speak. This has been, uh, you know, Slomo's been around a long time. Now you said that you, I missed a word that you said, was it Bruno? Yes.

The Bruno was the first Pope. Uh, and then there were three other, two other Brunos too. They come in threes.

Uh, it's, it's got something to do with German royalty as it was back then. Who exactly were the Brunos? Brunos were, uh, well, all right. There was Henry the Fowler, uh, uh, had, uh, had, uh, two sons.

There was, uh, there was Otto the Great and there was Bruno the Great. Okay. Otto the Great.

He became the Holy Roman Emperor. Uh, no, I think it was the second Otto. The first Otto, no, no.

Otto the Great became the Holy Roman Emperor. I'm correct. And he defeated the Huns in battle, uh, and drove back the, the, the, the, the, drove them back, uh, across the border, which is why we're, you know, we're not a Hungarian or Hungarian now.

Uh, but in any case, uh, Slavic, uh, but in any case, uh, he had another brother and this was Bruno, this was Bruno the Great. Bruno the Great was the first Pope. Now, uh, a lot of researchers have said that that's why they've, uh, there's a 300 years missing from the dark ages.

But, uh, frankly, I think it's much more than 300 years. I think the whole thousand years was made up and it wasn't, we aren't that far removed from the days of Sumer, Acadia, Chaldea, uh, and that's. And what year do you think those really were as opposed to what they say? They were a couple of thousand years ago.

No more, no more. Well, let me do a sound check on you. Say something.

Hello. Well, uh, and Serrano, he talks about this migration too, how they came down. They were, they were a mixed race of Mongol slaves and stuff.

Uh, and, uh, the Arab traders, they report the same thing at the time. Cause I've read the, uh, I've read their accounts because most of it's been purged from our Western accounts. But, uh, yeah, I was talking about the Khazars, some had red hair and some were almost black.

Some were blonde and some were shorty and black and short. Uh, so it was a mixed race. They all came in.

Uh, they, they, they, they all came in about the 10th century. Uh, it was a mass migration into Europe. I totally discounted that, that the Germanic race came down the Jutland peninsula, barren, frozen peninsula.

That happened to have been underwater when they say they did. For the Cimbri wars with the Rome, where were the battlefields? They can't find any of these battlefields. They made all this shit up, man.

And that's why we're in the situation we're in because these people are always quoting

history. You know, they made history up, man. History is part of the cage you're in.

So like Henry Ford said, history is bunk. Yeah. Uh, well, Henry Ford was a, we should have listened to him, you know? Uh, uh, but, uh, that's, that comes down to like what, you know, Loki, I'm sure you're familiar, like with the, uh, the discrepancy between, uh, Avola and Serrano between what the Jew really is, you know, what Shlomo, I try not to say Jew, I say Shlomo, I know that there's a good work by Avola called three aspects of the XYZ problem, XYZ, of course, meaning that, that tribal group, that's a very good work that discusses it.

I was wondering what your thoughts are about, uh, the Kazarians maybe being like the Svartalfs in the Edda, like the, the, the black dwarves who live underground and they commit, like, uh, you know, they kill people and drink their blood. Yeah. Well, that's, that's like a, uh, uh, Shaver wrote about that, uh, uh, with the Shaver mystery, right.

Right. Right. I was just familiar with that.

Yeah. I remember Lemuria. Tell me, would you tell me a little more about that? I know so superficially the shavers, but I didn't realize he was tied up with the, uh, the Shvartalfs.

Well, he wrote, I remember Lemuria, which is a tool and it was printed in, uh, it was published in amazing stories and it started a tremendous furor with Shlomo because Shlomo got it. A lot of people didn't, uh, yeah. I think it's available through adventures, unlimited press.

Oh yeah. Yeah. I I've got it on a couple of posts.

I've got the link to the whole book. And, and, and amazing stories, Ray Palmer's amazing stories kindled the entire new age movement in the United States where all of these alien groups were like, were like created by these stories. And this is something I didn't know that I should have known maybe that, uh, there was a Jewish Genesis to, uh, this whole operation.

Yeah. Yeah. Well, they, they, they pretty much, uh, uh, they, they come and did science fiction with Isaac Asimov.

And he's, he's the guy that really started this push towards transhuman. And he used to write stories about the human race was dead and, uh, you know, planets inhabited only by robots and stuff like that. He wrote 600 books.

Yeah. Yeah. So, you know, they all write on the pseudonyms and stuff.

So it was probably, it's probably a cadre of Jewish writers writing that shit. I don't know how anybody writes 600 books. We have, we have the same thing in, in, in the sciences too, as well as it's like, uh, and it's, it's not just Einstein, but it's Velikovsky and all these

other people where, where we have a whole Jewish script that has created our scientific spectrum and we don't, we have a pretty good idea that it's not real at all.

Yeah. Well, Velikovsky, he said what, 2,800 years ago, uh, well, it'd be 3,800 years ago that this calamity occurred, uh, that, uh, he was a Jew, but that, Oh yeah. Yeah.

He was, is there, is it, is there any concordance between, uh, the Velikovsky stuff and the, and, and the famous catastrophes of Coleman's Beaumont and all these other people, uh, to Jewish propaganda, do you think? Uh, you know, almost everything that we have is Jewish propaganda. You know, that's what I'm saying. I mean, they wrote the old Testament.

That's, that's why there's no pyramids and no, no sphinx in the Bible. You know why? Cause he would, he never set foot in fricking Egypt. Uh, this, this was written by a nomadic tribe of Russians.

Uh, they didn't even caught them changing the dates in the Crimea era. I wrote a soul story about this. Uh, this, this basically no such thing as a, as a, a Hebrew from, from, from, from, uh, Palestine.

They're all from Russia, man. It's the first time they've ever been in Palestine. You know, this is the right return.

Uh, that's, that's what they're covering up. Uh, you have people like the Marx brothers with Harpo Marx being strawberry blonde. He's a Russian.

