

Waking White People Up

Hello once again, my fellow White Racial Comrades. Welcome to another service of our beloved World Church of The Creator. It's great to see all of you in attendance, and all of you who are listening to this tape, all of you who might be listening to it in the future on the Internet. I greet you, as your brother, as your comrade, in this holy struggle for the salvation, the resurrection, the redemption of our great beloved White Race. This has been another eventful week for our church. We are continuing to bring the message of Creativity far and wide throughout this land. This past week thousands of copies of the "Facts That The Government and The Media Doesn't Want You To Know" have been distributed to White people throughout this state, throughout this country. I'm happy to say that these truth grenades are exploding with a resonance that is alarming our Jewish advisories much or more than anything the past decades in this country.

The Jews know that when the White people of the world have the truth before them, have the information that expose them for the liars that they are, that the beginning of the White Man's liberation will be achieved. Our founder Ben Klassen said, a very provocative statement in Nature's Eternal Religion: Intense hatred of the Jew is the beginning to the White Man's liberation, [the] beginning to the White Man's liberation. Yes, indeed. We mean to hate our enemies. We do not mean to coddle with them, to embrace them, to love them, as our enemies would, undoubtedly of course, like us to do. We say what we mean, and we mean what we say. And in the Facts-booklet, that have been distributed all over the place — we say the truth. And White people, our Brothers and Sisters, in ever growing numbers, are realizing that indeed, White people are being set upon in this world. That the Jews are organizing the mud hordes to destroy it, to take away our birth right.

My comrades, we are fighting back. You cannot fight a lie with another lie. The World Church of The Creator has always realized this. We fight the lies — with the truth. The Jews can have their media, they have it. They can have the churches under their control. They can have the government. They can have the school system under their control. But as we, we seemingly ragtag activists, go out into the world with our message, we are chipping away at the lies that the Jews have created. We're chipping away at that lying statue that they have erected. They don't know what to do with themselves. They don't know what to do about us. They can throw their laws at us, they can ticket our members for littering, they can take us to court. But when we say that none of these things matter to us, when we show up in the court room with a smile on our face — mocking our enemies — they are at a loss. I cannot tell you how many times I have had the police call our Hotline, from city upon city across the land, saying: "Would you please tell all your members not to pass out this booklet in our city. Thank you! And give us a call back." I don't even bother to call them back. There's nothing to discuss. We will continue to distribute our literature, come what may. And should there be a law enacted against it, that law is unconstitutional. We will not follow unconstitutional law. It is that simple.

'The Truth Grenades'! That is what' - a few days ago I decided were the best way to describe the "Facts That The Government and The Media Doesn't Want You To Know" Explosive — yes, but also truthful! And that's what I told the media today, as I faxed the press release around to the various media in the state. That's what I told the media last night when the Decatur Morning Herald or whatever called me and asked about the Facts-booklet. I told them: "YES — our members have been to Decatur. YES — we were recruiting members on the campus at Millikin University, and there'll be much more, many more truth grenades being dropped on the driveways in that city. Even the media, they are impressed with us. I can tell by the way they talk to me, they're impressed with our tenacity. Everytime there's an obstacle thrown our way, we jump it, and we express our happiness that we have strengthened

ourselves in the process. We Creators have to have strong legs — we're jumping obstacles all the time. We thank the enemy, for proving' - making us prove to ourselves, our dedication, and our love, our loyalty to our White Race. We are a phenomenon that cannot be defeated, truly. And certainly our enemies cannot figure out what to do to stop us. They can't stop us. For never in history, never in the history of this world, has there been an idea such as Creativity, to fire the hearts and minds of our people everywhere.

