

he was out to breed Aryan supermen, and, like so many commercial animal breeders, he would heartlessly exterminate anyone who didn't have the required blond hair and blue eyes! Of course, what is being misconstrued here is the National Socialist concept of racial idealism.

The tall, blond-haired, blue-eyed Aryan from which we all have "devolved" is something to which an idealistic Folk would want to aspire. It is simply an ideal for the future, not some fanatical imperative which demands immediate racial experimentation. Racial idealism is a noble aspiration for an idealistic Folk who are selfless enough to put the interests of the future of their Folk above their own personal desires. This sort of idealism was common among the American aboriginal tribes of the Midwest. It was not unusual for individuals within the tribe to refrain from breeding when they were afflicted with some defect. This they did willingly for the benefit of the future of their Folk. How different it is nowadays in our "civilized" society! Today it is proclaimed an inalienable right for any two legged creature to breed, without regard to race, creed, or even sex! The real racial experimentation was not in National Socialist Germany, but is going on right here today.

#### **Nature's Purpose for All Life**

Nature's purpose for all life on this earth is to bring forth more highly evolved species. This is as true for mankind as it is for all the lower forms of life. This is the ultimate goal of National Socialism. Adolf Hitler understood the laws of Nature. He understood that the proper ecological place for all mankind was within his or her own Folk -- people of common heritage, common values, and common blood -- and that each Folk should live within its own Folk-community, a community based on

the immutable laws of Nature rather than the enslaving dictates of International Finance. He understood the necessity of race not only for societal and economic stability and prosperity, but for higher evolution as well. He realized that Nature's path to higher evolution required the degree of physical development and stability which is inherent in a high level of racial purity. The path of higher evolution requires an understanding of race.

We have neither the credentials nor the desire to engage in any sort of discussion of the scientific or historical technicalities of race. But we can rightfully point out that race is an important and necessary law of Nature, and that it is the prerequisite of any higher evolution of humanity! Racial idealism is simple. We need only a conscious awareness of what is obvious about the question of race, and concern for the evolution of our Folk.

# **Race**

## **A Pillar in the Structure of National Socialism**

**"There are some truths which are so obvious that for this very reason they are not seen, or at least not recognized, by ordinary people. They sometimes pass by such truisms as though blind, and they are most astonished when someone suddenly discovers what everyone really ought to know ... Thus men without exception wander about in the garden of Nature. They imagine that they know practically everything, and yet, with few exceptions, they pass blindly by one of the most patent principles of Nature's rule: the inner segregation of the species of all living beings on this earth."** -- Adolf Hitler

# Race

## A Pillar in the Structure of National Socialism

There are volumes written on the subject of race. A few are very good, but most are written for political and social reasons, and, more often than not, they are pure nonsense. Be that as it may, the importance of race should be obvious to everyone, simply by their own observation.

Every individual capable of any powers of observation knows that different breeds of chickens, dogs, horses, cats, etc. display vastly different abilities, intelligence, and even character. It doesn't take a doctorate in biology to see that this applies just as well to the human breed, or races as we call them. It is relatively easy to see the great differences in the values, cultures, and civilizations of the different races.

For example, it is easy to observe that political and social stability, lawfulness, hygienic and technological advancements, and a real trend toward individual freedoms prevail in those areas civilized and inhabited by the White race.

In contrast, we can readily determine that all areas inhabited by the Black race are marked by lawlessness, political and social instability, poor hygiene, a complete lack of any technological advancements, and no consciousness of so-called "human rights" or even basic individual freedoms. We can further observe that even Black areas which are within White civilizations are marked with similar lawlessness and primitiveness — regardless of civil rights laws, years of "affirmative action" laws, or billions of dollars of subsidies.

This alone should lead any honest observer to suspect that there are great dif-

ferences in the races. However, if still skeptical, one could observe those areas civilized and inhabited by Asians in order to see once again some real differences in values and culture.

While the Asians readily show ability to perfect and produce existing technology, they have invented very little on their own. Many Asian countries have a stable political and social system, but these systems are pretty devoid of a consciousness of any personal liberties. The Asian attitude toward their fellow Asians (not to even mention non-Asians) is very feudalistic, and while it certainly keeps order, it has a tendency to stunt the type of social, technological, and hygienic development seen in civilizations of the White race.

Just as we can easily observe the differences in races, we can also observe the effects of racial mixture. Adolf Hitler pointed out that the Americas clearly showed the effect of racial mixture: *"North America, whose populations consists in by far the largest part of Germanic elements who mixed but little with the colored peoples, shows a different humanity and culture from Central and South America, where the predominantly Latin immigrants often mixed with the aborigines on a large scale. By this one example, we can clearly and distinctly recognize the effect of racial mixture. The Germanic inhabitant of the American continent, who has remained racially pure and unmixed, rose to be the master of the continent. He will remain the master as long as he does not fall victim to defilement of his blood"* (Adolf Hitler, *Mein Kampf*, volume 1, chapter 11).

Indeed, observation of the Latin American countries gives us a good example of the effects of racial mixture. Although most

areas of development are ahead of the Black race, political and social stability are always in question, there is still no real technological development, hygiene is often very poor, and there are always great problems with corruption, lawlessness, and usually a lack of individual liberties.

It is also easy to observe that those Latin countries with a greater percentage of White racial inhabitants show much greater development and stability when compared to those countries with less White inhabitants.

With this in mind, an honest observer of history can readily see that many great civilizations, such as ancient Greece and Rome, decayed and collapsed when the original racial stock was diluted by interracial breeding.

In a society such as ours, which at least gives lip-service to ecological concerns, we should be able to realize that the races are natural communities of mankind which have taken Nature millennia to create, and that to avoid yet another ecological disaster, there should be great effort to preserve them in their natural environment.

However, the present racial situation in this country, as well as all of the countries inhabited by the White race, is leading the earth into a dark age of lawlessness, degeneracy, disease, slavery, and possibly the extinction of the White race. Each day that goes by proves more and more that Adolf Hitler, and all others who warned us about the dangers of multi-culturalism, were 100 percent right!

## Racial Idealism

But there is another aspect of race which we really need to consider. One of the current myths about Adolf Hitler was that
