

Major Win

The American Department of Justice has stated they are now going to launch an investigation into Google, Facebook, Apple and other big tech companies to determine if they are going to bring Antitrust laws against them. This is a major win for freedom and can be the end of the monopoly the enemy has on the market of information. Keep up the Final RTR! It's bringing major results!

Reply from HP Hooded Cobra 666:

Google is clearly conspiring with China, and probably is the one who is sending all the intellectual property theft to the Chinese, and not some specific spy. Google idealizes and has helped build the Chinese dystopia of censorship.

It's also for certain they do the same towards Israel.

Google has no loyalty to anything, it needs to be humbled.