Just the other day, another news item of this week, was the lawsuit against Illinois State University. Yes, on the face of it, we lost, on the face of it, when the judge decided that "no, we did not have a contract with the university", which was a ridiculous ruling. That we'll be appealed, that is not based in law. But we realize, that in any struggle, you have to take your knocks. And as Nietzsche said, that great philosopher said, and Hitler echoed him: "Every defeat can become a victory." Whether something is a loss or victory, depends on your mind. What you decide in your mind. If you decide that going to jail is a traumatic event — oh yes, it will be a traumatising thing. But if you decide that it simply prove the enemies desperation of trying to stop us. If you decide that, well, I went to jail, but Creativity was in the news left and right because of it. Then perhaps it isn't a defeat. Perhaps it is a victory. Indeed it is. So this ? lost lawsuit, that was temporarily dismissed, our foes and the befuddled may say we lost. We lost and we were defeated and so forth — not so! For 50 dollar, or it was actually, I think 120 dollars total, in bringing that suit and serving the defendants — we gained 1000 dollars of publicity for our righteous cause. And of course, the suit was meritorious from the beginning, and it will be appealed. And we will force, once again, those who would try to stop us. Those who would try to destroy our free speech. We will force them into the court rooms to defend their actions. They will have to pay for their attorney fees, which obviously, we did not. They will have to justify their actions. We have put this community, this state, this nation on notice, that if you screw with The World Church of The Creator, you may have a hard time on your hands. You may be places you don't want to be. You may find yourself in the dock in the court room. This in itself is a victory. This in itself will make our enemies think twice about trying to stop us from exercising our liberties, our religious freedoms in this country, in this world.

We continue each and every day our heroic mission. We know that numbers have never decided anything, but the will in each and every one of us. Do we have the will, to forge this world, as we want it? Or will we be weak, like many of the White people today, who allow the world to be formed by others? Creativity is building the world anew. Creativity is taking that iron and smelting it exactly the configuration that we want it. Creativity says that your value system, you Jews who created the Christianity that is burdening our race, we will no longer accept your value system pushed upon us. When people say that: "You are haters", and we say: "Well, OK' - AND?" — they don't know what to say! They don't know what to do. We will NOT be the other organizations, who will try to run from every attack upon it. Instead we take the blows, and we smile. I just received an e-mail yesterday. A person wrote a long letter, and several times it said: "Well, how can you hate? Why do you hate? You're just creating chaos in the world." And I wrote back a simple answer, a short answer, because in these times my time is pretty limited. But I wrote an answer, saying: "Yes, we hate. We love it, and we wish to create as much chaos in the world as possible.' — and sent it back to her.

That is a pretty new idea for people! But our people have to drink that castor oil, that we are serving them. They are going to! It's good for them! And we will do it with a smile on our face, and a haughtiness in our tone. Yes indeed, my comrades. YES, we wish to create chaos — today — because out of this chaos will come the order of tomorrow. YES, we wish to sow the seed of doubt and resentment in our people, towards this government, towards this occupied government that we live under. YES, we want to sow hatred in the hearts and minds of our people towards its enemies.

Absolutely. For as our great founder Ben Klassen said: “Only a liar or an idiot would go into battle loving his enemies.” And that’s our position. Show me a person who HATES niggers, but loves them, says: “Well, I don’t like blacks, but God loves them, so I do too.” No. It does not make sense! We will eradicate the dusty ideas of old. “All men are created equal.” – we will blow that out of the water. We will destroy all ideas that put our race in anything but a superior position on this planet. Any idea that says “we’re just the same” as the inferior mud races, we will destroy.

Our founder realized, our great founder Ben Klassen realized, that simply creating an idea is not enough. That if you wish to build a palace, and there’s a shack in your way, you’re going to have to remove the shack. You don’t remove it by loving, you don’t remove it by embracing. You remove it by destroying. Our ideas are not new in a sense, my comrades. As Ben Klassen said: the ideas in Nature’s Eternal Religion are old, yet new. They’re new in that we have finally realized, and codified the ideas that guide all life, the impulses, the instincts that guide every creature on this planet. We seek the embracement, the embracing of our instincts. We don’t need some college intellectual, some arm-chair intellectual to come to us, and say that: “Well, maybe socially we should have a multi-cultural ethnic nation!” or whatever. We don’t need someone to say: “Well, okay, your instincts says you should hate your enemies, but let’s rise above our instincts”. NO! We embrace who we are. We embrace what Nature made us. Every creature on this planet looks out for its own kind, and its own kind alone. And they certainly do not look out for their enemies.