Right. Well, look, look, I used to live, uh, I stayed for four months, right across the street from a Hasidic, uh, temple and stuff where they go to school. And these kids are blonde with red hair.

They did pull straight. They, they look like if you put them in a cowboy hat instead of a Hasidic hat and threw them in the Midwest, they'd look right at home that, you know, most of them are blonde with red hair, you know? So it's, it's really, uh, just a pretending, assuming this fake identity. Yeah.

Well, that's what we all are. We're all assuming fake identities. And the worst part of it is British, British Israelism.

Well, uh, we've convinced ourselves with a lost tribe of Israel, you know, they were headed down to the mid show break at, uh, at six o'clock. Uh, if you want to call in and talk to these guys, these fascinating, uh, scholars of ancient history, uh, the number to call is, uh, one six zero five five six two zero 400. The code you'll be asked to punch in is eight one one seven two seven two and the pound sign.

Uh, uh, I'm so happy to have you here. So, so sorry I was late and I missed the beginning

of that. But, uh, but, uh, I think maybe we're onto something that, uh, I think a lot of other people are onto it too, where we really have to investigate the, the underpinnings of the authority, uh, situations that we have let ourselves be captured by.

And I think, uh, digging out, uh, the origins of our civilization that have been concealed from us is, uh, is really up to you two guys. And I think after the break, depending on the phone calls that I would like to get into civilization before India in Central Asia and the North Pole and, and all of these, uh, all of these, uh, Herman Worth tangents and, uh, what really the second world war was about. Well, it's not only Herman Worth.

I mean, Alexander Dugan wrote a lot about this too. He was a big fan of Worth and the goddess. And, uh, I did a story on it, uh, return of the white queen.

And, uh, I, I, they've since taken down what I was, uh, uh, you can't, you can't find it no more in English, but, uh, I have big excerpts from what he wrote about it and, uh, you know, he, he likes Worth, uh, but, uh, you know, Alexander Dugan is a little too Jewish for my, uh, yeah, I know what you mean. Well, why don't Loki talk a little, man? Yeah. What's up? Loki talk to Serrano, man.

I haven't heard anything good with Serrano since, since Slipknot. On the topic of Dugan, there's one article that he wrote called the Dormition of the Mother Goddess. I think basically his, his whole program is pretty much, uh, multipolar in its own right, that it's Kremlin propaganda in multiple dimensions so that it just plays to every angle and it sort of tries to hook in everyone and everything into this rag bag so that they can force their agenda through, uh, and then play it off against the U S and NATO as the sort of opposition, like the two pincers that Francis Parker Yawkey spoke about in Imperium or the Enemy of Europe, that they're basically just playing them against one another and building up each faction.

So it'll be Russia and Islam and whatever, uh, alleged pro-white factions like Nordfront and whatever controlled opposition groups. Then they just associate them all together and call them Gog and Magog. And then they use the Zionists in the States to just hammer, hammer them or whatever, play it to the third world war and reenact biblical prophecy.

So Dugan's role is basically just to try to create this mythos to play it off against the mythos of whatever the alternative may be, the democratic mythos. The thing I can't get about Serrano a lot of times, and, and, and, and I'm sure you guys can do it better than I do, but every now and then, uh, he, when he lapses back into history, he seems to like leave the real world and go somewhere else, just like, uh, when, uh, people predict where, uh, where some people might've gone after the war, they kind of like leave reality. And it's one of the fascinating, but, but puzzling, uh, aspects of Serrano's work is that he's really operating in several dimensions.

And I think that's what keeps a lot of people from getting closer to him because they can't figure out where he goes. And it's like, there's a dimension to, uh, esoteric, uh, national socialist thought that kind of like leaves the real world and, and it makes it very difficult for people to follow in, in an empirical way, if you get what I'm driving at, but a lot of people are thinking that it's like maybe just esoteric concepts or psychological archetypes or something, but it's intended to be just understood in multiple dimensions, like literally, as well as metaphorically. So we're going into a four or five minute break here.

If you want to get, uh, if you want to get another beverage or make a pit stop, uh, I'm watching my clock tick down on the final minute. I'm always a little early for it. I want to thank you guys for carrying on and I can't wait to hear the recording of where you went when I wasn't here, but, uh, we've had, uh, this is hurricane territory down here and we're still have crews fixing up, uh, uh, wires and clearing brush and interrupting, uh, cell phones and all this other stuff.

And, uh, I'm so happy that, uh, that you guys had the fortitude and the common sense to, uh, do exactly what I wanted you to do. Way to go. You know, we, we, we, we, we, we act here, you know, we, we, we, uh, we do, we got to do, you know, I wish I knew where my board was, but I don't want to vaccinate your own vaccinated.

Right. Low-key. Yeah.

Yeah. Yeah. It's a bio weapon that I'm never going to take into my body.

Oh, we, we still have our brains left, you know, so, uh, yeah, there's nothing in the way at all. Paul, if you're listening, I don't have a board here, so I can't, I can't really tell exactly what the situation was I'm going by my wristwatch and I wish I had a better time around the screen, uh, but I never seemed to manage to get one, so, uh, we're just kind of, uh, treading water. We do have our, my, one of my favorite callers from, uh, from, uh, there's the music, we have a call from England waiting for after Julian.

Yes. Julian's not in England right now. We'll be back in a few minutes.

Okay. Was it a conspiracy? Did you know that the police in Boston were broadcasting? This is a drill. This is a drill on bull hordes during the marathon that the Boston Globe was tweeting that a demonstration bomb would be set off during the marathon for the benefit of bomb squad activities.

And that one would be set off in one minute in front of the library, which happened as the globe had announced peering through the smoke, you could see bodies with missing arms and legs, but there was no blood. The blood only showed up later and came out of a tube. They used amputee actors and a studio quality smoke machine.

Don't let yourself be played. Check out. And nobody died in Boston either.

Available at moonrockbooks.com. That's moonrockbooks.com. You are listening to speak free radio. The free speech internet radio platform. Okay.

Let's just follow the following under who could make this crap up. Not so long ago over on the Atlantic side of Florida, also known as the kosher coast, one Phillip Lusicoff came up with a brilliant scheme. Seems poor Phil never quite got his fill, a female breasts in his life.

Dang it. What to do? Should he surf porn? No, not that he wanted his boobs up close and personal. Should he hang out at Hooters? No, not that one might only gawk at that joint and Phil wanted his hoots hands on.

Should he jump in and join the dating scene? No, not that either too tedious. And it would only be one rack at a time. And so let's take off, came up with a novel idea.

He would pass himself off as a physician, a physician who goes door to door and gives breast exams for free. After examining only a few chesticles, however, patients became suspicious from the doctor seemed to be taking way too much time with his tests and taking way too much pleasure in his work. Indeed, when Lusicoff's quivering hands moved on to other parts of the victim's bodies during the exam, there was no longer any doubt.

Cops were called in and Dr. Phil was quickly busted. Lusicoff was sentenced to a year in the jug for his sex scam. The shameless wretch will also serve 18 years probation.

Okay. Then when added up, that means Philip Lusicoff will be an even 100 when his libido is finally turned loose on society again, since this pervert, this Viagra junkie is today a steamy 80 something years old. That's right.

80 something years old. Surely there has to be some kind of record here in Florida for oldest active sex predator. See what I mean? Who could make this crap up? Live from Presbyterian studio, Florida, Sundays, 2 p.m. Eastern.

It's the Dave and Duke call-in show. Hi, this is Dave Gahara. And this is David.

Limber up your dialing fingers and join us for our new Sunday weekly call-in show through the 3 p.m. Eastern time. We're taking the microphone away from Dr. Duke and handing him the phone receiver. Yes.

And I'll be happy to answer your questions because you are the star of the show. I'm simply here to try to answer your questions to the best of my ability from my lifetime of study, research, and activism. I'm looking forward to your questions and to your comments.

I'm out of space to try to talk to someone. Anybody home? I'll be here. Hey, here we go.

I may be back. Let's turn that off. Welcome back to Speak Free Radio.

Come in to your own ballistic. Loki, are you on board? Yeah, I'm here. And Jack, you're here? Yeah.

And Julian, are you there? I got to find the board. I must have shut them off. Julian, are you still with us? England calling.

Hello, Julian. Always great to hear your voice. How do you like our two prehistory gurus? Fantastic.

An absolutely stunning lineup, sir. And I'm so glad to hear that you're still with us and doing fine and fighting fit after the dreadful predations of Hurricane Ian. It was a drag.

I'll tell you that. So what's on your mind today? It's always interesting. Well, you know, Britain is being subsumed by detrimental energy robots.

That was that was a shave a row. That's a shave. Zero detrimental energy robots.

So another name for Stromo. Jack, do me a favor. Here it is.

Jack, do me a favor and back away from your microphone about an inch and a half. All right. I'm back on up now.

Thank you, sir. So, Julian, are you with us? Mentecide. Yes.

Mentecide is the precursor to schizogenesis. That's an old show. That's an old show, Julian.

Yeah. Well, look, you know, what's what's on my mind is the book Neither By Land Nor By Sea by the great Don Miguel Serrano. Oh, excellent.

You know, he, as Jack said earlier, and Loki, you know, Don Miguel prevented the exploitation of the great continent of Antarctica through his connections with India, with Jawaharl Nehru and his daughter who became Indira. She took the name Gandhi for political purposes. But anyway, but but, you know, he he was an expert in the idea of the Hyperboreans.

But I was talking to my friend earlier who's embarking on a on a great odyssey of of yogic enlightenment, and he was talking about Lord Krishna, who's blue. Now, it's been suggested that the reason why Krishna was blue was because he was he was so white, he was blue, he's a Hyperborean. And he introduced yoga to India from from beyond the north.

And there's other people who've said you were Don Miguel being one of them who suggested that, well, there was a sect of yoga called Prussian yoga. And one of the

aspects of Prussian yoga was a certain famous salute, which was meant to dispel fear and trepidation in warriors. That's a Zig Hale salute, isn't it? Well, I think, yeah.

I know that that's considered he was he was talking about that, that the salute to the Zig Hale is some sort of yogic, Aryan yogic or Arminist yogic posture. Right now, it's a transmission of energy. And you're putting your like your left hand right over your solar plexus or your Manipura chakra.

It was a spell, right? It was a spell. It was counted by Crowley with the V for England. So that's why they started flipping that V all the time.

That was that was Crowley's answer to that. Because he started out, he was he was actually taking credit for National Socialism in 1933. But he lost a lot of support when he when he got rid of Fedor and replaced him with that slimeball shot.

He lost support from Crowley and he probably lost Gundazhev's support too. I mean, at one time, I think Germany and Russia could have formed an alliance. I mean, that's what World War I and World War II were both about.

To prevent something called the Bojinko Treaty, which that was World War I, which was an alliance between the Tsar and the Kaiser. Jack, that's precisely what's happening today, where Biden has infiltrated or the U.S. has infiltrated the Ukraine. That's what this whole Ukrainian war is about.

Precisely to interrupt Germany's relationship with Russia. And as a result, Germany is going to suffer unparalleled, well, not unparalleled, but similar post-World War II pain because of what America has done. Again, here we go again.

Is that not demonic? They blew up Germany's pipeline. You blew up your own allies' pipeline. Right.

This is just crazy, man. I don't see any logic behind it. There is no logic.

It's malevolence. It's malevolent, demonic malevolence. It's the insane Jewish attitude about wanting to destroy the world and would rather rule the ghetto than have a healthy planet, which they are a part of.

Yeah, it's just a continuation of the Morgenthau plan. Yes. Well, they've been trying to get rid of Germany, the people, since clergy penned this venomous paneuropia.