So White people, who are our natural enemies? Every group on Earth have natural enemies. Ask the rabbit in the field. Ask the dolphins. Ask every specie on this planet who their natural enemy is. Don’t ask them literally of course, but look at their example. We too as White people have natural enemies. And they are not rabbits, they’re not sharks, they’re not lions. They are the mud races. Our natural enemies. Our natural adversaries. We compete with them for the limited space on this planet. We cannot give all of the green Earth to the mud races. We cannot share with them. As Ben Klassen also said: “A race is either expanding or is declining. It is either going forward or is in retreat.” This is a simple law of life. Our natural enemies. And remember that when you talk to others, because I think people can understand that if you say it to them that way. Who are our natural enemies? Nooo, we weren’t put here by Jehova, Jesus, God, Jahwe, whatever you want to call it, into this little Garden of Eden, and we have no natural enemies, and we’re just going to love each other and live ever after, until, of course, Jesus comes back and condemns three quarters of the population to “hell”. NO! That’s not the reality.

The other day, in fact it was yesterday, Jehovas Witnesses came to my door, and said: “Wouldn’t it be great if the lion laid with the lamb?”. I was very happy to hear that. I said: “The lion should eat the lamb!” Don’t show me a lion that lays down with the lamb as buddy-buddy. Show me that prey attitude! Show me that fire — not this mutated, confused, befuddled Christian world. What kind of lion would it be? Would you want to watch National Geographics and watch a lion sit and play cards with the lamb? I laugh and I smile. We are all smiling. It is funny. But let’s remember in our laughter that there are people who actually believe this stuff. We must raise those weeds in their consciousness. We must show them the real world, and rejoice from the real world! A lot of people have been, up until Creativity, have been too weak to embrace the real world. They want a fantasy world. They can’t believe that maybe one day they will die. Maybe one day, their life will come to an end. Well it does, my comrades. And we should not feel sad about this. This is Nature’s plan. It’s like feeling sad you have to go to the bathroom each day. It’s like feeling sad that you might feel attracted to the opposite sex. It’s like feeling sad that you have to eat. No, these are things that we have to do and we should rejoice in it. Our immortality is our race. That’s the immortality we’re working for, my brothers and sisters. Our beloved people. We have a limited time, but each and every one of us is ensuring’- fighting to ensure the survival, the perpetuity of our great White Race.

My Comrades, we are fighting, as I said before, the most important cause the world has ever known. We have to utilize every emotion within ourselves to win this cause. We can laugh at our enemies, mock them. We can show the fire in our hearts and our eyes. I like to look at each and every one of you and see, look for that fire. I want to see it in each and every one of you. That passion. That zeal. Let the weak call us fanatic. We love that term. Let us be called zealots, for we are. Are we fanatics? Yes. Are we zealots? Yes. For if there has ever been anything in this world that deserved our zealousness, our fanaticism, it is our White Race. We, each and every day, are ensuring its survival. You, my comrades and I, are distributing our truth grenades everywhere. We're winning the hearts and minds of our people. Today, we may be called names by some of our people. Today, we may be scorned. But tomorrow – they will love us. Tomorrow they will shake our hands, and salute us with pride that we took action for them. And each and every day, White people in this world are growing tired. Tired of sitting back and allowing their race to be destroyed, and they are beginning to stand up, and The World Church of The Creator will guide them, on this glorious path to our resurrection as a people.

My Brothers and Sisters. The future belongs to us. Let's, once again, resolve ourselves as we close this sermon, this service, with a resounding RAHOWA. When we say that word, let us promise, before the world, that we will do our duty, for our race. RAHOWA!