Probably even before that, because if you look at the 30 Years' War, that was orchestrated through Luther as an agent, I've heard. Oh, you should talk to Orage. Orage's big thing is the 30-Year War.

Yeah, I don't know a lot about that, but my co-writer, Orage, he talks about the same thing you're saying all the time, and how they literally tore apart Germany deliberately

and the German people, and they had brother killing brother. So, Julian, what were you going to say about Serrano? Well, what I was going to add about Serrano was the fact that Professor Jung was the only person to ever write a preface to his book, and what Jung had to say about Serrano was that some things only the poets will understand, and in a sense, the poetical writings of Serrano are very in touch with the poetical writings of Savitri Devi, and also the very poetical writings of Otto Rahn as well, and they all speak to a certain vein within a certain humanity. Yeah, there's a quote from Serrano saying that only poets can understand me.

Yeah, well, I understand him perfectly well, so I guess I'm a poet. I disagree with what John said before about he goes into another world and not leaves the real world. What real world are you talking about, John? Shlomo's world? The materialistic world? Maybe I am, yeah.

Does it really exist that Shlomo's convinced us it exists? That could well be, yes. Shlomo, show me an atom, Shlomo, show me an atom, and don't give me a little scribble drawing. It's wave only, man, wave only physics.

This is a hologram we're in. There is no material matter here, and the sooner we learn that, the better, and I think that was the crux of Serrano's message to me. What it taught me is he says there's multiple yous in the world exist at the same time in different worlds, and the idea of his teachings is to build a bridge between those selves, and when you do that, when you achieve that, you become a diva, almost like a god, or really, you do become a god.

So that's where, you know, Serrano added the missing ingredient for me, for myself, for my own, what I am. Here's another quote. It says, For me, esoteric Hitlerism is being possessed by the archetypes of the collective unconscious, which the Greeks used to call gods.

Right, right. That's what I say, you know, if I was possessed by Lucifer, I would consider that a great honor, you know. So the question is, how do we infuse those into the real world to prevent the disaster that's about to happen? There's no way to prevent this disaster, John.

It's Ragnarok, man. You know, like David Bohm, the intricate and the explicit order, all right? Yeah, yeah, yeah. That's part of this whole holographic universe thing, Paranum.

You know, there's an explicit order. That's what's really happening, you know, in front of us and stuff. That's what we see, the external order of events.

But it's not the real order. The real order is the implicit order. That's what, you know, mystics would call heaven.

That's eternity, basically, the Greenland. Oh, the Greenland. You know about the

Greenland? They call that in Egypt, I think.

Tell us about the Greenland. Well, it's basically the same thing that he's speaking of. It's just a sort of higher vibrational state of being or condition.

How do we impose that control on the events of the world? It was prophesied. But that's another thing I was telling you about, that Cause of Nostra Red site. They talk about where that came from, the green world.

I would read that, Loki. I'll try to get you the links to that. Sure, I'd appreciate that.

Yeah, yeah. You've got to look at that. And why don't you mention Serrano as almost suspect? Cherry picking, maybe, but... No, I think there's some more, I wouldn't say insidious, but there's a reason for it.

There's a reason for it. I think it's like a multiple pronged attack, more or less. And I really do think this Z-plane, you know, this guy would come out with these Zs on his tanks and shit.

I nearly fell off the chair when I seen that. They sent it to me and I was like, what? Because I've been reading this website and I wrote a lot of my stuff and this is the final, this is the definitive order with that, that Miguel Serrano talked about, you know, Plan Z, Z-plan. That's how Cause of Nostra website ends.

And this guy comes with these Zs on his tank, with these weapons that he's not supposed to be able to even be made, these Mach 25 rockets and stuff. Where'd they come from, man? Where'd they come from? And Putin, he was the head of the KGB in Germany for what, 20 years? Yeah. Yeah.

Well, my friend told me, you know, he's a military intelligence guy, Phil. And when they were in Germany, you know, it was like, what they did was they try to figure out what Putin was going to do, you know? And that was what, before he was, that was when he was in charge of the KGB, not when he was president of Russia. Is this the same, is this the same Putin? Yes.

Yes. Vladimir Putin, he also has like a mystical birth story behind them too. Like where this woman was going to the camps and she was pregnant and she got saved and he was the son.

He was the son. And I recorded that in one of my posts. I forget which one it was.

Oh, oh no, it was Z-plan and Z-plan is behind the paywall. So I can't really. Anyway, Loki, what were you going to talk about as the second hour started before? Well, yeah, I was mentioning at the break how the concept of Ragnarok is very similar to the Manvantaras and the breath of Brahman.

And I guess you could say the temporal conception of Vedas that Ragnarok is pretty much equivalent to the Kali Yuga, which the Christians would call the end times. Only the distinction is that with Christianity, so far as I understand, it's mainly just a linear conception where you have to bow and scrape and worship a dogma and you go to heaven or to hell afterwards. Whereas in the Vedic conception, it's more, it's very similar, but it's not tainted with moralism and good versus evil.

It's just simply causal processes that occur during certain times, certain cosmological conditions. And that's basically what Ragnarok is. It's just when entropy comes to the point where it leads to mass chaos.

And then from there, there's a switch to a new golden age, which would be the Aquarian age from the Piscean age. And that's spoken of in the Edda as well. Once Ragnarok's finished with and the Fenrir wolf consumes everything, which is the Demiurge, the Fenrir wolf, once that happens, then there's another, a new earth afterwards, which is the first earth, which is first Hyperborea and Lif and Lifthrasir are the figures that exist afterwards.

What kind of effects and atmosphere existed during the Third Reich that was reflective of Hyperborea? And is any of that going to appear after Ragnarok, which appears to be happening now? Well, the whole SS was based on exactly what's around. I've been to Wellesberg, and they got their little Jewish paintings now. Yeah.

They look like aliens. They're really creepy. They really creep the place out, man, with this Jewish paintings of alien type.

It's like the shit they have at the Denver airport. In the city of London, yeah. Yeah, yeah, yeah.

So will the Hyperborean influence survive this coming disaster that we're going to have and is it going to exist afterwards? I think it always exists. It always exists because it's eternity. Yeah.

It's in a different dimension. It's not affected by this right here. This is, like I was saying before, this is part of the fact that the world is going to burn because heaven's going to burn, and the gods are all going to kill each other.

And we're just waiting for Surtr to kill Frey in single combat. So that's a comet. You're talking about a comet coming, and you're talking about just like at the flighting, all the gods are going to kill each other, and there's going to be a disaster, and there's going to be something new afterwards.

That's what happened. Yeah. It's like Loki was saying.

It's cyclic. It happens. It is.

Right. This is what I was told by—I don't think they were human that told me, but we won't get into that—but they told me Ragnarok occurs over and over again. Yeah, that's what I think.

There's many examples of it. There's no way to stop what we're seeing in front of us, man. We got to figure out how to pick up the pieces afterwards, which is why me and Phil were doing the 25 points on Substack and stuff.

You know, these people are intellectually vacuous, too. John, I write a five-paragraph post and it gets 10,000, 15,000 views, okay? You know, I write something intellectual. I put up something, The Godmother of Transhumanism, the other day, given to me by a very good friend of mine.

It's lucky if it got 2,000 reads. I know what you're talking about. Jack, let me say this before we go too far.

We're running low on time here. You listen to Kominsky Goes Ballistic on speakfreeradio.com. We're accepting call-ins, although we're still doing Julians. The number to call is 1-605-562-0400.

The code to punch in after that is 811-7272. Julian, did you ever get your question answered? Well, what I wanted to come back to was the talk of the Greenland. Of course, the Greenland was suggested by Dr. John Dee, who signed his letters 007 to Queen Elizabeth I, who signed off her letters to him as M, for Majesty, of course.

And he talked about her becoming an empress of two worlds, and the Greenland was to be the- Right, Miguel Serrano- To the other land, the Greenland, yeah. The Mirror of Papen. The Mirror of Papen, yeah.

But he says- The Mirror of Papen, yeah. Go ahead, Julian. Well, no, Jack was- Oh, okay.

I'm sorry. I wanted to make sure you get your question out. Jack, I wanted to point out to you that when I said he was operating on two different levels, I was talking in terms of highways, and cities, and streets, and food.

And it's like Serrano leaves that whole level of reality, and you may call that the real level of reality, but it's hard to find food in the etheric level, you know what I mean? I don't know. There's a lot of missing German hardware from World War II, so I think they went somewhere and found food and shelter. It was like 200 submarines missing, a couple of those giant junkers they made.

The list is endless. Personnel that were never found. I mean, what happened to Die Glocke? What happened to General Kammler? Where'd they go? Where'd they go? Yeah, Serrano speaks about, in his letter to Nimrod de Rosario, about against Gnosticism, that his doctrine is not Gnosticism.

It basically operates on multiple levels or different dimensions, just simultaneously on multiple different dimensions. So this applies to the physical as well as to the non-physical higher dimensions, because what happens at higher dimensions manifests in the physical plane, and that's the whole premise of Adolf Hitler's ultimate avatar, because Hitler was consistent with his ideas. He attacked Russia first to try to get rid of Bolshevism, even against all odds.

He could have just attacked the British and destroyed them, but he let them go, because they were part of the Aryan earlier period of Avalon. So the ideas won, but they lost physically so that they could win the war, even though they had to lose the battle. Okay.

We're all crying. We're crying in America. We're crying in England about what's happening now.

But we kind of went along with this idea, didn't we? We slaughtered a lot of Germans for no reason. Maybe we're just getting what we have coming. That's karma, basically.

That's what Savitri Devi spoke about that quite a lot in *The Lightning and The Sun*. We deserve it. We definitely deserve it.

Why is it that it's the Anglo-Saxon empire that's been hit the hardest by this COVID era? I mean, yes, we're the ones that are getting fricking bombed here. Is this karma? Did we bring this on ourselves? I think so. I think so.

Every time we read a New York Times article, every time we turn on a mainstream media thing, every time we watch a Steven Spielberg movie, we're bringing it on ourselves, man. Even you Christians, you go, Jesus, Jesus, Jesus. You better start reading about Hitler and who he was.

Nevermind Jesus. Jesus is a Jew wearing his mother's bathrobe that ended up getting nailed to a stick. Exactly.

He ain't doing anybody any good, all right? Start reading about Hitler. So you're saying Obama was a follower of Jesus? Barry, Barry was a fricking Illuminati. I know that firsthand, all right? We lost somebody there, yeah.

Well, I'm sorry. I'm still focused on how, if there's any way possible, and you're saying there's no way possible that we can stop the carnage that is about to happen. No, John, there's 62% of the human race has been injected with the kill shot already.

How are you going to stop what's going to happen with that? How are you going to stop it? It's done. It's done. Who knows what's going to happen to them? Like Alfred Schaeffer said in a recent interview, once people start seeing their own children dying of the vaccine, and then they know who's the one who's causing it, like the vaccines are made in a certain state in the Middle East, and all the CEOs are that tribal group, then they're

going to be blaming the proper person, the ultimate cause of it all.

And then that's really going to be when they go into panic mode. Do you think they'll ever see it? Yes, I do. I think Shlomo's got, you know, we talked about karma.

Shlomo's karma is really, really bad, man. I don't feel good about that. My grandson is half Jewish, half Ukrainian.

He's in the Khazarian Mafia. You know, well, it's expressed in James. What's interesting, too, is when you were mentioning karma, you know, different souls incarnate in certain types of bodies, and they're attracted by the law of attraction to certain regions of the earth.

So obviously, it's all, you know, that for a reason, like we grew up in certain areas and into certain families, and sharing that collective karma based upon past lives. What would you say to all those devout Christians who've done such good works, relatively good works all their lives? What would you say to them now as to what they're facing? Depends on what you mean by good. I mean, if you're talking about handing out free stuff and sabotaging the lives of white people so that they don't have any employment and others can just crowd into their country and steal it from them, then that's not very good.

And it's not very good for them to, you know, increase to an endless degree the populations of the earth by foreign aid or whatever. Thank you. Good point.

They might believe they're doing good deeds, but that itself is self-deception, typically, because most of these people do this for ego gratification. So that's karma itself. That's the whole thing about America throughout its history.

They think they're doing good as stealing from other people and killing them. Well, but I mean, look, you just brought up a point. Why do you need, you don't need to have 10 kids.

I mean, you know, nobody needs more than two kids. Why do we need to, why don't we just overrun our own resources, you know? And of course, now we have the open borders where it really doesn't matter. Well, they're the ones who are the accelerationists.

They're accelerating their own system collapse. They're trying to exploit that so that they can convince enough people it's biblical prophecy, and then get them to go around doing away with everybody who doesn't believe in their particular brand of what they call reality. Yeah, yeah.

Well, definitely, you know, the Bible is a self-fulfilling prophecy, particularly revelations. What is that prophecy? Prophecies, revelations, that's what ends the Bible, isn't it? No, but tell me what the actual prophecy is. Well, they're basically saying that this group,

this tribal group gets to rule the world because they're the special ones.

Thank you. And everybody who doesn't bow to them, you know, I'll bless thee who blesses thee and curse thee who curses thee. It's one of the quotes.

So in other words, if you ever criticize them or don't go along with their plans and worship them, then you're basically a devil who deserves to be done away with. That's what we are. In their eyes, we're satanists.

To Zionist Christian, we are three satanists here talking. Is Julian still with us? Julian, are you there? Yes, yes. Oh, all right.

We have four satanists. I just returned from the fridge. Smart man, yeah.

I was just looking in the fridge for some satanist stuff. I found a beer. I got one right here, too.

It's fire and water. So Jack and Loki and Julian, what do you think the media should be doing in this period just before our ultimate destruction? Committing suicide. No, no, no.

Don't do anything rash here. Don't make bad suggestions to people who can't control themselves. Yes, yes.

That's what I was about to suggest. The mainstream media is controlled by a criminal entity. We all know that, surely.

Yeah, we do. The only hope that we have is the alternative media, surely. What alternative media? Right here.

Well, people like yourselves. It's up to us. Yeah, it's up to us as human beings.

You're telling people there's no hope. I think the hope lies in relocation to secure places. There's no escape from these guys.

There's no escape from Elon Musk. Ragnarok has survivors. They go to Gamal.

Not everybody dies in Ragnarok. Tell us exactly what happened during Ragnarok. Well, first of all, Baldur is not really dead.

He comes back, and land rises from the bottom of the sea, and the human races continue. Then his brother, too, the deaf guy, he comes back, too. They're both not really even dead.

What happens in Ragnarok is, like I said, the gods slay each other. Well, first things first is, in the fighting of Loki, he ends up criticizing all the gods. People should read the Lokisana and stop watching Marvel Comics, which is made by Jews, again, trying to mess up our heritage and our culture.

In the Lokisana, Loki, he bursts into their hall while they're drinking their mead, whatever it was, and he starts criticizing them all. He gets in a big fight. He runs away.

He hides out as a salmon for a while. They find him, and they kill his two sons, and they bind him to three rocks with the entrails of his own son. Now, the prophecy is when he slips those bounds, then he'll come back.

He'll come back because he has another wife, one of the giantess. And with them, he has had the Fennel Wolf. He has had the Midgard Serpent, and he has had Hell Herself, the Goddess of Hell.

He comes back with all three of them, and all the dead come back with him. That's how Ragnarok starts. Loki slays Heimdallr, by the way, the guardian of the Rainbow Bridge, the Byforth Bridge.

Heimdallr slays Loki. But it ends with the Sons of Mespalum, which are supposed to be invincible anyway, and they come across the Rainbow Bridge. They collapse the Rainbow Bridge.

They're led by a giant named Surtr. That's the comet. Surtr was the comet that destroyed Atlantis.

Well, Surtr is like, that's the guy who wins the world. That's what I'm saying. He slays Frey, which is Freyja's brother, in single combat.

And then he goes, he's so enraged that he uses a weapon that he has called Leviathan that is unlocked by nine locks. There's nine locks on it. And it was given to him by Sinmara, a mysterious goddess.

It was probably Freyja. And he uses this weapon to kill the rooster, Vruma. I can't pronounce these Norse names.

I told Loki that already. But it's the only weapon that can kill the rooster that sits atop the Yggdrasil, crowing, which is Yahweh. I take to be Yahweh.

And that ends everything. And then you have this renewal. Land rises from the bottom of the ocean.

The survivors go to Gimel. Baldar and Holdar suddenly appear, and they're still alive. And civilization renews itself again.

So this was in the past, but they failed to kill Yahweh because he's still very much around. I know. I know.

Well, maybe he's a repetitive thing. Actually, I believe this is a computer program we're in right now. Maybe he's bit rot, or he's a glitch in the computer or something.

And plus, this story is a lot like similar stories. This particular story is a lot like other stories from other cultures of destruction and renewal. It's interesting how Blavatsky speaks about electricity as being a demon in the secret doctrine.

Maybe you could consider Jehovah to be that, to be electricity, because it's like the Big Bang, right? And positive energy. Haven't we just determined that all life is run by electricity? Yeah, all life within the demiurgic materialistic world, the phenomenal plane, or maya. So there's life without electricity somewhere.

Probably. Yeah, that's the thing. Velikovsky's conception is that it's an electrical universe, but Velikovsky is a tribe member.

Right. That's right. There's something wrong with the whole electrical universe, Siri.

Oh, because keep in mind that all these weapon systems and power systems from the Third Reich that Viktor Schauberger and Tesla and so on, before that even had created were implosively generated energy, whereas electricity is explosively, which is basically the demiurge. So maybe we could consider the electricity to be the demiurge. Interesting.

Or an extension of it or form it. That's a very interesting question. Well, I consider like with the union of Ager and Rand and the nine wave maidens.

Okay. We were talking about that before. Okay.

Rand is electricity and Ager is magnetism. And their union creates the nine wave maidens, which are electromagnetism, which uphold this world. And Hem-Jaw is the son of these wave maidens.

That's my take on it. I've written about this. I forget what the name is.

I don't even remember the names of my own pieces. Go ahead, guys. I don't.

I don't. I don't. What's the right of that, Don? I was reading yesterday, if I could just give a little comment on that.

Yes. Yesterday in Pirit Shus, The Mystery of the Central Sun, he was talking about like platonic ideas. And maybe that's what Heimdall is, is like a higher being that's a result of this combination of magnetism or electromagnetic conjunction that manifests in physical form in like an ideational realm that then crystallizes in matter later or something.

That's brilliant. Well, that's really brilliant. So you're talking about.

I like that. You write that down. It's like you're talking about electricity being the power source of the demiurge and the Serrano level of existence is without electricity and powered by something else.

Well, you would go into quantum physics then. You would go into the whole new world. You know, one where the wave function is not bent.

Torsion fields. So, yeah, I don't think, like I said, there's something wrong with the whole electric universe theory, discounting black holes. When you discount black holes, when we're in one, I got to dismiss you.

And then they start talking about Einstein invented black holes. What a stupid. No, no, no, no, no, no.

The Marquis Laplace invented black holes because he's the one that figured out gravity was a displacement and not an attraction after Newton. And what he said is it had to be black holes. And Einstein, when he wrote his hodgepodge of plagiarized ideas, he had to incorporate something that would explain black holes.

Black holes did not come from Einstein. So right away, you know, I smell shlomo in the electrical universe theory and that website that they're always talking about. Yeah.

Thunderbolt. Thunderbolt. Right, right, right.

Yeah. I smell shlomo all through that website. Yeah.

I've never trusted that at all. Yeah. So what's my take on that? You're listening to Kominsky Goes Ballistic on speakfreeradio.com. We have been had the good fortune of having two brilliant theoreticians, Jack Hart and Loki Hulgaard, discussing Ragnarok and its possible implications for our current situation in the world.

And their consensus, if I may be so bold to suggest, is that there's no way we're going to stop this disaster. And this is what we have to deal with. Am I incorrect? That's my consensus.

Yeah. How about you? One last last quote I could quote from Serrano's Manor says, Cronos Saturn emits gravitational waves that waste our energies and wear us down in the slide toward death. That's a gloomy prediction.

One of the things I liked about the last Avatar were all these little novels that Serrano put in, and especially about Chile, which was his native land. And there were all these heroic stories about what went on in South America. And it strikes me that, especially when that whole nuclear deal in Japan went down a few years ago that everybody got so scared about, that there's a whole hemisphere of interesting implications in Chile, and a kind of a fantastic history.

And it's really amazing that one of the most brilliant minds ever to grace the human body was from Chile. And what was so special about that particular area and that kind of background that would produce a guy like Serrano? Must have to do with the earth

energies because it's near that sacred sites. Well, didn't Serrano say that the Antarctic is the sexual organs of the earth? Yeah, Chile and Argentina are very close to the Antarctic.

I saw Australia and New Zealand. Right now we're covering that in Substack with Australia. I got Alec Newell on there.

Yeah. A bunch of people from Nexus and stuff. And we're having some great comment sections and stuff.

Yeah. Serrano also said that the North Pole was flipped with the South Pole, so that in Chile, that's where the North Pole is, which is Hyperborea. Yes, Hyperborea used to be the North Pole according to the Arctic home in the Vedas.

And if they flipped, Hyperborea is now in the South Pole. How much credibility can we give to all the activity we read about that took place at the South Pole? I think we can give a lot of credibility to it. I mean, there were plenty of eyewitnesses.

When we talk about Miguel Serrano and his role with India, I mean, it can't be refuted. It happened. Everybody saw it happen.

It's hard for them to cover things like that up and they've tried to, but it's now come out. Those are the writings of Miguel Serrano. Well, what's your speculation on the current status of possible activity at the South Pole now? Well, it sort of comes out of the South, man.

That's the land of the Yotan. They have Naya Judah there now. Oh, dear.

Naya Judah, which he spoke about as the Andean plan, Plan Andina. That's full of Israelis in Chile. What is that? Yeah, Patagonia.

Last I heard, they were fighting over Patagonia with the Jews. Maybe that's where some of the World War III will start. Well, Slomo's played himself by backing this vaccine and backing sewers like the New York Times.

He'll be lucky. He made up the first holocaust, but the second one, he'll be lucky if that don't happen. There's so much hatred now for them and they're trying to cover it up and stuff.

Trying to distract people with creating wars and stuff like that all over the earth. Right, right. Yeah.

The Ukraine war, that would be great if it would expand to a nuclear war. How would you suggest that the general population who was interested in informing themselves get into the work of Miguel Serrano? You can read *The Son of the Widower*. That's a pretty basic book.

It was written at the end of his life. So it's sort of like, you know, more easily synthesizes his ideas. Right, right.

In a short, short book, it's only like 440 pages or whatever it is. Yeah. No, it's about 100 pages, I think, the one I read.

Yeah, Son of the Widower is short. It's The Last Avatar that's the monster. Oh, yeah.

Well, that's like 900 pages. Yep, it is. That's how I got introduced to Miguel.

I took a crash course in Miguel Serrano. Well, that's the first book I read. What's the main point of Last Avatar? The title.

What? The title. And what does that actually mean in terms of people who might be able to understand it? That Hitler will be back, that he was not dead, and that this whole thing, it's been a ruse. It's been a ruse.

You know, the war in Russia was thrown, but that's the way it had to be. You know, in order to win, he had to lose in this dimension, which is basically a dimension of freaking losers anyway. Hard to argue with that.

Julian, are you still there? Of course, I'm still here. We should have just had Julian on the show. I know, we should have, yeah.

You got calls like this, man. He's qualified for sure. I know he is, I know he is.

Yeah, yeah, yeah. So Julian, what's your summation? The summation of this show. Well, the works of Miguel Serrano are amongst the most esoterically important works to anybody who wishes to explore the idea of the memory of the blood.

And his work is not for everybody. It's only for people who look for a deeper and higher understanding. And in the words of William Shakespeare, hell is empty for the devils are all here.

And they are. They are, for sure. So how important is it to preserve the works of Miguel Serrano for the people who- Preserve, we should be spreading them like a gospel.

Dig out civilization after the destruction that's about to occur. That's why, Loki, you got to get in touch with me, man. I'm going to start spreading your stuff all over.

Yeah, great, I appreciate that. Excellent idea. I got three or four different sites with a lot of viewers and stuff.

I could put it on Veterans Today even, I don't care. What I'd like to see happen for information spread is people who have money invest in like a printing press, like a pirate printing press, and we can print out all these and not be dependent upon, it looks like I'm

getting an echo, not be dependent on relying on print-on-demand companies or something, because they're usually controlled by the system. Amazon deliberately torpedoed my book.

I mean, I still sold 500 copies, but I should have sold a hundred thousand. I should have sold a million copies. I mean, it told the true story of the Amityville Horror.

It goes in-depth into the mafia and how it really ran in the late 80s and into the 90s. I mean, I was the ultimate insider and I sold 500 books. I watched Mikey Franchese on TV.

Mikey sees me in a bar. Mikey buys me a drink. He sees doing the mafia.

The Jewish talking about the start of the gas scam. That was my brother's boyfriend for the last 10 years, Marty Myers, and that's how I know a lot of these characters from the New Age movement. I was telling Loki before, through J.J. Hurtock, the guru for Nassau, another Jewish liar.

If this were a just society, then people like you would be on the New York Times bestseller list. It wouldn't be some joker who just wrote some shit stain on a piece of paper or something like that. Yeah.

How your son could be more like a woman. Yeah, especially look at the New York Times bestseller. Oh my God.

So feminine. It's disgusting. It's disgusting.

And then you have the other bimbo, some bimbo for the New York Times, right? What are we going to do? There's no more men. Yes, Shlomedra, you took care of that. That's why there's no more men.

Because people like you are given a podium to write when you ain't even got a three-digit IQ. And you got basically your body's covered with hair. And if you don't go for electrolysis, you look like Neanderthal woman.

So shut up. All right. Well, Neanderthal reptilian hybrid, maybe.

Well done, Jack. Well done. So, Jack, when are you going to turn Veterans Today into the paper it needs to be? I can't.

I can't. You got a lot of communists writing on there. They got just entitled.

You know, my father taught me something. You know, he didn't teach me too much. He was a tough guy and stuff.

You know, 101st Airborne. You know, he was really like nuts and bolts type guy. But he always told me, you know, believe half of what you see and nothing of what you hear.

And that's basically the only rule I go by. It works. It works.

And I don't believe nothing that I hear anymore. I really don't. And what do we get told? Oh, the Ukrainians can't mount a counterattack.

They're going to get crushed by the Russians. The Ukrainians mounted a counterattack. And you know what? I got eggs on my face from listening to all these stupid ass YouTube commenters.

Yeah, they don't know their ass from their elbow about military operations. You know, now I got a guy, a Cuban communist. I'd rather go with him.

He seems more intelligent than them. Yeah, yeah. They look good on YouTube.

Yeah, just a second. Loki, what's the most important thing you've done? In my life? Yeah, as far as writing. Oh, I can't speak about that.

Maybe I'll talk through email about it. Oh, OK. I can't really see.

Well, I want to start publishing. I see. I don't have an email for me.

You said you sent me an email. Why don't you send an email to John? I'll make sure. I'll make sure.

I'll make sure you're hooked up. Yeah, give him your email. No, no, no.

I'm surprised you haven't. In fact, you're on the same part of the list. You should have collided before now.

Yeah, well, it's probably Loki's being gangstalked, so. I know. Yeah, they do that.

They're basically shutting me out. And I can't really connect with people. That's why I keep him on BCC, because I'm trying not to expose him too much.

But I'll put the two of you together. Well, he needs to get out of Canada, man. He really does.

Yeah, if I could go and live in somebody's farm, like as a farm slave, just living in a ditch or in some. I'll tell Farrell he has a farm and a couple of empire farms. I know some people with ditches, yeah.

So long as your body doesn't wind up dead in a ditch there. We're running down to the end here. Like I said, I don't have a board, so I don't know for sure, but I got like four minutes left.

I just want to say this has been Kaminsky Goes Ballistic Behind Enemy Lines on speakfreeradio.com. That appears every Monday and Thursday. Usually, I'm there for the

beginning, but I've been having Comcast troubles because of the hurricane that took place here. 5 to 7 p.m. U.S. Eastern Daylight Time for another month or so.

We'll be on next Monday with somebody. I want to thank Jack Hart and Loki Hullgard, who've been on before, as has Julian from somewhere in England. Is that Birmingham or Liverpool? Liverpool.

He's a Liverpoolian, that's right. He's almost a member of the staff here. I want to thank the management of Speak Free Radio, who saved my bacon and held it all together.

And for Loki and Jack to have the common sense to realize who each other is and how valuable they are to each other and the rest of us. I want to thank them for their participation. Any final words from you guys? Yeah, I want to give Loki some exposure, you know.

I can do that. I can do that. Make sure I get his email, will you? John, that's going to be on you.

Count on it. All right. There's our music.

Thanks again, guys. Well done. Love and respect.

Thank you, Julian. You've done your patriotic duty. Thank you, Julian.

Best caller I ever heard. Yeah, he is. There we go.

Cheers, guys. Bye-bye. Bye.
